But the other day who should come in but a Yankee Clock man, and what should be do but banter the Agitator for a trade of clocks. The proposition was so novel that we took it into consideration, and calling a council of two, soon traded off a cheap affair worth \$2,50, or less, for one of "Maranville's Calender clocks," one of the neatest things for an office ever invented. This clock gives the month, day of the week, hour of the day, and minute of the hour, with asomuch exactness as many of the costlier kinds. It is quite ornamental as well as useful, within the means of every business man, needs winding only once a week, strikes the hour, and costs but \$15. We can confidently recommend it to every man who is tired of counting-house almanaes and cannot afford the double and trable-priced clocks of the same sort. C. T.

It precedes the festival of Easter, instituted in monorey of the Resurrection. The religious significance of the Lenton period is obvious, as it types the fasting and temptation of Jesus Christ. The hygienic and moral significance is not so obvious to the mass of Christians. It has a philosophy, however, and a lesson to l heeded by every one. Spring, as the name indicates, is the season of quickening, the resurrection of vegetable life, and the renewal of animal vigor. Do people ever think of the beautiful significance of the Resurrection occurring in Spring this day dissolved by mutual consent. time? an aid to belief? To the philosophy of Lent :-All life is quickened, and what but yesterday apeared lifeless to-day begins to assume forms of beauty. But the effect is nowhere more striking than in the quickening of human passions and ambitions. The temptation to excess is greater at this season, and by consequence the power to resist temptation is less. Surely, realized points the necessity of some check upon this quidency to excess, and the example of the Founder of the Christian system affords it. The observance of Lent provides a corrective. No fact is better esablished than that a frugal diet tends to strength. en the moral and rofine the spiritual nature. A diet chiefly vegetable holds the passions in check

and gives freer scope to the mind and tone to the will. Doubtless this led to the forty days fast of Jesus. The teaching to the Christian world-by which we mean all who accept the Christian system, without regard to church-membership-is of self-denial, leading to a triumph of the soul over the body and its appetites. At present Lent is indifferently observed-few men and woman having self-denial enough developed to put themselves on a spare dict. On the other hand, as if to prove that religion is generally a secondary onsideration where appetite is involved, the festival of Easter is very generally observed by professors and non-professors. We question the good sense of the establishment of this festival. now in New York purchasing Spring Styles of It follows upon the heels of a profound fast; and the practical effect upon those who observe the fast is a rebound to the opposite extreme. Upon those who do not observe Lent, the effect is increased germandizing. The real good of a fast is the subjugation of appetite. The real good of a feast we have not been after to fee. -March, which came in like a lion, departed with all the modest amiability of a cosset lamb." The inspiration of its latter days found often expression in such terms as "delightful weather.!" 'Lovely day!" "Did you ever see the beat, of it?" et cetera. And people were not too extravagant in their praise. The vast body of snow, which had steadily accumulated during three months of vigorous winter, disappeared without extraordinary flood. There was little frost in the ground, and therefore a week after the ground came into Hold on, Boys!-We are sorry to sight the roads were dry and dusty. A Patent Right that is No Humbug. THE SUBSCRIBER having purchased the right of D. B. Sturdevant's Milk Shelves & Provision Rack for Tioga County, is prepared to sell Township or individual rights at fair rates.

This Rack is portable and so arranged that it This Rack is portable and so arranged that it can be taken apart and put together again in five minutes. It occupies less than four feet square of a room, and can be placed in the kitchen in cold woather, and in the cellar in warm weather, and will hold fron 72 to 84 pans of milk. The shelves are made in skeleton form so as to allow the free circulation of air all around the pans. It has been proved that milk will raise more cream, and keep from four to six hours longer than on ordinary shelves.

Each shelf turns by itself independent of the other, so that the cream of the former milking is not disturbed by the removal or putting on of pans. The frame is such that it can be readily covered with a cloth or gauze, effectually excluding insects or dust. It is a complete arrangement to dry fruit upon. The subscriber will soon visit different parts of the County with a model ment to dry fruit upon. The subscriber will soon visit different parts of the County with a model of this rack, or he can be addressed at Wellsboro, by those desiring to purchase Township or individual rights. Specimens can also be seen at the Foundry building of Sears & Williams in this Borough at any time after the middle of March. GEORGE THOMPSON.
