ACT QUICKLY

Delay Has Peen Dangerous in Harrisburg

Do the right thing at the right time. Act quickly in time of danger.

In time of kidney danger Doan's Kidney Pills are most effective.

Plenty of Harrisburg evidence of their worth.

Mrs. L. W. Moore, 825 North Third street, Harrisburg, says: "My back always felt weak and pained me almost constantly. At times sharp pains darted through my kidneys. My kidneys were weak and I had very little control over them. I felt all run down and my nerves were in an awful condition. One of my family had taken Doan's Kidney Pills and had been benefited so wonderfully that I decided to give them a trial. I am glad to say that they have done me a great deal of good. I am **still taking them and am improving** right along. Considering the condition I was in before I began using Doan's Kidney Pills, I can't help speaking a good word for them."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Moore had. Foster-Milburn Co., Props., Buffalo, N. Y. Adv.

BUYS WATER OF PENNSY

Coatesville in Dire Plight and Council Meets Secretly

Coatesville, Pa., Oct. 7.—It is costing this borough $600 a week to procure enough water to replenish the borough's supply, diminished by drought. The extra supply is being procured from the Pennsylvania Railroad Company, but it is understood that the company has only agreed to allow the town to have the water for two months, and two weeks of that time are gone.

Newspaper men were excluded from a meeting of Council Monday night after the session was called to order. This body of men has been holding many secret meetings. So that the reporters would not know the proceedings of the former gatherings, Council decided not to read the minutes, and the secretary was so advised. Then the members of the press were asked to vacate. Then Council raised the borough tax rate from 7 to 8 mills.

Council will ask permission from the State Health Department to construct a pipe line to the site of the new water works until the job is completed.

DAUGHTER DECLINES LEGACY

Wants Sum Left Her by Mother Given to Other Legatees

Reading, Pa., Oct. 7.—When the estate of Mrs. Mary A. E. M. Grant, daughter of Colonel Messchert, of Douglassville, this county, was called for audit in Orphans' Court here yesterday Mrs. Isaac Guldin Irey petitioned the Court to abate and set aside her special legacy of $5,000 in her mother's will and asked that the amount be distributed to the other legatees.

This is probably the first time that such a petition was filed in the local courts, and was the result of the statement that the estate would not be large enough to pay specific bequests after the payment of claims amounting to $4,000.

Colonel Messchert's estate, amounting to more than $2,000,000, and which includes the ground on which the Lit Brothers and Bailey, Banks & Biddle stores are erected in Philadelphia, is about to be distributed to grandnephews in Holland, according to his will.

10,000 VISIT YORK FAIR

Sixty-first Annual Exhibition Opens Most Auspiciously

York, Pa., Oct. 7.—There was an attendance of 10,000 at the sixty-first annual fair of the York County Agricultural Society, which began here yesterday. One-half of the number were paid admissions, the other half being school children and other guests of the association and exhibitors.

Judges began the awarding of $12,000 premiums for exhibits. While the displays are slightly behind those of some previous fairs, particularly in machinery, live stock and poultry, they are considered better in quality than ever before.

Perfect specimens of corn grown in the county this year are exhibits of ten years each made by the entrants in the boys' corn-growing contest.

The cattle department is not as overcrowded as last year, but there is an excellent variety of standard-bred animals. The exhibits include the Jersey herds of the Old Forge Farm, Spring Grove, and the Maple Grove farm, Ellsworth, O.; the Aberdeen, Angus and Galloways, of the Sunset View farm, Montour Falls, N. Y., and the Holsteins, of Davis Brothers, Seven Valleys. In the poultry department, Rhode Island Reds, Barred and White Rocks, Orpingtons, Wyandottes and Minoreas predominate.

MI-O-NA QUICKLY ENDS INDIGESTION

Eat Your Favorite Food and Never Fear After-Distress

There is a way for you to eat whatever your stomach craves. Many will say, "How I wish I could but I have tried and every time it nearly kills me."

The real trouble is that people who suffer the untold agony of indigestion do not realize that the stomach has a lot of work to perform in digesting the food and if crowded with extra labor it rebels and kicks up a fearful disturbance.

Mi-o-na, a simple and inexpensive prescription, easily obtained from H. C. Kennedy or any drug store, will quickly and effectively stop this disturbance or money refunded. It not only increases the flow of digestive juices, but surely and safely builds up and strengthens the stomach walls so that what you eat is cared for as nature intended.

It's needless for you to suffer with indigestion, heartburn, biliousness, sour, gassy or upset stomach, for Mi-o-na tablets surely give prompt and lasting relief and perfectly harmless. Adv.

FREE TRIAL OF SAMOSE

Flesh-Forming Food Given on Approval by Druggist H. C. Kennedy

Would you like to be fat and plump and strong and hearty? Here is a chance to do it without risking the loss of a single penny.

H. C. Kennedy, our well-known druggist, has a new treatment called Samose, which he is selling on approval, that is said to be a true flesh-forming food. It is in tablet form, retailing at 50c a box.

If it does not increase the weight, fill out the thin, scrawny form and restore health and strength, there will be no charge whatever for Samose. Go to H. C. Kennedy's to-day and get a treatment of Samose with his promise to refund the money if it does not do all that it claims.

He really gives you a free trial of the preparation, for unless it does increase the weight, it will not cost a cent. Adv.

REVIVE POISONED KIDNEYS

Man Who Took Bichloride Saved by Salt and Electric Oven

New York, Oct. 7.—The first case recorded in medical history of the kidneys resuming their functions after having been paralyzed by bichloride of mercury is that of David R. Beach, a broker, who, apparently, has fully recovered from the effects of the powerful poison taken three weeks ago. Beach was at his office yesterday.

On the night of September 14, Beach, at his home in Brooklyn, accidentally drank a glass of water in which 22 grains of bichloride of mercury had been dissolved. The kidneys became torpid the next day and the dread culmination of the effect of mercury poison was soon reached. Beach's kidneys ceased performing their functions.

Dr. Paul Pilcher and his brothers, James and Louis, injected a hot saline solution, and then put Beach into an electric oven, subjecting his body to a high temperature. In half an hour Beach began to perspire. The treatment was continued until the kidneys began to work again. Beach then entered upon a period of recovery which is practically complete.

MAP OF MINING REGION

Gold Placers on Wind and Big Horn Rivers, Wyoming

Washington, D. C., Oct. 7.—The United States Geological Survey has just issued a report on the "Gold Placers on Wind and Big Horn Rivers, Wyoming," by Frank C. Schrader. (Bulletin 580-G.)

The region covered by the report lies in the basin of Big Horn river in central Wyoming, about 40 miles southeast of Yellowstone National Park and the big game country on the adjoining part of the Continental Divide. It is just northeast of Lander, the western terminus of the Wyoming and Northwestern Railway.

An outline map of the region is contained in the report, showing localities of the tests made by the geologist in the gold-bearing gravels along 200 miles of river, mostly on the Shoshone Indian Reservation. The map also shows the settlements Riverton, Hudson, Ft. Washakie, Arapahoe, and others, as well as the surrounding mining districts and camps; incidentally it is the most complete wagon road map of the area in existence.

The report describes briefly the surface features and rock formations and besides dealing with metalliferous mining, touches upon the oil, coal, agriculture, irrigation and other industries of the region. The gold placer deposits are described somewhat in detail, including the history of their exploitation extending through a period of 50 years, with conclusions concerning their economic value.

A copy of the report may be obtained free of charge on application to the Director, U. S. Geological Survey, Washington, D. C.
