"And Brutus is an honorable man so are they all, ALL bonorable men! Mark Antony was the Artemus Ward of his day. He dealt largely in "sarkassum." He knelt at the shrine of Cleopatra ; Artemus bent before Betsey Jane. The coincidence is marked.

The ancients had several masters of irony, but none so skillful as Antony. No other Roman, at least, ever so pun-

ished a pack of assassing with complimentary phrases. And we believe no modern writer (Shakspeare exceptedand he is our tragic historian,) has succeeded in despoiling the great Roman gust, in the year of grace 1867. It is

comforting to know that he is dead and dust, and cannot behold himself as he is to-day -, the king of sarcasm dis crowned, dimmed, and damned. A CARD FROM THE AMERICAN WATCH COMPANY WALTHAM, MASS.

This Company bog leave to inform the public that they commenced operations in 1850, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 740 operatives. They produce 75, ... 000 Watches a yoar, and make and sell not less than one half of all the watches sold in the United States.

The difference between their manufacture and the European, is briefly this : European Watches are made almost entirely by hand, and the result is of necessity a luck of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative must vary. But it is all fact that, except watches of the higher grades, Enropean watches

are the product of the cheapest labor of Switt. erland, and the result is the worthless Ancres, Levines and so called Patent Levers-which soon cost more in attempted repairs, than their origi. nal price. Common workmen, boys and women, buy the rough separate parts of these watches from various factories, polish and put them to. gether, and take them to the nearest watch merchant, who stamps and engraves them Nith aby name or brand that may be ordered.

How American Watches are Made. The American Waltham Watch is made by no uch uncertain process-and by no such incom-

petent workmen. All the Company's operations, from the reception of the raw materials to the completion of the Watch, are carried on under one roof, and under one skillful and competent direction. But the great distinguishing feature of their Watches, is the fact that their several parts are all made by the finest, the most perfect and delicate machinery over brought to the nid of human industry. Every one of the more than hundred parts of every watch is made by a machine-that infallibly reproduces every succeeding part with the most unvarying accuracy .-

It was only necessary to make one perfect watch north by the Stony Fork road, on the east by of any particular style and then; to adjust the hundred machines necessary to reproduce every part of that watch, and it follows that every succeding watch must be like it."

The Company respectfully submit their watch. on their merits only. They claim to make A Better Article for the Money
