

HOME MATTERS.

WEDNESDAY, JULY 14, 1869.

New Arrivals... Notice... Carriage Making... Agents Wanted for Chamberlain's Law Book...

PERSONAL.—Mr. J. C. Horton has left Lawrenceville and now may be found at the office of Mr. Seymour, at Tioga.

PERSONAL.—The honorary degree of Doctor of Sacred Theology was conferred upon Rev. Charles Breck by Columbia College, at its recent commencement.

THANKS.—We are obliged to Mr. Closs, of the Round Top Cheese Factory, for a sample of cheese, as lucious as any we recollect of.

ART.—Mr. Charles Thompson has two pictures on exhibition at the Book Store, one of his own and one of a first effort, by a young lady named... We can see that Charles improves, go ahead.

GOOD ENOUGH.—Mr. P. P. Lundy, an employe of Mr. Jacob Sticklein, in this place, has just received intelligence that he is heir to \$25,000 in gold in Europe. He purposes sailing on the 28th inst., and to return in December next.

No. 30 of *Heath's Home* will contain first chapter of *The Romance of a High Young Girl*, illustrated. This paper has a high class upon high grade societies. Its contents are varied and its illustrations remarkably fine. \$4 per year.

KILLED.—A man named Patterson left a station in Blossburg one night last week, and instead of the wagon road, followed the railroad track on his way home. Next morning his mangled body was found on and near the track, his heart and intestines being scattered about and his legs severed from his body. Is incident necessary?

THE HISTORY, for July, takes on the full proportions of a Health Journal, and Communications, Correspondence, Editorials, and Clippings, are all better than last No. It contains a large dose of common sense for 50 cents subscribe for the *History*. Dr. T. S. Up. De Graf, Proprietor, Elmira, N. Y.

GOSPIP.—Louis Napoleon is a man of mark, the Emperor of France, and the marplot of Europe. He is very powerful, and has done much since the long reign of Louis XVI. He is supposed to move the world. He has subsidized, possibly, we should say subjugated—the entire press of France. He may therefore be said to preside over the spectacle, not of a thing of shreds and patches, but of a man for whom the French press has become a character. When he winks the press of the third Napoleon bows. Whatever he does is pronounced wise and good by the press. If he sneezes his greys look at Prussia the press declares that Bismarck trembles in his boots. Without the French press Louis Napoleon would be to the world what Motley would be to John Bull without credentials—an unofficial gentleman.

Nevertheless, it does not follow that every reason in need of a character should rush to some newspaper and order one. We don't appreciate the sagacity of a certain healer of the diseases which flesh is heir to, who lately sent a long string of recommendations, going to contradict a statement made by somebody, probably a rival, to the effect that he was a quack. Now that somebody packages from a dealer in patent rights who is said to be defended against a charge of stealing the credulous. We cannot publish such documents even as advertisements. Such reputations do young, not like good little boys because they are good, but because they are forced growth. Strike the letters from the press of France, and Louis Napoleon could not sustain himself a week.

We are glad to be able to state that the Central Park, New York City, is to be rendered of practical benefit. For many years its rich expanse of green have been of no use to the brute creation. It is now an elephant pasture; and we hear that the city will soon import some choice stock, such as the Abyssinian Ox, the Canadian Lion, Durban, Devon, and Alderney cattle, a few Chamois, half a dozen Arab horses, etc., all of which will be turned loose to graze in the lush fields of the Park. How gloriously shall the wild beasts exemplified, when that encounter of blood-stained shanks begin grazing there, and the low of rural scenes shall be disturbed by the click-click-click of the lava mowers. When Boston shall have utilized its famous Common, and Philadelphia its superb Squares, the idea of *the use of the world* will be triumphantly brought out. And most Wellsville lumber attend a kind of progress for a generation?

There is a man or woman who is forever borrowing from his or her neighbor; but of all borrowers I despise the newspaper borrower the most.

There are hundreds of men who like to read newspapers, but they never mean to pay for them, and depend upon their neighbors for their reader.

There are women who can well afford to furnish their kitchens with every necessary article, but they never mean to pay for them, and depend upon their neighbors for their reader.

There are men and women who borrow every book they read, and return them to their owners soiled and dilapidated, without a blush of shame.

There are men who are continually borrowing money, and sometimes forget to pay it back to the one from whom they borrowed it. For my part, I consider an habitual borrower little better than a thief.

Does the shoe pinch any of my readers? If it does, let them put it on and wear it until it becomes easy.

A JOKE ON SOMEBODY.—The *Corning Journal* of July 8, has the following account: "A Double Marriage," in which two Tioga County people figure as principals: "On Monday the 5th of July, a man and woman from Sullivan, Tioga Co., Pa., came to Corning to get married. The man was Robinson's citizen, though he was not in. One of our prominent citizens thought it a good time for a joke. He accordingly went to Corning, and in regular office to find an acquaintance, who is a regular visitor, and calling him out, he inquired of important matters, and the justice officed. On entering, he related his own case, and noticed him that the couple were ready to be married. Complacently regarding the situation, 'Justice' was equal to the emergency, and at once informed the palpating twin that it was the law of the State, and that he was to be married by legal means sanctioned by the presence of six witnesses. Immediately the number was obtained by sending for all who were seated in the audience office. They were advised of the facts and came with them countenances, holding the occasion—among them were two lawyers and a government official. Order being in Warsaw, Justice sat enthroned, and the lovers were in ecstasies at the thought that their marriage would be consummated. The 'Squire' addressed them, read the 2d paternal and maternal authority in his hands. He asked them if they had deliberated, decided to become one, and they replied in the affirmative. He then enquired if their parents were willing. (This was cast-considering that the groom and bride were each about thirty years of age.) He then informed them that as it was their birthday, he proposed to marry them by them, and requested them to join their right hands, but it was not necessary to stand up. They grasped hands, he enquired of the non if he really liked that woman? He replied that he did. He asked him if he would love and cherish her for better or for worse, and obeying her, he never set his affections upon any other woman. To all this, the man unflinchingly replied, 'Yes, I do.' Then he asked the bride if she would be true to him, and obey him, and never set her affections upon any other man. She answered, 'Yes, I do.' Then he pronounced 'I do' to love and obey, and 'I do' to be true to him, and obey him, and never set her affections upon any other man. He then pronounced them man and wife in accordance with the laws of the State, and the authority in

of one dollar, which he promptly did. The economy had been performed, and the delighted groom, on the occasion, had a very good reason for the new official said that he was in adiffidence. If they left Pennsylvania without being married, might become a serious matter for the new-made wife. He was, however, consoled with one of the lawyers, and a messenger was dispatched for Justice Robinson. The dead pair was informed by the lawyer that as there might be some question as to the constitutionality of the law, he would from Livingston County, he had sent out for Rob. Robinson to marry them over, so as to avoid constitutional questions. A few days later, the groom and his bride were united, and the groom, in due and ancient form, received the fee from Justice Robinson. As it was the first, it will be the last time that the latter will be called upon to perform this duty. "Two souls with but a single thought, Two hearts that beat as one."

LIBERTY LOCAL.—The present prospects for all kind of crops in our township, indicate a bountiful harvest the coming fall. In several weeks past, has been of such a propitious character, that it has given rise to new life to the whole vegetable kingdom. The uncommon growth of all vegetables (that have been sown) has been such, that a young animal (hog) has not been surpassed by nature for a number of years in our neighborhood; we can say with confidence, that if we were to conspire to do us damage before the gathering time will come, that the farmer will truly be rewarded in his labors. The farmers in Liberty are making rapid strides in the improvement of their farms and buildings. Their labors are beginning to display a great amount of skill and industry, and the knowledge of the business they are following; and if they keep pushing ahead their spirit of improvement in the same way, as they have done in the past, the character of the township will be second to none within the county. If not trespassing too much on the space of your column, I would not forget to give a passing notice of the improvements, and prosperity of our pleasant village. Within the past few months, there has been a great amount of building erected on Church street, for Mr. Joseph Sheffer, who has become a citizen of our village; also a new barn for Mr. John Kehler, a citizen of the place. Business matters are prospering finely in our village; Merchants and Mechanics are alive to the daily wants of their customers. In short, it is believed by citizens, that there is a greater amount of business doing in our village, than in any other of equal size in the county. O. N. S.

WEST COVINGTON LOCAL.—The fifth was duly celebrated in this place by Pic-nic, and a grand display of fireworks. The day was Mrs. A. F. Graves. About three hundred people were present. The programme was something new, and very interesting. The first order of business was the Declaration of Independence, which was read by Edg. Rockwell. The party then adjourned to the tables which were beautifully spread. After dinner an oration both pleasing and instructive was delivered by Rev. Mr. Kemp, of Canada, a very able speaker. The music was like unto all occasions, joyous and happy, long to be remembered by the little ones. Mr. John Lewis is repairing and remodeling his house. Mr. Jacob Kiphat has been adding more room to his barn in order to store his fine crops properly. Mr. J. Jennings is erecting a fine barn. It is requested that the thanks of the inhabitants be returned to the Supervisors for repairs upon the highway near the west branch of Elk Run. "CRACKS."

COVINGTON LOCAL.—Our 3d of July passed quietly and pleasantly, only a trifle too much whisky. The only accident was a case of stroke, the invalid was taken care of by his friends; he soon recovered. The festival for the benefit of the Band, was a genuine success, and exceeded our most sanguine expectations; their receipts were \$106, netting them about \$100—which speaks well for the liberality of our citizens, and the devotion of the farmers, for their donations of cream, eggs, &c., for which the 'boys' make their best bow. Crops: Hay is well under way, and is a splendid crop, better than for years; corn is doing nicely; potatoes are largely in the ground, and it has the appearance of an unusual yield; early and late growing both are doing well; oats are looking very good; the dairymen tell of unusual yields of cream. Take it all in all and there was never more promising time for farmers.

It will be of interest to many of his relatives in this county to know that Mr. Harkness, who was a next little speech, in the same way visited. This was some fifteen years ago on route to... Rev. — Tozier preached at the Methodist Church in this place on Sunday, July 4th. Thirty-five years ago he was preaching Elder in this circuit. His sermon was replete with reminiscences. Rev. G. P. Watson preached a Fourth of July sermon, with Historical allusions.

MANSEFIELD LOCAL.—O. V. Elliott has built a "barn new" fence and footwalk in front of his property on Sherwood street; it takes many shovels to make a wide fence, but steady "padding" did it. How his father and business partner, managed to turn pebbles into white paint for his residence and now upon Mainburg street, it is a fine sight to appear, but probably that is what it comes to at the "last". I have seen a dirty little mouse hatch out of a large hen, but to Mr. Mann he looks the real of an egg, a little old house hatch out a nice, large, new, white, painted dwelling. John Holden has built a new sidewalk on Sullivan. P. M. Clark is about to build a new walk on the "heralded" St., front of his property; if "thinks don't stop 'fixing up' somebody will go for it at a "figure" quite respectable. Mr. S. Sweet has fenced, and otherwise improved his property on Elmira street. The side walk in front of the Boro School house needs rebuilding very much; are the Boro fathers sleeping? On the 7th inst., Wm. Benson of Rutland was examined before Justice Beach, of this Boro, charged with selling liquor unlawfully, and was held to answer, in the sum of \$200, for his appearance at next court.

Having had commenced the crop is doubtless heavier than for many years. The "soda fountain" at the "Excelsior" drug store, keeps improving on "age" and your correspondent has either got to borrow a "quarter" for it, or to "figure" quite respectable. Mr. S. Sweet has fenced, and otherwise improved his property on Elmira street. The side walk in front of the Boro School house needs rebuilding very much; are the Boro fathers sleeping? On the 7th inst., Wm. Benson of Rutland was examined before Justice Beach, of this Boro, charged with selling liquor unlawfully, and was held to answer, in the sum of \$200, for his appearance at next court.

On the 7th inst., Wm. Benson of Rutland was examined before Justice Beach, of this Boro, charged with selling liquor unlawfully, and was held to answer, in the sum of \$200, for his appearance at next court.

TOGA LOCAL.—Tom Smith and family have moved to Saratoga. A fine crop was run up from Corning for their accommodation. Many readers will ask "who is Tom Smith?" I will answer in as few words as possible. He is the son of Mr. J. H. Smith, and was formerly a member of the same cast, but according to his own language he was "never cast to drive pigs." He left this place with a limited amount of money, and took up the business of a broker and speculator in real estate, and in a few years he was in New York City for a number of years. The Corning Board gave him a reprieve on the eve of his arrival. A very evil day came off at Harkness's on the night of the 24. It was attended by upward of a very crowd, their lively friends also enjoyed a "jubilant". In your notice of E. A. Sauer's patent which he had for the "Squire" you failed to say that it was a result of "Toga". He is also the inventor of many other useful improvements.

Notice to Collectors. ALL duplicates prior to the year 1869, not settled on or before the 1st of August 1869, will be considered as lost and no accountancy will be taken of them. J. C. BAILEY, Treasurer of Tioga County. July 7, 1869.

Dr. H. R. Phillips, SURGEON DENTIST. THE undersigned respectfully announces to the citizens of Westfield and surrounding country that he is permanently located at this place. He is fully prepared to do all kinds of dental work in the highest style of the art. Satisfaction guaranteed. Office over South's Drug Store. H. R. PHILLIPS, Westfield, Pa., June 30, 1869.

MARRIAGES. BANOCROT—HOWLAND.—In Ocoala, July 3, by N. Strait, Esq., Mr. John Banocrot, and Miss Hannah Howland, of Westfield. JAMES—WOOD.—In Jackson, July 4, by Rev. M. Rockwell, Mr. Oscar James, and Miss Carrie Wood, both of Rutland. RAMSDELL—HAMMOND.—July 3, by Elder L. H. Spencer, Mr. Charles H. Ramsdell, of Northumberland, Pa., and Miss Harriet C. Hammond, of Richmond. PLANK—WYATT.—In Olymer, July 7, at the residence of the bride, by J. C. Thompson, Esq., Mr. Sylvester Plank, of Brookfield, and Mrs. Mary G. Wyatt, of Olymer. Thus the aged delight to do, the young seem inclined to try it too.

DEATHS. CLARKE.—In Olymer, June 2, Marshal J. Clarke, aged 62 years, died on June 2 months and 8 days. CHURCHILL.—In Tiffin City, Ohio, June 14, Miss Emma Churchill, (formerly of Keosauqua, Ia.) aged 26 years. SPECIAL NOTICES. HALL'S VEGETABLE SICIALIAN HAIR RENEWER. RESTORED TO ITS ORIGINAL YOUTHFUL COLOR. It will make gray hair black, except in very aged persons, as it furnishes the nutritive principle by which the hair is nourished and supported. It will prevent the hair from falling out, and does not alter the color of the scalp. No other evidence of its superiority need be adduced than the fact that many instances of it are offered to the public. IT IS A SPLENDID HAIR-DRESSING! Our Treatise on the Hair sent free by mail. R. P. HALL & CO., Nashua, N. H. Proprietors. For sale by all Druggists. [June 16, 1869.] TO CONSUMPTIVES. THE Advertiser, having been restored to health in a few weeks, by a very simple remedy, after having outlived his hope, and after having been told that he would die, he writes the following notice, for the sake of suffering humanity, and for the sake of his own name, and for the sake of his own family, and for the sake of his own friends, and for the sake of his own country, and for the sake of his own world, and for the sake of his own universe, and for the sake of his own existence, and for the sake of his own life, and for the sake of his own soul, and for the sake of his own spirit, and for the sake of his own mind, and for the sake of his own body, and for the sake of his own flesh, and for the sake of his own blood, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of his own tendons, and for the sake of his own ligaments, and for the sake of his own cartilages, and for the sake of his own joints, and for the sake of his own bones, and for the sake of his own marrow, and for the sake of his own sinews, and for the sake of his own nerves, and for the sake of his own muscles, and for the sake of
