At the March term, Congress, by joint resolution, authorized the Excen- tive to order elections in the State of Virginia, Mississippi, and Texas, to submit to them the Constitutions which each had previously in Convention framed, and to submit the Constitutions, either entire or in separate parts, to be voted upon at the discretion of the Exce- cutive: Under this authority elections were called. In Virginia the elections took place on the 6th of July, 1869, the Governor and Lieutenant-Governor elected have been installed; the Legis- lature met, and did all required by this resolution and by all the Reconstruc- tion acts of Congress, and abstalned from all doubtful authority. I recommend that her Senators and Representatives, and that the State be fully restored to its place in the family of States. Elec- tions were called in Mississippi and Texas, to commence on the 80th of No- vember, 1869, and to last two days in Mississippi and four days in Texas. The elections have taken place, but the re- sult is not khown. It is to be hoped that the acts of the Legislatures of these States, when theymeet, will be such as to receive your approval, and thus close the work of reconstruction. THE QURRENCY—THE NATIONAL Disbr. ' Annong the evils growing out of the Rebellion, and not yet referred to, if is an evil which I hope will receive your most earnest attention. It is a duty, and one of the highest duties of Government to secure to the citizens of mailium of exchange of fixed unvary ing value. As the United States is the first of all nations, so, too, the people sympathize with all peoples struggling for liberty and self-government. But while so sympathizing, it is due to our honor that we should so abstain from enfore- ing our views upon unwilling nations and from taking an interest part with out invitation. In the quarrely between different 'nations, or between govern- ments' and their subjects; our course should always be in conformity with strict 'justice and law, international and local. Such has been the policy of the questions. For more than a year a val- uable province of Spain and a near neighbor of ours, in whom all dur peo- ple cannot but feel a deep interest, has been struggling for independence and freedom. The people and Government of the United States entertain the same warm feelings and sympathies for the people of Cuba in their pending strug- gle that they manifested throughout the provious struggles between Spain and the formet colonies in behalf of the latter. But the contest has at no time assumed the conditions which amoun to a, war in the sense of International in his of which would show the existence of a de facto political organization of the insurgents sufficient to justify a recognition of beligerency. The prin ciple is maintained, however, that this nation is its own judge when to accord the rights of beligerency either to people struggling to free themselve from a government they believe to b oppressive, or to independent nations a ware with each other. <sup>6</sup> The Uniter forma a government they believe to b	It having come to my knowledge that a corporate company, organized under British laws, proposed to land upon the shores of the United States, and to operate there a submarine cable, under a concession from His Majesty the Emperor of the Trench, of an 'ex- clusive right for twenty years of tele- graphic communication between the shores of French and the United States, with the very objectionable feature of subjecting all messages conveyed there- by to the scrutiny and control, of the French Government.
