COMMON SCHOOLS.

Extracts from the Annual Report of the Superintendent of Tioga Co.

We would not have the Common School law changed to suit the particular convenience of any Borough, town, or county of the State. A very decided speciality alone, in our opinion can justify local legislation in any law which extends its beneficent provision over the whole State alike. By the judgment of many of the best educators in the country, we have already the best school law of any State in the Union. In suggesting any measures therefore calculated to improve our system of public instruction we ask no special legislation, and no alteration of the school law for the State unless in a few of the details referred to, a change would promote the good of the whole. To our apprehension the system could be worked more efficiently if—

1. The Board of School Directors were reduced to three, and they were paid for their services as Supervisors are now paid.

2. The County Superintendency were either abolished, and town Sup'ts substituted. Or some provision were made for assistance in large counties where the schools exceed 200, for the more thorough visitation of the schools.

3. The salaries of Sup'ts should be regulated by some uniform standard throughout the State.

4. To secure a greater, and more uniform attendance of the scholars, teachers should have a pecuniary interest in keeping up their schools. For this purpose we know of no method more economical for the Directors, encouraging and just to the teachers, than to contract with the teacher for a given sum per scholar, per month. This requires no alteration of the school law. It will stop squandering the public money in keeping up small schools of only half or one-fourth the scholars in the sub-district, and prevent the schools throughout the county from languishing down to a lingering death. It will tell every teacher that the pay will be according to the number of scholars, just as every private, academic, and collegiate school goes up or down. The teacher makes the school, and should be paid according to his or her qualifications, success and the work he or she has to do. The average price of tuition according to the present mode of contracting with teachers, is 82 cents per month, for each scholar. If in all except our graded schools, the mode we suggest were adopted, the very highest price of instruction per month, for each scholar, should be but 80 cents, while the most popular and flourishing schools in the county, would demand the best teachers at even less than fifty cents a scholar per month. Good teachers would be better paid. Poor ones would fly from the profession and the school money of the county would be paid where it belongs, for actual instruction given.

5. We have already spoken of a uniform tax throughout the State sufficient to keep the schools open four months as a just measure. But the wealthy counties will always fight against that. It is fourteen years since this question began to be agitated. We hope we are years off yet.

J. F. CALKINS,
Co. Sup't.

THE MIRAGE.—Prof. Loomis in his new work on Meteorology thus alludes to this curious illusion:

Mirage is an atmospheric phenomenon which produces an apparent displacement of distant objects—sometimes elevating and sometimes leaving the image erect and sometimes inverting it, as when objects are seen reflected from a lake of tranquil water. It is frequently observed on sandy plains intensely heated by the sun, especially in Egypt and Arabia. Lower Egypt is a vast sand plain, with occasional villages situated upon small eminences. In the middle of the day these villages, seen from a distance, appear as if situated in the midst of a lake, in which are seen the inverted images of houses and trees. The outline of these images is a little indistinct, often exhibiting an undulatory motion, as if reflected from agitated waters. As the spectator approaches the boundary of the apparent lake, the waters seem to retire, and the same illusion appears around the next village. Similar phenomena are common in some parts of California, and are occasionally seen in all parts of the United States.

This is explained in this way: The stratum of air becomes heated by its; this heat is partially communicated to the superincumbent strata, so that the density of the air increases rapidly as we rise above the earth up to a moderate height. The effect is similar to that produced by the reflection of a tree from the surface of a tranquil lake, and the observer is thus led to imagine the object to be surrounded entirely by water.

Mirage is produced at sea when the atmosphere is perfectly calm, and the air in contact with the water, is colder, and consequently denser than the stratum of air immediately above it; this second stratum is denser than the one above it, and so on. In such a case, an inverted image of a distant object, as a ship, may be seen with a distinctness almost equal to that of the object itself, and this image will be formed above the object.

"WE NEVER DRINK."—On the stage were seven or eight soldiers from the Eighth Maine Regiment. While at the stage-house, in Lincoln, there came into the office a poor blind man—stone-blind—slowly feeling his way with his cane. He approached the soldiers and said, in the gentlest tone—

"Boys, I hear you belong to the Eighth Regiment. I have a son in that regiment."

"What is his name?"

"John ——."

"O yes; we know him well. He was a sergeant in our company. We always liked him."

"Where is he now?"

"He is a lieutenant in a colored regiment, and a prisoner at Charleston."

For a moment the old man ventured not to reply; but at last, sadly and slowly, he said:

"I feared as much. I have not heard of him for a long time."

They did not wait for another word, but these soldiers took from their wallets a sum of money, nearly twenty dollars, and offered it to the old man, saying—

"If our whole company were here we could give you a hundred dollars."

The old man replied—

"Boys, you must put it in my wallet, for I am blind."

But mark what followed. Another individual in the room, with feelings of pride in our soldiers, immediately advanced and said:

"Boys, this is a handsome thing, and I want you to drink with me. I stand treat for the company."

I waited with interest for the reply. It came.

"No, sir; we thank you kindly; we appreciate your offer—*but we never drink.*"!

The scene was perfect—the first was noble and generous; the last was grand.

A Patent Right that is No Humg.

THE SUBSCRIBER having purchased the right of D. B. Sturdevant's Milk Safe & Provision Rack for Tioga County, is prepared to sell Township or individual rights at fifties. This Rack is portable and so arranged it can be taken apart and put together again in five minutes. It occupies less than four feet square of a room, and can be placed in the cellar in cold weather, and in the cellar in warm weather, and will hold from 72 to 84 pans of milk. The shelves are made in skeleton form so to allow the free circulation of air all around the pans. It has been proved that milk will set more cream, and keep from four to six days longer than on ordinary shelves.

Each shelf turns by itself independent of the other, so that the cream of the formilking is not disturbed by the removal or ing on of pans. The frame is such that it be readily covered with a cloth or gauze, thus entirely excluding insects or dust. It is a cool arrangement to dry fruit upon. The subscr will soon visit different parts of the County with a model of this rack, or he can be addressed Wellsboro, by those desiring to purchase Town or individual rights. Specimens can also seen at the Foundry building of Sears & Wms in this Borough at any time after the mid of March.

The American Cooking Stove.

AFTER twenty years experience in the manufacture of stoves, we became convinced, some six years since, that a vast amount of money was being expended by the people of this country, in buying cheap and worthless stoves, a large portion of which was wasted; and that true economy consisted in buying the best stoves that could be made, notwithstanding the price was higher. With this view we proceeded to construct the American Cooking Stove, and spared no pains or expense to make it the best and most perfect stove that could be made. And we have experimented with it, and carefully watched its operation for the last six years, and when an improvement suggested itself, we have at once adopted it, and we have several of these improvements secured by letters patent. In this manner we do not hesitate to say, we have brought it to a higher state of perfection than has heretofore been attained in cooking stoves. The recent improvements in this stove has added largely to its convenience and effectiveness. In all the varieties of stoves we manufacture, we study usefulness, durability, convenience and economy in operation, rather than cheapness in price, and in so doing we are satisfied we study the interest of those purchasing our stoves. For sale by CONVERSE & OSGOOD, Wellsboro, Pa. May 13, 1868.

To the Farmers of Tioga County.

I AM now building at my manufactory, in Lawrenceville, a superior

FANNING MILL,

which possesses the following advantages over all other mills:

1. It separates oats, rat litter, and foul seeds, and chess and cockle, from wheat.
2. It cleans flax seed, takes out yellow seed, and all other seeds, perfectly.
3. It cleans timothy seed.
4. It does all other separating required of a mill.

This mill is built of the best and most durable timber, in good style, and is sold cheap for cash, or produce.

I will fit a patent sieve, for separating oats from wheat, to other mills, on reasonable terms.

AGENTS WANTED FOR

THE OFFICIAL HISTORY

OF THE WAR,

Its Causes, Character, Conduct and Results.

By HON. ALEXANDER H. STEVENS.

A Book for all Sections and all Parties.

This great work presents the only complete and impartial analysis of the causes of the War yet published, and gives those interior lights and shadows of the great conflict only known to those high officers who watched the flood-tide of revolution from its fountain springs, and which were so accessible to Mr. Stephens from his position as second officer of the Confederacy.

To a public that has been surfeited with APPARENTLY SIMILAR PRODUCTIONS, we promise a change of fare, both agreeable and salutary, and an intellectual treat of the highest order. The great American war has AT LAST found a historian worthy of its importance, and at whose hands it will receive that moderate, candid and impartial treatment which truth and justice so urgently demand.

The intense desire every where manifested to obtain this work, its Official character and ready sale, combined with an increased commission, make it the best subscription book ever published.

One Agent in Easton, Pa., reports 72 subscribers in 3 days. One in Boston, Mass., 103 subscribers in 4 days. One in Memphis, Tenn. 106 subscribers in 5 days.

Send for Circulars and see our terms, and a full description of the work, with Press notices of advance sheets, &c. Address
