Verona, Pa.—"When my baby was about two months old the top of his head was covered with brown scales which turned into thick crusty scales and began to spread to the back of his head. His hair fell out until he was bald when the scales were. It must have itched and burned for baby fretful and he was very cross and he would not sleep and the scales began to run. We tried several remedies but could not cure him. Finally a friend told us about Cuticura Soap and Ointment and I immediately sent for a sample. They healed him so much that I bought the full-sized Cuticura Soap and Ointment. After using them according to directions he was healed completely in two weeks. His hair is coming in real thick now." EYE IS THE GREAT EDUCATOR

Teach Your Children to See Things and They Will Learn More Quickly

Children should not be required to learn through the ears at an age when they ought to be learning only through the eyes.

The eyes are the greatest means of education. No animal except man has any other education except that which is gained through the eyes.

The Star-Independent is presenting to its readers an "eye-teaching" Bible which contains more than 600 pictures applying directly to the verses which they accompany.

Heretofore the word "illustrated," as applied to a Bible, meant merely a few allegorical "pictures" of Biblical events taken from any source and "conveniently" placed in any part of the books, merely as embellishment inserts, but not directly alongside and explanatory of the verse intended to typify or make plain; but our publishers, at an outlay of \$50,000, have prepared accurate illustrations descriptive of the reading matter which they accompany, and placed directly next to the scene described—the only place it can be looked for or found quickly, the only place the illustration is a help to you—making this the only really illustrated Bible.

In addition to these eye-teaching text pictures, there are also numerous full-page color plates from the world-famous Bible collection, and those are properly placed in the chapters or sections which they so magnificently illustrate, showing also the particular verse portrayed.

You will enjoy this Bible, whether you belong to church or not, for its "eye-teaching" pictures make it of rare educational value to all, both young and old. Call at this office and examine these Bibles. Compare them with any you have ever seen before. Both Protestant and Catholic to select from.

LANCASTER TOBACCO MARKET

Crop Will Be Late in Selling and Stripping Is Not All Done. Lancaster, Nov. 30.—After the rains that broke the 12 weeks' drought it was reasonably supposed that Lancaster county's new tobacco crop would be speedily stripped and that the buying of the crop would then begin, grower and packer having all along declared that there would be nothing doing until the tobacco was stripped.

Much to the disappointment of everybody concerned in the tobacco industry, stripping has not become general, for the very sufficient reason that a large percentage of the crop is not ready for stripping. It has not cured yet, late as it is, because it was held back by the long dry spell. While the bulk of the crop has colored well enough, a great deal has taken on a dirty yellowish tinge that will materially lessen its value if it holds that color until cured.

The growers believe that the later curing process will improve the tone of the leaf, but the packers do not think so. The last week a few crops were sold around Maytown for 9 1/2 cents a pound, but it is not believed this is a true indication of the price that will prevail this season. The various farmers' associations are impressing upon the growers the necessity for holding out for prices above 10 cents a pound, one organization even declaring that 15 cents must be paid, but the packers declare they will be unable, because of present market conditions, to pay as much as 10 cents a pound.

Under the present outlook, the tobacco will be very late selling. It is a matter that greatly concerns the business interests of Lancaster and every town in the county, as the sale of the crop would turn loose at least \$2,000,000 in ready cash.

KILLS WIFE AND HIMSELF

Murder and Suicide of Couple From Philadelphia. Binghamton, N. Y., Nov. 30.—Stanley Bronson, 32 years old, colored, of Philadelphia, shot and killed his wife, Josephine, 24 years old, with a bullet through the brain, then fired a bullet through his own head, while they were on West State street, Ithaca, Saturday night. Returning to Ithaca, he demanded money of his wife, and her refusal resulted in the shooting. The couple are survived by one child, 4 years old.

WHAT CATARRH IS

It has been said that every third person is troubled with catarrh in some form. Science has shown that nasal catarrh indicates a weakened condition of the body; that the secretion of the mucous membranes are quickly affected, and local treatments in the form of snuffs and vapors do little, if any good. To correct catarrh you should treat its cause by enriching your blood with the oil-food in Scott's Emulsion which is a medicinal food and a building-tonic, free from alcohol or any harmful drugs. Try it. 14-73 Scott & Bowne, Bloomfield, N. J.

HAWAIIAN VOLCANO ACTIVE

After Long Period of Quiet, Mokuweewe Is Again in Eruption. Honolulu, Nov. 30.—Mokuweewe, the great summit crater of Mauna Loa, the most spectacular of Hawaiian volcanoes, is again in eruption after a long period of quiet. It was believed to have become extinct. Lava is rolling down the mountainside. Mokuweewe crowns the huge, bald dome of Mauna Loa at an altitude of 13,600 feet. Its diameter of 12,400 feet, more than two miles, makes it one of the largest craters in the world. Further down the flank of the mountain is the crater Kilauea, at an altitude of 4,400 feet, which is in a state of sub-acute activity. The present outpouring of Mauna Loa can do no damage until it reaches the timber line, 4,000 feet below the lip of the crater.

FORGING WORKS TO REOPEN

Orders for Allies Sets Wheels in Motion in Northumberland Plant. Northumberland, Pa., Nov. 30.—Northumberland Forging Company, this borough's biggest industry, which has been closed down nearly all of the time since the war started, yesterday announced that work would be resumed in full to-day and that it probably would last all winter. This is due, according to Timothy O. Vanalen, general manager of the plant, to the sudden renewal of the war business. Big orders for wagon parts, heavy fifth wheels and small wagon iron for use in the allied armies, have resulted in these orders, which the men say means Christmas cheer for them. This industry employs 30 per cent. of skilled laborers in its 400 hands.

SLAIN MAN PHILADELPHIAN

Identified by Brother-in-Law as Barber Who Had Sold Shop. Huntingdon, Pa., Nov. 30.—Positive identification of the victim of the murder mystery, whose body was found in the woods near Mapleton, Thanks giving morning, was made yesterday. Joseph Pagnotto, a general contractor at West Chester, came here, viewed the body and recognized his brother-in-law, Vincenzo Gallaccio, 33, 125 Passayunk avenue, Philadelphia. Gallaccio had until November 1 owned a barber shop in Philadelphia. He sold his business place and left there November 10 to seek a new place of residence. Knowing that he had considerable money from the sale of the shop, it is believed fellow countrymen lured him here, slew him for his money and they deposited the body in the woods near Mapleton. The murder was likely committed last Monday night, at which time Gallaccio had between \$300 and \$400 on his person. This, together with a gold watch and chain, was missing when the body was found. The murdered man had lived in this country ten years. His wife and a 20-month-old daughter live at the Philadelphia address. His body was shipped to West Chester last night, to the home of his brother-in-law.

GEN. JOFFRE WELCOMES SCRIBES FOR FIRST TIME SINCE OUTBREAK OF WAR

Paris, Nov. 30, 5.45 A. M.—A representative of the Havas Agency, together with a party of Paris newspaper men, has been received by General Joffre at his headquarters. This is the first time since the outbreak of the war that the commander-in-chief has consented to see the press. In describing the Havas correspondent says: "The officer from which the general directs operations is in a public school in a small, quiet town. There is no undue stir or bustle in the little streets and a stranger would never suspect the presence in this modest place of the head of the allied armies. "General Joffre's private office is on the first floor of the school building. The correspondents were at once shown up and as they entered the general rose from his desk and stood in the middle of the room. He was in undress uniform, with top boots and tunic, but wore no decorations. "He was just as all Frenchmen picture him. His features reflect the character of the man in every line, showing a combination of energy and goodness, gentleness and firmness. The formidable cares and anxieties of the past four months of war have not aged his countenance nor bent the athletic frame. His whole personality breathes physical and moral vigor in the highest degree. "I am happy to welcome you, gentlemen," he said. "Your tour will, I hope, enable you to correct certain errors which the Germans are busily disseminating in the public mind. You will carry back with you, I do not doubt, a good impression from your visit to the armies. "We began to congratulate him respectfully on the military medal conferred on him by President Poincare. He interrupted hastily: "That is of no importance at all. What matters above everything is to save the country. "The general pronounced these last words with such an accent that each of us in his own mind added: 'And he will save it.'"

The number of unemployed is increasing. All wish for peace as quickly as possible. Transylvania will go to Roumania, Hungary will be a kingdom in itself and south Austria will be divided between Serbia and the Slav states. Trieste and Trentino will go to Italy and all the German provinces, including Bohemia, will go to the German confederation, for the German empire intends to claim, it is said, this province as compensation for the provinces Germany may have to give up in East Prussia and Alsace and Lorraine.

WITH GERMAN VESSELS IN OTHER WATERS; BRITISH COLUMBIA FEELS RELIEF

Seattle, Wash., Nov. 30.—With all five of the German cruisers in the Pacific accounted for in Southern waters, the British Columbia cities of Victoria, Vancouver and Prince Rupert have recovered from the feeling of uneasiness which prevailed when the Scharnhorst, Gneisenau, Leipzig, Dresden and the other German cruisers were reported as being in North American waters. The Leipzig was sighted as far north as Cape Mendocino, Cal., August 19, and then headed for South America. This is the nearest approach of a German cruiser to British Columbia since the war began. Reports of naval engagements in the North Pacific persist, but are pure invention, according to British naval authorities. The British patrol of the coast continues, with the powerful Japanese cruiser Izumo off California, the large British cruiser New Castle, moving along the Oregon and Washington coast and the Canadian cruiser Rainbow, guarding British Columbia. The liner Proteus, renamed the Aid, and the tramp steamer Banksdale, are coal carriers for these three patrol cruisers. There are coaling stations at Esquimaux and at a harbor on the west coast of Vancouver Island. There are two submarines at Esquimaux. Broughton Channel, north of Vancouver Island, has been closed and mined and is commanded by shore guns. The lights have been extinguished. The approaches to Victoria have been mined. At a large camp near Victoria volunteers have been drilling for several months. The only excitement in Victoria recently was caused by a patrol in Esquimaux firing on a rowboat containing four men. The boat was sunk and the men, who were foreigners, were picked up. Newspapers were forbidden to mention the incident and one version was circulated to the effect that the men had planned to dynamite the naval station.
