

OF INTEREST TO MOTORISTS

PAIGE

\$1195

If you investigate and compare motor car values—you will buy a Paige

Practically every manufacturer claims that his product is "best".

But we don't stop with mere "claims." We are prepared to show the points of Paige superiority—and name the extra values. We challenge the manufacturer of any other car in the Paige price class to meet us on this eminently fair basis of proof rather than claims.

You will find no other car in the moderate price field which is equipped with the large unit Gray & Davis electrical starting and lighting system with separate generator and starting motor. This is admittedly the most efficient and most expensive system that a manufacturer can adopt.

Then, consider the cork insert multiple disc clutch, Mayo radiator, Bosch magneto and silent chain drive of

camshaft, generator, magneto and pump. All of these features are the very best principles that have been developed in the entire field of automobile engineering, and the Paige is the only popular priced car which offers all of them as standard equipment.

So, keep these points in mind when you are considering the purchase of a moderate priced motor car. Insist upon the manufacturer proving his "claims." And let us repeat—if you investigate and compare motor car values—you will buy a Paige.

If you would know more about the company behind this great car—if you would learn the fundamental reasons for Paige supremacy—let us send you a most interesting booklet, "The Story of the Ten Associates."

OPEN SEASON FOR CLOSED CARS IS HERE

The above photograph shows the Sedan and Cabriolet models brought out for 1915 by the Chandler Motor Car Co.

With winter fast approaching, the big motor car manufacturers of the middle west are working to capacity turning out closed car models. This season's limousines, sedans and cabriolets mark the crowning effort of the body builder's art. The cabriolet model has become especially popular because of its adaptability to all year round use. When the top of the cabriolet is down, it resembles closely the standard runabout type, but can be instantly converted into a closed car by raising the top and the side windows. The sedan model is of the owner-driver type with fully-enclosed seats for five passengers.

RAPID TRANSIT IN AUTOMOBILE FACTORY

Monorail Car in big plant of Dodge Brothers at Detroit. This traveling crane does the work of twenty men.

When loading platforms are over a thousand feet in length, some method has to be devised to facilitate the handling of freight. Dodge Brothers, whose mammoth motor car factory at Detroit is one of the big sights to visitors, have solved the problem by the use of electricity. The above view shows one of the monorail cars which accomplish the work of twenty men in one operation. Each monorail car lifts from two to three thousand pounds and transports the load from all parts of the factory to the shipping platform.

The Keystone Motor Car Company, 1021-1025 Market street, of which Robert L. Morton is manager, has been selected to represent the new Dodge automobile, which is to be placed in the market in the near future. Dodge Brothers are widely known in the automobile industry as the

largest manufacturers of parts in the world. It is stated on good authority that they have supplied the vital parts to over 5,000,000 of the 1,250,000 cars now in use in this country. Dodge Brothers are fortunate in securing the Keystone Motor Car Company as their Harrisburg representatives.

SALES OF 1915 MAXWELLS

Tremendous Output Accomplished Through the Co-operation of the Motor Company's Dealers

The Maxwell Motor Company, of Detroit, realizes that the tremendous sale of the 1915 model has been accomplished through the co-operation of its dealers. In the past, the Maxwell Company has divided the United States into four districts with one supervisor and several salesmen in each district. This plan of division has now been changed and instead of four districts as before, there are now six zones, each having its own supervisor and one publicly representative. The zone supervisors are the direct medium between factory and dealer, while under the supervisor are the district salesmen, acting as his lieutenants. Each publicly representative cooperates with the dealers in his territory, in advertising and newspaper work. The salesmen act as direct representatives to the dealer and it is their frequent visits to the dealer which keeps him in close contact with the factory and main office in Detroit. The Maxwell Company has chosen

the one supervisors with much care, consequently, they are capable, up-to-the-minute men, and well known in the automobile world.

MOTORCYCLES FOR POLICE

All Mounted Coppers Should Have Them, Says Superintendent
Major Richard Sylvester, superintendent of police of Washington, D. C., has recommended that all mounted policemen be supplied with motorcycles. "The motorcycle has become the most effective means of accomplishing not only hurried calls for police service," says Major Sylvester, "but it has been found to be the greatest preventive against violations of law by those operating motor vehicles, especially in the suburban sections, where many unimproved roads prevent the use of bicycles. The application of the motorcycle has gone to improve general conditions in the force without an increase in the number of men employed, and I believe the members of the force assigned to mounted duty should be given motorcycles instead of horses."

The Harrisburg Hospital is open daily except Sunday, between 1 and 2 o'clock p. m. for dispensing medical advice and prescription to those unable to pay for them.

MOTORCYCLE NOTES

Four hundred and seven miles in thirteen hours is the time made by M. D. Cooper, of Cleveland, Ohio, on a recent motorcycle trip to Wellsboro, Pa.

With a membership of twenty-four, a new motorcycle club has been formed at Charleston, S. C.

Twenty-eight new motorcycles have been ordered for the police department of Los Angeles, Cal.

Eight motorcycles have been placed in service in the collection department of the Milwaukee (Wis.) postoffice.

One of the long-distance riders who attended the recent motorcycle show at Chicago was Mr. Becket, of New Orleans, La., who rode his motorcycle to the Windy City.

Officials of Balboa canal zone have ordered three motorcycles from the United States, to be used in the police and fire departments.

Frank J. Petrick, a rural mail carrier of Utica, S. Dak., says he covers about 12,000 miles a year on his motorcycle.

The health department of Rockford, Ill., is enthusiastic over the efficiency of the motorcycle used by its inspector and is contemplating buying another machine for dairy inspection work.

In four months the number of motorcycles registered in Connecticut was increased from 1,873 to 3,232.

100,000 Automobiles in Iowa
Iowa now has well over 100,000 automobiles. This is an increase of about 30,000 over last year and there is every indication that the increase will be even greater in 1915. Iowa owns an automobile for each twenty-two inhabitants.

BERRYSBURG

Mr. and Mrs. Charles Snyder Are Here on a Visit

Special Correspondence.
Berrysburg, Oct. 31.—Mrs. Walter Schwartz and children, of Illinois, are visiting Mrs. Schwartz's parents, Mr. and Mrs. Charles Lebo.

Mr. and Mrs. Charles Snyder, of Harrisburg, visited his mother, Mrs. Samuel Snyder, on Tuesday.

Mrs. Duenger is visiting her daughter, Mrs. Paul Lyter, of Harrisburg. Mr. and Mrs. Swartz and son, Albert, of Millerstown, was the guest of Mr. and Mrs. Charles Lebo for a few days.

Mrs. A. Eichelberger and daughter, Helen, of Bedford county, visited Mrs. Lena Hoover for a few days.

The Christian Endeavor Society of the Lutheran and Reformed churches held a Halloween social in the band hall Thursday evening.

Cruiser Guards Neutrality
San Francisco, Oct. 31.—The United States cruiser Cleveland arrived here yesterday from Mexican waters. It has taken station in the harbor to aid in enforcing the neutrality of this port.

AMUSEMENTS

MAJESTIC
All next week, the Myrkle-Harder Stock Co. in six of the late New York successes.
Monday afternoon and evening, "Elevating a Husband."
Tuesday afternoon and evening, David Belasco's "The Girl of the Golden West."
Wednesday afternoon and evening, "Stop Thief."
Thursday afternoon and evening, "What Happened to Mary."

ORPHEUM
Every afternoon and evening, high class vaudeville.

COLONIAL
Daily continuous vaudeville and pictures.

Seats Now on Sale
The reserve seat sale is now on for the Myrkle-Harder Company, who will be at the Majestic theatre for the entire week. Judging from the line of people at the box office when the sale opened there will be crowded houses at both performances on Monday.

This is the first time for the Myrkle-Harder Co. at the Majestic. They were prime favorites several years ago at the old Grand opera house. Times have changed since then. We are now a more progressive world, the public want better plays and better actors and in order to keep up with the times Mr. Harder has surrounded Miss Myrtle with the strongest acting cast she has ever had. The plays comprise six of New York's latest stock releases, namely: "Elevating a Husband," Louis Mann's great success which ran for one solid year in New York City; "The Girl of the Golden West," David Belasco's masterpiece; "Stop Thief," Colman & Harris' great wrook play; "The Escape," Paul Armstrong's new idea, a story of unwise marriages; "Under Southern Skies," Lottie Blair Parker's beautiful romance of the South, and "What Happened to Mary," the most interesting nautical play ever written.

Special scenery and electrical effects are carried for each of the above plays. Seats may be secured now for any or all the performances during the entire week. Adv.

At the Orpheum
There's going to be a regulation Halloween party at the Orpheum to-night in connection with the last performance of the current all-star Keith show. All kinds of surprises have been arranged for the occasion and there are reasons to believe that there will be fun galore aside from the clever vaudeville show. Patrons are invited to attend in masquerade costumes and the management will award prizes to the best creations. Beautiful decorations and many other festive schemes indicate that the Orpheum will have the biggest Halloween party in town. The crowning attraction of the bill announced for next week will be a pretentious dancing production with capable principals and a splendid chorus, elaborate scenery and gorgeous costuming, entitled "The Last Tango." Featured in this big act is an Orpheum favorite, Fletcher Norton, hailed as the Beau Brummell of musical comedy, and who delighted Orpheum audiences once before, playing the leading role in Lasky's "Antique Shop." Playing opposite Mr. Norton will be Audrey Maple, a pretty and vivacious girl, who is said to be one of the prettiest and most clever girls on the vaudeville stage. "The Last Tango" is a beautifully mounted, gorgeously costumed and tells an interesting tale that has beautiful

local and dancing interpolations scattered throughout. Adv.

At the Colonial
The tiniest actor in the world is at the Colonial, getting in all kinds of funny mixups and creating an upheaval of laughter with children of all ages. The little performer is of the team of Hayes and Alpoint, who offer one of the sterling attractions of the best vaudeville bill yet presented at the Colonial. In a delightful dancing and vocal novelty, LaSalle and Raymond are displaying the most gorgeous wardrobe ever seen at the Colonial. Four acts of sufficient merit to occupy good positions on "big time" vaudeville bills, comprise the Colonial's current show that bows for its last engagements to-day.

Beginning with next Monday the management has announced that the Colonial theatre will be converted into a popular priced vaudeville theatre, with performances every afternoon and evening, eliminating the midday and early evening picture hours. However, the same picture service will be maintained but shown only in connection with the vaudeville shows. Adv.
