THE BLESSED RAIN.—It came at last. The pastures were getting brown, corn wast "curling" badly, the streams had sunk to exiguous pools, wherein perishing fish sought in vain to evade the kinglishers and crows that ploked them up leisurely, and vines were dying in the garden. Roads were traceable for miles aways by the misty, golden line of suffocating dust that hung above them.

Then came the heavy "thunder heads" in the southwest, with the low rumble that precedes a thunder storm in the mountains; and we turned in by a little after dark, just where, we could lie and watch the vivid lighting up, and the, sudden darkening of a wooded landscape in a nocturnal thunder storm. It is a grand sight-far grander. than a storm at sea, - and we watched it for hours, with that luxurious sense of safety; and creature comfort, with which a man—safe and warm in bed-may contemplate such a picture : -and it was superb.

The wind blow a gale, the rain came down i torrents, and we have seldom seen broader, brighter, more vivid sheets of lightning; while the thunder, though not as heavy as we have heard, was very fine in tone, and exceedingly well hus-

Its articles are western items, which you may print, it is equal to twelve volumes of the subject tested. It is brought down to the present day; giving an account of Sadowa, finding of smiles and welcome from bright cheeks and and the fate of Napoleon III and the see on Hampiro.

In the department of science, it gives the result of the latest research, which adds very, greatly to its value in comparison with any other of colored; while in its copious illustrations it is onlively without a rival.

Each of us having examined the work with respect to our several department of study, do to, cheerfully and warmly recommend it, as a most valuable and reliable work; whose general use cannot fail to exercise a most important and beneficial influence. It is a successful attempt to give the American people a library for a sum which places it within the reach of all.

May 17, 1871.

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected prep-aration for restoring GRAY OR FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker, and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical Ham Dressing ever used. as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes.

Price Une Dellar. Buckingham's Dye FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty
