And his hair was as white as the loam of the sea, And these words came forth with the hine's of " I gather them in, I gather them in !" enonus. "I gather them in, I gather them in, Gather, gather, gather, I gather them in!"

I gather them in both old and young To my den of death they go and come, Some to the scaffold, and some to the grave, Some to the prison, but none I save; Come father, mained laughter and son, All will I ruin one by one. With my man or whisky, brandy or gin, "I gather them in, I gather them in!" enonus.

I gather them in to a life of shame, I phast the fairest honored name;
Make widows and orphans to cry and mean
At the foot of old "King Alcohol's!" throne,
The highest or the lowest, I cars not which, Will soon find their level in a common ditch. The law protects me, and it's no sin-:
"I gather them in, I gather them in!" enonts.

The old man ceased as he closed his till, Soon all was durk and gloomy and stall; And I said to nived as he well to his rest, "Can it be that humanity dwell in your breast?" Man may forgive you, but God never will, "Though your like often gains foot the minister's And his voice will be heard o'er the last trump's "Hell gathers you in! Hell gathers you in!"

## How Grindstones are Made.

The best grindstones are taken from the thick sheets. These stones are uniform in texture, preserve their color, and are not so hable to break or scale as the stone from these near the surface. The slabs are split from the quarry, and a man breaks them into disks or Varnishes. "paterns" of the diameter permitted by the size of the stah. The circle is cut with no other guide but the eye of the workman, but long experience has generally so trained the eye that a very good circle is produced. In this shape the patterns are loaded on a platform which is swung by the derricks up to the cars, and on them run down to the lathe shops where the remaining operations are gone through with.

On reaching the works the patterns" are placed on blocks and a square hole cut in the centre of each by hand, the centre being found by the unguided eye, or in case of less experience hands by rough measurement with the ham-mer handle. An iron centre is inserted in the whole of the "pattern," which is then mounted on the mandrel of a lather turned by steam, and the "pattern" turfied by steam, and the "pattern" commences to revolve. Two men grasplong bars of iron with tempered points, and standing one on each side of the sevolving "pattern" apply the points of the cutting bars to its periphery, and in a few seconds it is cut down to a true of role with an oven. slightly beytrue circle with an even, slightly beveled surface. Iron pegs at the side of the lathe assist

to hold the cutting bars in place and to determine the size of the circle. The bars are then applied to cut away the rough surface of the stone, leaving an even surface, dressed in concentric circles. During the operation a solid red through the operation as of the concentration as the concent flame makes the point of contact between the fron and stone for it must be borne in mind that the stone is nearly pure sliex. The cutting bars require tanhmering after turning every grind-stone, and at frequent intervals are taken to the adjoining blacksmith's

shop to be tempered.

Removed from the mandrel the stone is trundled but a contiguous shed, and the "eye" dressed smooth with a ham-mer. It is then, if small, weighed, and the weight chipped on the side by a boy with hammer and chied stones are now feady for simment, which is done by sending train loose, or by packing them in her sheads, or in small cases according to their destina-

Berea grindstones range from a few pounds for domest is use up to several hundred pounds. Most of the larger kinds, used in factories for the rougher kinds of wor's are made of coarser grit than that of Berea. Those of this kind shipped from Berea are brought from the Lake Abram quarry, and some of these range as high as three tons. Of course these are not weighed, but their appropriate, if not actual, weight is ascortained by measurement and by reference to a series of tables adopted as anthority by all the quarrymen and dealers in stone. The actual sizes and calculated weights are marked on the

WHAT EDITORS HAVE TO DO.-If we reflect upon the variety of matter in a newspaper; that the work has to be done rapidly, and cannot in many par-ticulars have the deliberation of the closet, from the very nature of the case; that, no matter what takes place, the comment must be made, the demands of the situation being as remorseless as the tide or time, moving on regardless of affection, affliction, misfortune, death-when we come to consider these things and more we might mention, all will understand that the general accuracy of the press and its general character for its literary excellence are something remarkables. That, under these circumstances, the daily press of the country makes a few blunders; mixes up dates or facts badly; kills a dead man now or then, or burles a live one; misrepresents an opponent, or too warmly eulogizes a friend; or euts other fantastic tricks is not surprising. If it did not, the gods and not men would be the conductors of the press. That it performs its general duties of chronicling the goings on of the whole world, in ideas, and makes valuable additions besides to the best of general literature, is a matter about which those growlers at the press and those pretenders in it, who could not write an advertisement for a lost puppy so that it could be parsed, had better stop to think about.

—Chicago Evening Post.

An Event will occur in 1872 which will be of very nearly as much scientific importance, as well as of interest to astronomers, as the great eclipse of Saturday last. We shall then see the transit of the planet Venus across the Sun's disc. This event occurs periodically, but at alternating intervals of remarkable irregularity the posible heige of kable ifregularity, the periods being 81 and 122½ years. After 1872, the transit will be again visible in 1889, 2002, 2011 and 2133, and so on, beyond the ken of even the youngest inhabitant now on earth. This transit will be observed with peculiar interest, since its conditions will aid in the elucidation of several questions, among others that of the exact distance of our earth from the sun. The last transit was seen in 1750.

A gentleman, after having paid his address to a young lady for some time "popped the question." The lady, in a frightened manner, said, "You scare me, sir!" The gentleman did not wish to frighten the lady, and consequently remained quiet for some time, when she exclaimed, "Scare me again."

A young lady once married a man by the name of Dust, against the wish of her parents. After a short time they lived unhappily together, and she returned to her father's house, but he refused to receive her, saying: "Dust thou art and to dust thou shalt return.

A gentleman indiscreetly asked a lady how old she was. She reflected.

"Let me see. I was eighteen when I was married, and my husband was thirty; now he is twice thirty, that is sixty; so, of course, I am twice eighteen, that is thirty-six."

TO THE FARMERS OF TIOGA COUNTY.

I AM now building at my manufactory, in Lawrence-ville, a superior FANNING MILL,

which possesses the following advantages over allother mills:

1. It separates rye, oats, rat litter, and foul seeds, and chessand cockle, from wheat.

2. It cleans flax seed, takes out yellow seed, and all other seeds, perfectly.

3, It cleans timothy seed.

4. It does all other separating required of a mill.

This mill is built of the best and most durable timber, in good style, and is sold cheap for cash, or produce.

duce.

I will fit a patent sieve, for separating oats from wheat, to other mills, on reasonable terms.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. It is the tangest religious paper in the world. Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Boecher's Sermons, which it does every week, just as they are delivered,—without qualification or correction by bim. It advocates universal suffrage; a union of christians at the polis; and the rights of labor. It has the best Agricultural Department of any paper in the world; publishes stories for the family, and for the destruction of social evils, its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly tormed the freest organ of thought in the world. Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes pone of the best papers for cavassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribors.

Send for a copy, enclosing 10 cents, to

ITHAGA WHEEL RAKE

THE undersigned, a practical farmer, is offer-ing this implement to the farming public with perfect confidence in its superiority to may other rake in usc. The teeth are oil-tempered spring steel and fully warranted not to break with fair usage. By an ingenious arrangement the loaded rake is easily discharged by a loot treadle and hand lover, and the pressure of the teeth upon the ground can be exactly gauged by the foot. Every tooth is independent of every other tooth, and the head being mossible he rake adapts itself to every inequality of it. ground. It rakes clean, is simple, strong and asting. To try it is to buy it.

I refer the public to the following persons also have the rake in use: R. Toles, Chatham; Chancy Ackley, Clymer

E. H. Stebbins, Clymer; J. W. Davis, Brookfield Isane Thompson, Kelsey Erway, Harrison Valler, Potter County.

A.M. Orders for this Rake may be addressed to me at Westfield, Tioga Co., Pn.

June 9, 1869. ISAAC PLANK, Ag't

FOUTZ'S

Horse and Gattle Powders. This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses, by strengthening and cleansing the stomach and intestines.

It is a sure preventive of all diseases incident to this animal, such as LUNG FEVER, GLANDERS, YELLOW WATER, HEAVES, COUGHS, DISTEMPER, FEVERS, FOUNDER, LOSS OF APPETITE AND VITAL ENERGY, &c. Its use improves the wind, increases the appetite-gives a smooth and glossy skin—and transforms the miserable skedeton into a fine-looking and spirited horse.

To keepers of Cows this preparation is invaluable. It is a sure pre
ventive against Rindergest, Hollow
Horn, etc. It has been proven by
actual experiment to increase the
quantity of milk and cream twenty
and sweet. In fattening cattle, it gives them an appetite, loosens their hide, and makes them thrive much faster.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs, Liver, &c., this article acts as a specific. By putting from one half a paper to a paper in a barrel of swill the above diseases will be cradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

AVING got his new Factory in operation is now prepared to fill orders for Calonel Ware promptly and in the best style of works ship. Having procured a WOODWORTH PLANER,

he is ready to dress boards or plank with disputch
