THE SHOOTING FISH. This very re-

markable fish is a native of the West

Indies. Nature has constructed this aquatic sportsman in a very singular

manner, but one admirably adapted to

a hollow cylindrical beak. He fre-quents the rivers on the seashore in

search of food, and from the unusual

manner in which he provides for his

daily wants he derives his name. When

this hungry gentleman espice a fly or

an insect not taking due care of him-self, but sitting joil plauts in shallow

water, he swims away to the distance

of four or five feet, and often six feet,

that he may take aim at his prey, and

when he has done so to his satisfaction,

he then with amazing dexterity and

cleverness, ejects out of his tube-like mouth, one drop of water, which is so

the water, and once there, all hope of escape is gone—the fish darts upon its prey and engerly devours it; thus sup-

plying us with another instance of the

diversified mode in which nature quali-

fies its countless millions of creatures

with the powers necessary for procur-

CURATIVE EFFECTS OF DRY EARTH.
