EARLY RISING.—It is a crime against the body and against nature unless it is preceded by a proportionably early re-tiring. It is claimed for the French women who live in the large cities, who spend three-fourths of their nights in parties, and balls and dances, and the theatre, and the opera, retiring to their beds towards daylight, that they maintain their sprightliness and vivacity, and their good looks by the universal habit, and strong determination, arising from rational principles, that under all circumstances, after having retired to bed they will remain there until they have had their full sleep out, even if requires until succept out, even it it requires until sundown. Our own experience will always tell us that if insufficient sleep is had on one night it will be followed by a day of yawning, of discomfort, of disagreeable drowsiness, and insufficiency in whatever calling, profession, or employment we may energy. All physiologists agree may engage. Ali physiologists agree that the first step towards madness i an insufficiency of sleep, whether compelled or voluntary. The babe gets free ful when its sleep is broken in upon.
That same babe if in good health, always wakes up of itself to crow and play and smile so lovingly in a mother's eye. We can better and more safely intrench upon the necessary amount of food for ten days, than abate from the requisite amount of sleep for two for the simple reason that the rest of good sleep recuperates the brain and the whole nervous system. An emi-nent biblical commentator thought to save time by rising at four in the morning, winter and summer; the result was an impairment of sight (by the sudden transition from the darkness of the closed eye, to the glare of artificial light) and general health which required many months travel abroad, and enfeebled bodily health for the remainder of life, and this before he was three-score.—Hall's Journal of Health. THE KALKENNY CATS EXPLAINED.

-A review of an entertaining volume, entitled "The Book of Cats," gives the following account of the origin of the popular tradition regarding the Kilkenny cats. In the time of William the Third, the English soldiers stationed in Kilkenny used to divert themselves with cat fights. In the course o time the, idea was evolved of tying the tails of a douple together, and flinging them over a clothes-line, leaving them to fight it out. This diversion gained such popularity that a great scarcity of cats ensued in the town and measures were taken to put a stop to the slaugh ter. So, when information reached head quarters that two cats were fighting is out on a certain line in the barracks an officer and a squad were sent to arrest the men engaged in witnessing the diversion. The culprits heard the tramp the stairs of the approaching party Quick as thought the windows of the room were thrown up, and the cats freed from each other by cutting off their tails. These suspended from the line were all that was to be seen by the intruders. "Begorra" cried one of them, as he examined the caudal remnants, "how the devils must have fought. They've just aiten each other If you don't believe it DROP IN. entirely, and left naught but their tails behind them."

A very talkative little girl used often to annoy her mother by making re-marks about visitors that came to the house. On one occasion a gentleman was expected whose nose had been acoidentally flattened nearly to his face. The mother cautioned the child to say nothing about this feature. Imagine her consternation when the little one suddenly exclaimed: Ma, you told me to say nothing about Mr. Smith's nose. Why he hasn't got any.

BRIDGET'S LEMONADE.—"Bridget! BRIDGET'S LEMONADE.—"Bridget!
Bridget! why don't you bring up the lemonade?" said Mrs. S., on the Fourth of July, from the top of the kitchen stairs. "Why, marm," said Bridget, wiping the sweat from her face with her checked apron, as she put her head round the staircase partition, "why, marm, you see the ice I put in the lemonade is so hard that it hasn't melted. onade is so hard that it hasn't melted yet, though it's stirring it over the fire I've been for the last fifteen minutes or

An Illinois paper says: "A Chicago publishing firm is about to bring out a new edition of the Scriptures, to be known as Chicago Bible, the chief feature in which will be the family record, which will be adapted to the growing wants of the west. In addition to the blanks for Marriagon Birther Posts. blanks for Marriages, Births, Deaths, &c., there will be several pages of divorce.

An exchange says that a hen has the capacity of laying six hundred eggs, and no more. Usually they lay a few the first year; from three hundred and twenty to three hundred and seventy in the part three years; and the in the next three years; and the rest from the fifth to the ninth year inclusive. The true economy, therefore, is not to keep hens after their fourth

THE man lives most perfectly whose constant happiness in the consciousness that, in doing the best that he can for himself, he is also doing the best that he can for every being that is capable of having good done to it.

The question was recently raised in a "Woman's Rights" convention as to who was the oldest female known to history. One speaker put in the claim for the venerable Antiquity, but the majority went plump for old Ante-dilu-

"My dear," said a rural wife to her husband, on his return from town, "what was the sweetest thing you saw in bonnets in the city?" "The ladies' faces, my dear."

"Father, why don't we ever see any faces at the window?" asked a son of his parent as they were passing an insane asylum. "Because their heads are all turned," was the reply.

Cold weather, and in the cellar in warm weather, and will hold from 72 to 84 pans of milk. The shelves are made in skeleton form so as to allow the free circulation of air all around the pans. It has been proved that milk will raise more cream, and keep from four to six bours longer than on ordinary shelves.

Each shelf turns by itself independent of the other so that the cream of the former milking is not disturbed by the removal or putting on of pans. The frame is such that it can be readily covered with a cloth or gauze, effectually exactly anybody might know that you are a cluding insects or pust. It is a complete arrange-ment to dry fruit upon. The subscriber will soon visit different parts of the County with a model of this rack, or he can be addressed at Wellsboro, of this rack, or he can be addressed at Wellsboro, by those desiring to purchase Township or individual rights. AMERIC'N WATCH HADE AT WALTHAM, MASS.

The American Watch Company, of Walthum, Mass., respectfully submit that their Watches are chaper, more accurate, loss complox, more durable, better adapted for general use, and more and lufate, with the west, connecting as above.

Sily kept in order and repaired than any other watches in the market. They are simpler in structure, and therefore stronger, and loss likely to be injured than the majority of foreign watches, which are composed of from 125 to 300 pieces, while in an old English watch there are more than 700 parts. How they run under the hardest trial watches can have, is shown by the following letter:

PENN. RAILROAD COMPANY. OFFICE OF THE GEN'L SPERINTENDENT, ALTOONA; PA., 15 Dec., 1866;

GENTLEMEN: The watches manufactured by you have been in use on this railroad for several years by our enginemen, to whom we furnish watches as part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable time-keepers. Indeed, I have great satisfaction asaying your watches give us less trouble, and have worn, and do wear much longer without re-pairs than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation; but us a class they nover keep time as correctly, nor have they done as good service, as yours.

In these statements I am sustained by my producessor, Mr. Lowis, whose experience extended over a series of vents. Respectfully, EDWARD H. WILLIAMS,

General Superintendent.
American Watch Co., Waltham. We make now five different grades of watches named respectively as follows:

Appleton, Tracy & Co., Waltham Watch Company, P. S. Bartlett, Waltham, Mass. Waltham, Mass. Wm. Ellery.
Home Watch Company, Roston, Mass.
Boston, Mass. All of these, with the exception of the Home Watch Company, are warranted by the American Watch Company to be of the best material or the most approved principle, and to possess every requisite for a reliable timekseper. Every deale selling these Watches is provided with the Company's printed card of guarantee, which should accompany each Watch sold, so that buyers may feel sure they are purchasing the genuine article. There are numerous counterfeits and imitations of our Watches sold throughout the country, and we would caution purchasers to be on their guard against imposition

Any grades of Waltham Watches may be purchased of Watch Dealers throughout the country ROBBINS & APPLETON. Sept. 4, 1867-9m: 182 Broudway, N. Y.

The American Cooking Stove. A FTER twenty years experience in the manufacture of stoves, we became convinced, some six years since, that a vast amount of money was being expended by the people of this country, in buying cheap and worthless stoves, a large portion of which was wasted; and that true economy consisted in buying the best stoves FTER twenty years experience in the man that could be made, notwithstanding the price was higher. With this view we proceeded to construct the American Cooking Stove, and spared no pains or expense to make it the best and most perfect stove that could be made. And TOBIAS' DERBY CONDITION POWDERS ARE the cure of Distemper, Worms, Bots, Coughs, Hidebound. Colds, &c., in Horses; and Colds, Coughs, Loss of Milk, Black Tongue, Horn Distemper, &c., in Cattle. They are perfectly safe and innocent; no need of stopping the working of your animals. They increase the appetite, give a fine coat, cleanse the stomach and urinary organs; also increase the milk of cows. Try them, and you will never be without them. Hiram Woodruff, the celebrated trainer of trotting horses, here for years, and recommends them to his them to his brought it to a higher state of perfection than Jerome Race has heretofore been attnined in cooking stoves.
