## AT THE CUT-RATE MEDICINE STORE 321 MARKET STREET

### WAR!

We are not responsible for the War in Europe—but we are responsible for the War on Patent Medicine in Harrisburg. We have been cutting and slashing the prices ever since we opened our store thirty years ago. It has certainly been some battle. At the same time we feel as if our fight has been successful. We have saved our army of customers thousands of dollars during this battle of cut prices. We hope this cut-rate war will go on forever, and as long as you allow us to be commander-in-chief **WE WILL DEFEAT OUR ENEMY, "HIGH PRICES."** Our present army is not quite large enough. We want thousands of new recruits to follow our flag of low prices. This is our call to arms. Join our army for low prices and help us defeat the enemy, "HIGH PRICES."

#### ATTENDS OWN FUNERAL

Kentucky Mountaineer Makes Sure of Fitting Obsequies  
Lexington, Ky., Nov. 20.—From the Cumberland mountains of Pike county, Eastern Kentucky, comes the story of an aged mountaineer who attended his own funeral, being carried to the log meeting house to listen to the evangelist who travels through the mountains on horseback.

Judson Myerson, a mountaineer, living in one of the wildest sections, became fatally ill and feared no funeral services would follow his death. Therefore, when the doctor made his periodical trip through the hills, he requested that his funeral be held. The day was appointed and the quaint mountain people in holiday garb flocked to the log church. Myerson was much improved and was carried to the church. The obsequies, as is often the case in the mountains, were made a gala occasion. After the services a dance was held.

#### WEIGH YOURSELF BEFORE USING

Use Samose, the great flesh-forming food. The wonderful sale of this preparation since first introduced in Harrisburg and the remarkable results following its use have made H. C. Kennedy such an enthusiastic believer in the great value of Samose that he gives his personal guarantee to refund the money if Samose will not make thin people fat and restore strength and health to those who use it. This is a strong guarantee, but H. C. Kennedy has seen so many of his customers who a few weeks ago looked like walking skeletons become plump and well, through the use of Samose that he feels he cannot say too much to induce people to try it. This marvelous flesh-forming food is assimilated as soon as it is taken into the stomach, makes good rich blood, tones up the weakened system, helps to assimilate the food and makes the user plump, well and rosy. There were eighteen pheasants in the catch, a number of black and gray squirrels and also many rabbits. Stevens Point, Wis., Nov. 20.—The Rev. Louis R. Patmont, the much-missed "dry" lecturer, has been granted a divorce from his wife, Elsie, by Judge Park, in the Circuit Court of Portage county. Mrs. Patmont did not contest the allegations that "for more than a year she had failed to keep her marriage obligations," and that "she is not a fit person to have the custody of their two children, Ruth, aged 6, and Louis, aged 4." The children were given to the father. The couple were married at Newark, N. J., August 11, 1907, and have had legal residence in Wisconsin since January, 1912.

#### 500 LEPROUS IN THE U. S.

American Mission Secretary Tells of National Menace  
Battle Creek, Mich., Nov. 20.—That there are more than 500 known lepers in this country scattered over seventeen States was the assertion of W. M. Mr. Danner advocates the establishment of a national Leprosarium for the better handling of this national menace. Former President Roosevelt was given credit by the Rev. John R. Hague, of Philadelphia, for securing through diplomatic representations the admission of Protestant missionaries into the Belgian Congo and the advance of medical missionary work in Eastern Africa was reported to be gratifying.

#### DON'T NEGLECT YOUR STOMACH

If It's Upset Mi-o-na Puts It Right and Ends Distress  
If you are one of the thousands who cannot eat a simple meal without its lying in the stomach like lead, fermenting and causing painful distress, sourness and gas, do not delay but get at once some Mi-o-na—a simple prescription to be had at any druggist's—that quickly and effectively ends indigestion and corrects bad stomachs. You must not allow your upset stomach to go from bad to worse for there will surely be longer periods of food, fermentation causing greater agony, more gas, sick headache, unrefreshing sleep, "blue spells," and nervousness. A few Mi-o-na tablets are just what you need. Use them freely at the first sign of distress. Mi-o-na not only quickly ends the misery, but helps to unlog the liver and strengthen the stomach—then your food is properly digested. Mi-o-na is not only inexpensive but H. C. Kennedy sells it with agreement to refund the money if it does not give satisfaction. Adv.

Both were removed to their homes and are in a critical condition.

#### TAFT NOW MERELY WATCHING

Says He Has Infinitely Better Time as a Spectator  
Chicago, Nov. 20.—Former President Taft told reporters who sought his views on national questions yesterday that he was "sitting up in an apple tree, watching the course of events." The former President is here to deliver three lectures at the University of Chicago. "I am having an infinitely better time as a spectator than I would be having as an actor in the happenings," Professor Taft said. "I am a pedagogue now, and pedagogues are a quiet, contemplative lot, who can afford to sit back and wait for things to take place."

#### Unearth Fragments of Huge Skeleton

#### SUBMARINES MAY USE IT

Edison Battery Test Interests Authorities in Washington  
Washington, Nov. 20.—A danger which is ever present in submarines, that of asphyxiation by chlorine or other poisonous gases thrown off from the batteries, will be done away with, it is believed by naval officials, by the use of storage batteries which Thomas A. Edison has invented and which the Navy Department has begun to test. With the lead batteries now in use in submarines sea water coming into contact with the batteries is likely to cause the formation of gases which would bring death to the men in the vessel. If the tests being made in the shops at the New York navy yard with the new battery prove its worth, it will be installed on a submarine. In a month or less the value of the invention, it is said here, should be known. On account of the greater cost of the Edison battery, as compared with those now used, and the fact that no funds are available, it was said the new battery could not be put on the old submarines unless it were necessary to tear out one of the old ones.
