New-York Markets.—The following wholesale prices for Produce ruled on Friday, June 21st:

Flour—$6,80@$14 25—Wheat(Spring)$2,00, Winter—Corn—$1.10 — Oats—52c—Barley—$1,15 — Clover Seed—$ 12—Timothy $3 bush.—$2,00—Eggs—20c—Dried Apples—10c—Butter—23@25c—Cheese—14@16c—Mess Pork—18c—Hams—12@20c—Lard—13c—Hops—30@60c.

Legal Blanks!—We have lately printed a lot of Statements and Confessions, Common Counts Declarations, Bond and Application for Guardians, and a full assortment of Blanks for Justices, Constables, and Collectors.

Dep. Collector HUNT will be in this village on the 9th and 10th inst., to receive the U. S. Annual taxes.

THE ACADEMY.—The Anniversary Exercises are held to-day (Wednesday) in the Academy Chapel, commencing at 9 A. M.

PIC-NIC.—The little folks of the District School had a pic-nic excursion on Saturday. The occasion was one of great enjoyment to the little folks and teachers.

Mr. A. J. Roblyer writes us from Lee County, Iowa, that the wheat and corn crops promise abundance. He says that the season is the latest on record in that region.

By the General Appropriation bill of the last session the pay of Associate Judges in this State is $5 per day of service up to 50 days. Beyond that number of days the pay is three dollars.

BODINE'S Steam Mill is doing a big stroke of business nowadays. It turns out upward of 10,000 feet of handsome lumber per diem, and on the 25th the sawyers scored 3,200 feet in two hours. One say, only, is used.

STRAWBERRIES.—We are obliged to Mr. Wm. Carroll, for a package of large and luscious Strawberries, raised by him in the garden of W. B. Clymer, Esq., of this village. For size and lusciousness they could not easily be beaten.

Williamsport has a new steam Fire Engine. At a late trial it forced water through 1000 feet of hose and through an 1¼ inch nozzle to the height of 170 feet! The good people of Williamsport may prepare for more damage by water than by fire.

We have received a neat quarto of 16 pages entitled *The Educator*, published at Williamsport, Pa. From a cursory glance over its pages we can confidently recommend it to teachers and parent as a capital aid to educators. It is published monthly at $1. per year.

The *Clinton Republican* has been enlarged to an eight-column paper, presenting the same printed surface as the *Agitator*. We are glad to note this evidence of prosperity, and trust the Republicans of Clinton will extend to the Proprietors a generous patronage. They have now a first-class organ of Republican sentiment.

A poor woman in Binghamton was arrested by a Rev. Mr. Sparks for violating the Sabbath by setting out some tomato plants.—*Exchange.*

We pass the poor woman over to Brothers Jones of the *Vidette* and Bowmant of the *Republican*. Crucify her! Crucify her!

An article entitled "Herod in the Family," with comments, will appear next week. It was intended for this number, but by inadvertence got mixed with inside copy and was not discovered until too late for either side of the sheet. It is a timely article, and while it will not mince matters with the guilty, will bring to the light one of the most lamentable crimes of the age.

CHEESE FACTORIES.—These institutions appear to be in the height of the season. The Whitneyville Factory is now receiving about 2000 pounds of milk per day, from which not less than 200 lbs. of cheese are daily realized. The Stony Fork Factory is receiving about 3000 lbs. of milk per day, and the quantity is increasing. We are unable to report the receipts at the Round Top and Wheeler Hill Factories. The proprietors of the latter factories would confer a great favor upon the public if they would send in the information.

S. of T.—The quarterly election for officers of the Wellsboro Division, No. 265, S. of T., took place Wednesday evening, 26th inst., and resulted as follows:

W. P.—J. B. Niles; W. A.—William Riley; T.—Benj. Seeley; Chaplain.—Rev. J. F Calkins; R. S.—Thomas Allen; A. R. S—W. Webb; F. S.—G. W. Merrick; C.—O. F. Ellis; A. C.—C. O. Guernsey; I. S.—W. Ballard; O. S.—A. B. Root.

Contrary to the anxious fears of the enemies of temperance reform, the Division is in a flourishing condition, and more firmly resolved to put down the destroyer than ever.

HOOKER, of the Troy *Gazette*, saw a cat designed for a cheese factory pass through Troy the other day. He wonders if it did not preach a sermon on economy to the farmers of Bradford. If Hooker will come this way, we will take him to see four Cheese Factories within a radius of five miles of Wellsboro, one of them turning out half a ton of cheese per day, and the others from 400 to 700 pounds each, per day.—Keep punching your former friends, Hooker, and give them no rest until they recognize their best interests in association of capital. Real Estate has appreciated twenty per *cent.* in this region since the erection of these Factories.

STATE NORMAL SCHOOL.—We have received the Catalogue and Circular of the State Normal School at Mansfield, for the School year ending 1867. The exhibit is very gratifying, and shows that, under its present management, the School is in a most prosperous condition.—The whole number of names registered in the Normal and Model Schools is 405. The total cost per year to each student, including Board, rooms, tuition, Book-rent, Fuel, lights and Washing, is $141.00, no extras charged. This is believed to be as cheap as any self-sustaining institution can afford. The building is now furnished with the most approved style of furniture, and a Gymnasium with valuable apparatus has been added within the past year. The Trustees state that more room is needed to accommodate the growing patronage of the School. We share the hope that the way for making the needed additions may be provided soon. The high position which this School maintains among Normal Schools ought to commend it to the liberal patronage of the Commonwealth. This Normal District ought to furnish 800 scholars; and were the accommodations extended no doubt it would.

SCHOOL BOOKS—NATIONAL SERIES.—The great and increasing competition in School Books must be regarded as indicative of educational progress, whether every candidate for public favor be an improvement on its predecessor or not. If the country is flooded with "new series," we may take consolation in the fact that in a country where free schools do not exist there is much flooding of the market.

We have critically examined a series of School books entitled "THE NATIONAL SERIES," comprising elementary and pronouncing Speller, primer and five readers, and elementary and advanced Geographies.

Spellers.—The Elementary Speller is excellent in syllabication and graduation. We notice another and capital feature—the reproduction of the reading lessons in Script type, thus indirectly teaching writing and spelling at one and the same time. The advanced pronouncing Speller is a happy instance of adaptation of means to ends. Not only are the rules of orthography and pronunciation clearly presented, but the proper use of particles is taught by examples. In the close of the books a table of pronunciation with their use in connection with idioms of the language.

Readers.—The series starts with a beautifully illustrated primer. The lessons are alliterative, thus giving the pupil ample opportunity to acquire the several initial sounds of every letter in the alphabet. The First Reader takes up the work where the primer drops it and rises by successive steps to the Second Reader. Among the new features we note the fine classification of words into families, and this by a system so natural that the pupil is carried forward in a knowledge of Syntax and Prosody. The selections in the Second Reader are capital. The pupil cannot avoid acquiring an interest in the lesson unless utterly unteachable. The Third Reader is a Dictionary and Reader combined, taking up the work where the second ended and rising gradually and naturally to the next in the series. The selections are very fine—such fine poems as the "Old Oaken Bucket," being liberally sprinkled throughout its pages. The Fourth and Fifth Readers may be commended as rare compilations of the best modern composition, both prose and poetry being of the highest order. These books would ornament any center table as books of elegant extracts. The entire series is bound in embossed morocco of the best quality, and beautifully printed.

Geographies.—There are five of these, "beginning at the beginning," and rising to the summit of geographical knowledge. The primary books of which there are three, are on the object plan of teaching. One fine feature of the series is that Physical Geography, Climatology, Zoology, Geology and Mineralogy are taught in the same lesson. The pupil is as well acquainted with the topography and resources of every country as with its position on the globe. A completer repertory of useful knowledge we do not remember to have seen anywhere. The series is valuable as showing the wonderful progress of the country in the means of education, and the projectors of the series, as well as the publishers, are entitled to the gratitude of every friend of free schools. The adoption of this National Series would, we verily believe, vastly benefit parents, pupils, and teachers, everywhere, by flinging wide the avenues of knowledge to the humblest comprehension.

Norman Strait, Esq., of Osceola, is the Agent for the introduction of these excellent books in Tioga County.

LIBERTY IMPROVEMENTS.—Mr. G. R. Sheffer writes us under date of June 20, the following, touching progress and improvement in Liberty:

"We have 2 first class Hotels, 4 dry good stores, 1 grocery and drug store, 1 boot and shoe store, 2 boot and shoe shops, 1 harness and saddler shop, 1 wagon and carriage shop, 2 cabinet shops, 2 blacksmith shops, 1 woolen factory, 1 photograph gallery, 1 watch and clock maker's shop, 1 milliner shop, 3 doctors' offices, 1 justice's office, 1 steam saw mill, 1 tannery, 1 graded school house, 2 churches, 25 dwelling houses, and two storehouses, 40x50 ft. three stories high, just erected, and will soon be finished. There is to be an M. E. Church and two dwelling houses built in the course of the summer which will add very much to the improvements of our village. The citizens of our village, are hard to make the place, in appearance, as fine as any other of its size, in the county. Business is as prosperous as it is in any other village of equal size in the county, and the day is not far distant when we shall apply to the proper authorities to be incorporated into a Borough. In the above enumeration of buildings, I inadvertently omitted our prosperous 'Odd Fellows Hall,' which proves to be quite a help in the way of teaching erring humanity to walk in the paths of Friendship, Love, and Truth. The order of Odd Fellows, was re-organized on the 1st of last October, with a membership of about five persons, and at this date, the Lodge numbers some fifty members, and among the number, are men of the highest standing in the township. The citizens of Liberty, with united voices take for their motto, 'onward in the improvement of their farms, stock, houses, churches, schools, and in short, in everything that will make mankind intelligent, social and happy.'"

[For the Agitator.]

History of Sullivan Township.

Sullivan is one of the most easterly townships in the county. It was named in honor of General Sullivan.

A little over sixty years ago, it was a complete wilderness, whose inmost recesses had never been penetrated by a white man.

The first settlers were principally from Berks county, and, thinking they must settle where there was stone and stone, chose a place on the Antrim Mountains, at what is now called "Macklintosh Settlement," in Ward township, that part having since been taken from Sullivan.

These early settlers soon became discouraged at the barrenness of the soil in their locality, and concluded to come down into the valley. They selected their homes a few miles apart, just as their taste or fancy dictated. They erected their rude log houses,—very many of them,—with no other tools than the axe and the saw. They subsisted principally by fishing and hunting for several years. The rifle was their constant companion; and truly, indeed, was it needed, for the forest was infested by numberless wolves, bears and panthers.

In my next I will give you the names of these early settlers, and some of their most daring adventures. PHYTOMADIUS.

Trespassing.

Recently, certain individuals living in the immediate vicinity of the farm purchased by the county officers for Poorhouse purposes have been making themselves altogether too plenty in its meadows in search after strawberries.

Such persons should bear in mind that, every time they go upon the enclosures of their neighbors, without license by the individuals or corporate bodies, they are committing a *trespass*, and for every such *trespass* they are liable in damages to the owners or custodian of the premises. All persons are warned that the tramping down of grass on the possessions of the county will not be permitted for any purpose.

Hereafter any one found in the fields of the Poorhouse farm doing damage to its crops of any kind will be severely punished for their disobedience of the law. Persons who want strawberries should grow them upon their own farms and when grown should *pick* them from their *own kind* in preference to their *neighbors*. All who do not *cultivate* or *permit* this kind of fruit to grow should *buy* it just as they do any other article which they want but do not raise.

By order of the Commissioners.

June 25, 1867.

GOSSIP.—What means our friend "H" when he asks us—"Why is it easier to do wrong than to do right?" We do not regard that as the rule. Much depends upon education and circumstances. When natural depravity is deepened by education and example the worse assumes the garb of the better reason. But when education and example are made corrective of natural depravity, to do right is easier than to do wrong.—Our friend has some doubt in his mind to be resolved, perhaps as, for instance, that it is hardly consistent for the Creator to require the creature to do that, which, from his nature and constitution, is more difficult to do than what is prohibited, under penalties. Few men are so morally inverted as to change the evil rather than the good. Were the major portion of mankind so viciously inclined, Crime would rule supreme, and life and property would become valueless.—Some natures tend to excesses, yet are morally so strong that they continually restrain themselves and overcome evil inclinations. Perhaps these are greater conquerors than Alexander or Napoleon, Grant, Sherman, and Sheridan. Our view of the human duty makes it the bounden duty of every man to do right at all times, without regard to personal consequences. It is never right, and seldom excusable, to do evil that good may come. And any man who winks at evil, either from indolence or personal fear, is a worthless citizen, and deserves the minor condemnation.

June.—Is suggestive of picnics, and trouting, and fun for the hand and balmy winds, pure skies and singing birds, has passed away into the great company of translated Junes. Its first days were dreamy and delicious, with an atmosphere suggestive of transparent crystal; but its latter days were veiled in August mists, and its skies lowered with natalien, drizzling April showers. Meanwhile things grew with race-horse speed. The cabbages spread themselves and the black bugs reveled at their expense. The bugs shot up, carrying a load of mud high above the surface. The cucumbers lifted up the superincumbent crust, and the yellow bugs pitched in, and won. The tomatoes struggled briefly with adverse weather and finally came off victor; and the bugs rallied to put them down, and failed.—The grass and the grain flourished amazingly and unscathed by bugs. All in all one may live a dozen summers and not see the equals of the month just past for sturdy growth in the vegetable kingdom.

Local Trade.

AYER'S

Cathartic Pills

ARE the most perfect purgative we are able to produce, and as we think, has ever yet been made by any body. Their effects have abundantly shown to the community how much they excel the other medicines in use. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish or disordered organs into their natural action, and impart tone and strength to the whole system. Not only do they cure the every day complaints of everybody, but formidable and dangerous diseases. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugar-coated, they are pleasant to take; and, being purely vegetable, are entirely harmless. Cures have been made that would surpass belief, were they not substantiated by men of such exalted character, as to forbid the suspicion of untruth. Many eminent clergymen and physicians certify to the public the reliability of our remedies, while others have sent us the assurance of their conviction that our Preparations contribute immensely to the relief of our afflicted fellowmen.

The Agent below named is pleased to furnish gratis our American Almanac, containing directions for the use of these medicines and certificates of their cures of the following complaints: Costiveness, Bilious Complaints, Rheumatism, Dropsy, Heartburn, Headache arising from foul stomach, Nausea, Indigestion, Morbid Inaction of the Bowels and Pain arising therefrom, Flatulency, Loss of Appetite, all Diseases which require an evacuant medicine. They also, by purifying the blood and stimulating the system, cure many complaints which it would not be supposed they could reach, such as Deafness, Partial Blindness, Neuralgia and Nervous Irritability, Derangements of the Liver and Kidneys, Gout, and all other kindred disorders arising from a low state of the body, or obstruction of its functions.

Do not be put off by unprincipled dealers with other preparations on which they make more profit. Demand AYER'S and take no others. The sick want the best aid there is for them, and they should have it.

Prepared by Dr. J. C. AYER & CO., Lowell, Mass., and sold by all Druggists and dealers in medicines everywhere.

Sold in Wellsboro by J. A. Roy. july3-2m.

BEALE'S

(Late Powell's)

EMBROCATION.

For all Diseases incident to Horses, Cattle, and the Human Flesh, requiring the use of an External Application.

THIS new Compound, prepared by a practical Chemist, having a full knowledge of all the medical virtues of each ingredient that enters into its composition, is warranted to exceed anything of the kind ever yet offered to the Public as an external application for the diseases for which it is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and those who try it once will never be without it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by Farriers, rapid all who have tried it, to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse, is subject.

Many remedies have been offered to the Public under different forms, some of these are injurious, others at best of little use, and many wholly improper to answer the purpose for which they are recommended.

A judicious and really useful composition, free from these objections, has therefore long been desired by many gentlemen who have valuable horses, and are unwilling to trust them to the care of
