FISH.—The lovers of good cheer will Le glad to know that Bunnel's meat market is to afford fresh sea-fish at the earliest cool moment. you can get fresh fish every day. That's the way

The Daily Free Press, published at Atchison, Kansas, by F. A. Root, & Co., has been enlarged to the size of this sheet, and makes a fine appearance. We are glad to note its increasing prosper-.ity.

TABLEAUX.-The ladies of St. Paul's Church are making ample preparations for the Exhibition of tableaux, at the Court House, Wednesday evening Oct. 2. The Exhibition is in aid of the Church and Sunday School, and ought to prove a decided success.

Mr. C. N. Wetmore is agent for the sale of a new edition of the Bible, polyglott, and a new Bible Dictionary, in Wellshoro, Delmar, and Charleston. We wish him success. BAPTIST SOCIETY, The Baptists re-

siding in Wellsboro, met at the house of Chas. Williams Saturday evening last, and organized under the name and style of the "First Baptist Society of Wellsboro." They are expected soon to establish preaching at this point.

Bows for Bowse.-Mr. L. A. Sears has donated to this establishment a pail of unspeakably splendid "Sweet Bowse" apples, so tender that they melt in the mouth. The Agitator, from the proprietors down to the devil were made happy thereby.

CORRECTION. -- Unintentionally, we agglieved Mr. E. Bowen, in our notice of the destruction of his barn by fire in our issue of the 11th. A correspondent informs us that Mr. Bowen had not been attending the races, nor had he been away from home during the day. We gave the story as it came to'ue, and did not suphave that any allusion to the Oceola races would be deemed disreputable. Mr. Bowen is not a pation of races, for which we think none the less

Gypsies.-Mr. N. E. Hastings, of Chatham, writes us that a camp of gypsies has been established in Middlebury, on the banks of Crooked Creek. They have fine horses and wagons, and seem to be popular. One of the children, aged six months, died on the day of then arrival.' Probably the same band is holding forth near this village. | As to their being gypsies Athat is not very probable. It is not believed that any of that roving race of Zingaries ever crossed the sea.

THE MAZON.—Mr. Geo. W. Sears has left with us a variety of Amazonian products gathered Hiring his residence at Para. Among about as hard as east iron, and full of Brazil nuts; the cocsa bean, resembling a flattened fillert: Para oranges, large, thin-skinned, and luseious -picked in July; South American nutmegs re-embling half of a pickled butternut in appear ance, and a cross between the nutmeg and sassa-Brazilian native tobacco, in folls of an inch diameter, very dark and unco' strong. We are much obliged, but exceedingly thankful that we do not live where these productions grow.

FOR THE WEST-Among the flitters to the Great West from this region we mention Mr. John C. Root, late foreman in this office, and family; Mr. Elmer Bacon, of Charleston, and tamily; Mr. Waldo May, and family; Mr. E. Brange, of Charleston. May they all succeed. From the West-Messrs. Homer F. & Norris Fellows, natives of this village, have been visiting their parents and friends during the last few neeks. They represent business as brisk in Missour, and though invalids when they arrived, lett for the West in sturdy health. The Youngs Men's Republican Club, of Wellsboro, held its opening meeting for the campaign at the Court House 17th inst., evening. The audience was first-rate, and the ladies were well represented. The meeting was called to order by the President, John I. Mitchell, E.q., who addessed the audience in a happy, off-hand speech. He was followed by Messrs. Wilson, Niles, Smith, and Nichols, in brief but effective speaches, all of decided success and promises well for the re-

EMBROCATION.

For all Discases incident to Horses, Cattle, and the Human Flesh, requiring the use of an External Application.

an External Application.

This new Compound, propared by a practical Chemist, having a full knowledge of all the medical virtues of each ingredient that enters into its composition, is warranted to exceed anything of the kind ever yet offered to the Public as an external application for the discussor for which it is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by Farriers, and all who have tried it, to be the best application over used. This Embrecation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse, is subject.

Many remedies have been offered to the Public under different forms, some of these are injurious, others at Many remedies have been offered to the Public under different forms, some of these are injurious, others at best of little use, and many wholly improper to answer the purpose for which they are recommended.

A judicious and really useful composition, free from those objections, has therefore long been desired by many gentlemen who have valuable horses, and are unwilling to trust them to the care of designing and pretended Farriers. Their wishes are at length fully gratified, by (Dr. Beulo) being prevailed upon to allow this Embrocation (wilch has proved so efficacious to the various diseases) to be prepared and brought out to the public.

This Embrocation was extensively used by the Government during the war. Address all Orders to "DR. EDMOND BEALE,"

We Claim for the Florence the following advan-tages over any and all Sewing Ma-chines in the World:

It makes four different stitches, the lock, knot, double lock, and double knot, on one and the same machine. Each stitch being alike on both sides of the fabric. Every Machine has the reversible feed motion, which enables the operator, by simply turning a thumb screw, to have the work run either to the

right or left, to stay any part of the seam, or fasten the ends of seams, without turning the tabric.

Changing the length of stitch, and from one kind of stitch to another, can readily be done while the Machine is in motion. The needle is easily adjusted, and does not skip

It is almost noiseless, and can be used where It is almost noiseless, and can be used where quiet is necessary.

Its motions are all positive; there are no springs to get out of order, and its simplicity enables any one to operate it.

It does not require finer thread on the under than for the upper side, and will sew across the heaviest seams, or from one to more thicknesses of cloth, without change of needle, tension, breaking thread, or skipping stitches.

The Hommer is easily adjusted and will turn any width of hem desired.

No other Machine will do so great a range of work as the Florende. work as the Florence.

It will hem, fell, bind, gather, braid, quilt, and gather and sew on a ruffle at the same time. It has no springs the get out of order, and will last

It is fully protected and licensed by Elias
Howe, Jr., and our own Letters Patent:
The taking up of the slack thread is not performed by the irregular contraction of a wire coil or uncertain operation of springs. The precision and accuracy with which the Florence draws the thread into the cloth is unapproached in any Sewing Machine Litherto offered in the world. We furnish each Machine with "Barnum's Self Sewer," which guides the work itself, and is of incalculable value, especially to inexperienced While possessing the above, and many other advantages, the Florence is sold at correspond-ing prices with other first-class Machines, and a

ing prices with other first class Machines, and a careful examination will fully substantiate all that we have claimed for it, and justify the assertion we now make, that it is the best Sewing Machine in the world.

We warrant every Machine to be all that we claim for it, and to give entire satisfaction, and will give a written warranty, if required.
