AMERIC'N WATCH MADE AT

WALTHAM, MASS. The American Watch Company, of Waltham, Mass., respectfully submit that their Watches are cheaper, more accurate, less complex, more durable, better adapted for general use, and more basily kept in order and repaired than any other watches in the market. They are simpler in

structure, and therefore stronger, and less likely to be injured than the majority of foreign watches, which are composed of from 125 to 300 picces, while in an old English watch there are more than 700 parts. How they run under the hardest trial watches can have, as shown by the following letter: PENN, RAILROAD COMPANY, OFFICE OF THE GEN'L SPERINTENDENT,

EMBROCATION. For all Diseases incident to Horses, Cattle, and Human Flesh, requiring the use of an External Application.

an External Application.

Tills new Compound, propared by a practical Chemist, having a full knowledge of all the medical virtues of each ingredient that enters into its composition, is warranted to exceed anything of the kind ever yet offered to the Public as an external application for the diseases for which it is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and those who try it once will nover be without it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by Farriers, and all who have tried it, to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse, is subject.

Many remedies have been offered to the Public under different forms, some of these are injurious, others at best of little use, and niany wholly improper to answer the purpose for which they are recommended.

A judicioua and really useful composition, free from those objections, has therefore long been desired by many gentlemen who have valuable horses, and are unwilling to trust them to the care of designing and pretended Farriers. Their wishes are at length fully gratified, by (Dr. Beale) being provailed upon to allow this Embrocation (which has proved so effectious te the various diseases) to be prepared and brought out to the public.

This Embrocation was extensively used by the Gov-

nulic.
This Embrocation was extensively used by the Government during the war. Address all Orders to DR. EDMOND BEALE, 602 South Second Street, Philadelphia, Pa. For sale by storekeepers generally. 17apr67-6m.

It makes four different stitches, the lock, knot, double lock, and double knot, on one and the same inachine. Each stitch being alike on both Every Machine has the reversible feed motion. which enables the operator, by simply turning a thumb screw, to have the work run either to the right or left, to stay any part of the seam, or fasten the ends of seams, without turning the fabric. Changing the length of stitch, and from one

kind of stitch' to another, can readily be done while the Machine is in motion. The needle is easily adjusted, and does not skip It is almost noisoless, and can be-used where quiet is necessary.

Its motions are all positive; there are no springs to get out of order, and its simplicity enables any one to operate it. .

It does not require finer thread on the under than for the upper side, and will sew across the heaviest seams, or from one to more thicknesses

of cloth, without change of needle, tension, breaking thread, or skipping stitches.

The Hemmer is easily adjusted and will turn ny width of hem desired. No other Muchine will do so great a range of work as the Florence.
At will hem, fell, bind, gather, braid, quilt, and gather and sew on a rufile at the same time. It has no springs to get out of order, and will last a life time.

Lis fully protected and licensed by Elias Towe, Jr., and our own Letters Patent.
The taking up of the slack thread is not performed by the irregular contraction of a wire coil or uncertain operation of springs. The precision

nd accuracy with which the Florence draws the

thread into the cloth is unapproached in any Sewing Machine hitherto offered in the world. We furnish each Machine with "Barnum's Solf-Sewer," which guides the work itself, and is of incalculable value, especially to inexperienced While possessing the above, and many other advantages, the Florence is sold at corresponding prices with other first-class Machines, and a careful examination will fully substantiate all that we have claimed for it, and justify the assertion we now make, that it is the best Sewing Machine in the world.

We warrant every Machine to be all that we claim for it, and to give entire satisfaction, and

will give a written warranty, if required.
