A San Francisco paper, noticing the formation in that city of the "South Pacific Protecting Company" (which is reported to be the sixteenth attempt made for the same purpose), gives the following romantic history of the buried treasure which this company seeks to recover: The stated object of the company is to recover buried treasure in Cocos Island—that is, to attempt to recover, provided the treasure is there In 1854 or 1855, a company with the same object in view was gotten up at the same place. Stock in the golden venture was liberally bought and liberally sold, as probably many in Marysville will recollect, as the schooner Julius Pringle, well manned and provis-ioned, sailed away, and with a fair wind made a straight wake for the Pirate's Isle. Some time afterwardshe returned with-a cargo of lumber. It appeared that an exceedingly strong current was found running round the island, so strong that a landing could not be effect-

In fact there is but one place there where a boat can land, and that adventurers failed to discover its whereabouts, and so, after consuming nearly all their provisions, they headed back for San Francisco, stopping at a place on the coast for a cargo. Another attempt was made five or six years after, with what result we have forgotten. The history connected with the treasure is as follows: A great many years ago the Pacific Ocean was infested with buccaneers, the majority of them coming from Spain. One of them, named from Spain. Lollonais, rendered himself most notorious by his piracies at sea, and his murders and robberies on land. After him came Henry Morgan, a Scotchman, who by his bloodthirstiness and daring recklessness threw into theshadeall the ets of his predecessors, the Spaniards. He landed at and pillaged all the principal towns on the South American coast. always torturing the inhabitants in the most inhuman manner, in order to compel them to confess where they had hidden their money and iewels. Twice be landed at Panama, and by horrid cruelty forced from the people a great portion of their wealth. It was after one of these "raids" that Morgan, with his fleet of thirty-three vessels, went to the Island of Taboga, a short distance from Panama, to have a grand carousal. Here some of the crew mutinied, and seizeing one of the best ships, went 'on an independent cruising, during which they fell in with a Spanish galleon bound from a Mexican or Chilian port to Spain, laden with gold coins and jewels belonging to the church, of the val ue-of \$20,000,000. After transferring the booty to their own ship, they scuttled and sunk the other, first putting to death all on board with the exception of two boys. Next a man of-war hove in sight, gave chase, and the pirate steered for Cocos island (distant from Panama 1.000 miles, more or less, in a westerly direction), where they hastily lowered the boats to carry the treasure on shore. Two boat loads were safely landed and quickly buried, while the third boat was swamped, and its load (which was but a small portion of the whole) went to the bottom, where it could very plainly be seen through the _ All hands were soon again on board. and all sail made upon the ship. But

influence some wealthy men sufficiently to induce a search for the treasure, but was true. As the northeast end of the island (or the southwest, or some other part) is the only spot where a landing can be made, and that through a tolerably heavy surf. On the beach is a natural basin, formed in a rock by the constant dripping of water, drinkable and pure as crystal, for so many years. As the pirates were in a great hurry, they couldn't have buried the golden onzas and church ornaments very deepbut then what changes may have taken place there within a hundred years! The spot may now be overgrown with thick, tangled brushwood, and-but who can say the freebooters' treasure has not been removed long ago?

all slain but the two boys who were

again spared. They were carried to

Stanton and the President. The following is the correspondence

between the President and Secretary o WASHINGTON, Aug, 5, 1867. SIR:-Public considerations of a high character constrain me to say that your resignation as Secretary of War will be accepted. Very respectfully,

WAR DEPARTMENT, Aug. 5, 1867. SIR;—Your note of this date has been received, stating that public considerations of a high character constrain you to say that my resignation as Secretary of War will be accepted. In reply have the honor to state that public considerations of a high character, which alone have induced me to continue a the head of this Department constrain me not to resign the office of Secretary of War before the next meeting of Congress. Very respectfully. EDWIN M. STANTON.

A REMARKABLE ESCAPE.-We have not heard anything for a long time more surprising than the following facts. communicated to us by Mr. Landis Ber ry, who resides on the hill a few doors yond the toll-gate. Mary Birch, a little girl nine or ten years old, daught er of Moses Birch, living near Mr. Ber ry's has been in the habit of going to his well to draw water for her mother On Monday last she went to the well as usual, and while stooping over the curb in the act of filling her vessel with wa ter from the bucket, she lost her balance nd fell headlong into the well. Mr. Berry and family were at dinner and hearing the windlass revolving with unusual velocity, they went out and rights of the whole, and Jefferson, Mafound the little girl at the bottom of the son, and Monroe leading the column well alive and sensible, struggling to keep herself from drowning. By means of the bucket, rope and windlass, they soon restored her to terra firma, when it was found that she had sustained no injury except a slight cut over the right eye, and a triffing wound on the top of the head. The well is twenty-eight feet deep with eight feet of water in it, is walled with stone and has a diameter of only three feet. How the little thing could escape dashing her brains out in the fearful fall, or being drowned in a depth of water twice her length, is altogether astonishing and inexplicable. -Clinton Republican.

ATTACKED BY A SNAKE. - On Sunday afternoon a week, our young friend Mr. WM. Brobst, of Clinton township went to the mountain to gather a few "huckleberries" for a sick member of the family. After procuring as many berries as he desired, and had started for home, his foot came in contact with a large black snake. Instantly his snake-ship gave battle, and coiled itself around the body of Mr. BROBST. Mr. B. was of course much frightened and confused, but finally succeeded in getting his knife out of his pocket, but the spring being a very strong one he could not open it. Failing in his purpose to open the knife and cut his adversary in two, he commenced beating it over the head with the closed knife and continued to do so until it loosened its hold and dropped from his person. Feeling very sick Mr. B walked to a log near by and sat down, but in the course of a few minutes went in search of the snake again but it had made its escape into sketch of his record in the Address of the bushes. Upon an examination in the evening Mr. R. found that he had

The Agitator.

WELLSBORO, PENN'A. WEDNESDAY, AUG. 14, 1867.

REPUBLICAN STATE NOMINATION

JUDGE OF THE SUPREME COURT. HENRY W. WILLIAMS, OF ALLEGUENY.

Republican County Convention, Friday, August 16th.

A great fire broke out in Towanda nt noon of the 7th inst., destroying property to the amount of \$40,000, upon which there was an insurance of about, \$30,000.

The deuce is to pay in Lock Haven. The citizens, or a portion of them, lately met in the Baptist Church in that village and discussed the subject of temperance. Whereupon the Editors of the Democrat take fire, and describe the whole affair as a farce. They protest that they are temperate men, and would rejoice to see a temperance movement prevail; but-ah; that awful disjunctive!-but not on the eve of a political campaign. Ah, that is where the shoe pinches, is it? Temperance movedon't mix well, do they? Well; that is the fight is on a Union General, they ting the main strength of that party the truth, gentlemen, and should a temperance movement prevail in Clinton County before the election, the Republicans will sweep the field.

CAMPAIGN ETHICS.

The Tribune's comment upon the address of the Republican State Committee has excited various remark. The inference is that Gen. Butler refused to der as was their plan. January 2d, Sharswood papers cite it as a testimony to the unexceptionable character of their candidate; the Republican papers complain of it as an unwarrantable in-

unexceptionable character of Judge inied its truth. They use Ould's letter government \$182,000, was occupied Jan-Sharswood, nor as a serious interfer to batter Butler. Of course we all know uary 3, 1862. Fort Marion St. Augustnation with the conduct of the campaign that any Copperhead will sooner believe tine Island, Florida, January 7, 1862, cost \$51,000. Fort Barrancas Pensacola, by the Republican State Committee. It is of no consequence whatsoever, as It is the most natural thing in the world we look at it. Assuredly it cannot assist Judge Sharswood In the campaign. The Republicans will conduct the campaign in their own way, nor suffer the inadvertent comment of an outsider to control their action or dampen their ar-

It does not require great effort to show; conclusively, as we think, that the action and utterances of Judge Sharswood thirty years ago, touching they were overhauled before night, and | State-Rights, are quite germane to the Spain, where they lived and died. One all events, we shall make the effort, of them had several times attempted to we gite the stilling of the political

none would believe his story; and on beginning under the Constitution. A CARD FROM THE AMERICAN WATCH COMPANY

WALTHAM, MASS.

This Campany beg leave to inform the public that they commenced operations in 1850, and their factory now covers four acres of ground. and has cost more than a million dellars, and employs over 700 operatives. They produce 75,-000 Watches a year, and make and sell not less than one-half of all the watches sold in the Uni.

The difference between their manufacture and the European, is briefly this: European Watches are made almost entirely by hand, and the result is of necessity a luck of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful opera. tive must vary. But it is a fact that, except watches of the higher grades, European watches are the product of the cheapest labor of Switz. eriand, and the result is the worthless Ancres, Levines and so called Patent Levers-which soon cost more in aftempted repairs, than their original price. Common workmen, boys and women, buy the rough separate parts of these watches from various factories, polish and put them to. gother, and take them to the nearest' watch merchant, who stamps and ongraves thom with any name or brand that may be ordered.

How American Watches are Madé. The American Waltham Watch is made by no such uncertain process-and by no such incompetent workmen. All the Company's operations from the reception of the raw materials to the completion of the Watch, are carried on under one roof, and under one skillful and competent direction. But the great distinguishing feature of their Watches, is the fact that their several parts are all made by the finest, the most perfect and delicate machinery over brought to the aid of human industry. Every one of the more than machine-that infallibly reproduces every Bucceeding part with the most unvarying accuracy,-It was only necessary to make one perfect watch hundred machines necessary to reproduce every part of that watch, and it follows that every succeding watch must be like it. The Company respectfully submit their watch.

es on their merits only. They claim to make A Better Article for the Money by their improved mechanical processes than can be made under the old fashioned handicraft sys tem. They manufacture watches of every grade, from a good, low priced, and substantial article, nometer; and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensable requisite of all their watches is that they shall be GOOD TIMEKEEPERS. I should be remembered that, except their single lowest grade named "Home Watch Company, Boston," ALL WATCHES made by them

ARE FULLY WARRANTED v a special certificate, and this warrantee is good all times against the Company or its agents. ROBBINS & APPLETON, July 17, 1867-118. 182 Broadway, N.Y.

tages over any and all Sewing Ma-chines in the World: It makes four different stitches, the lock, has double lock, and double, knot, on one and the same machine. Each stitch being alike on bo ides of the fabric, Every Machine has the reversible field motion which enables the operator, by simply turning thumb screw, to have the work run either to th
