Rupture holding Lock it really is. If it does not prove all we claim after the required test, it will not cost you a cent.

The Real Secret of Healing Rupture

To successfully co-operate with Nature in the work of healing, the supporting devices must be so constructed that the rupture-retaining part overlaps and draws together the breached opening instead of pressing directly into it.

The trusses of to-day are sadly lacking in this quality. They nearly all have that direct pressure point by the safe and shortest possible route. That it has succeeded is best told by the thousands who are now singing its praises in every corner of our land. This is the **Rupture Lock** that you get on a 30 Day Trial.

The "Schulling Rupture Lock"

Is a handicap. If you don't realize it now you will sooner or later. It never gets well of itself, but gets worse from time to time. It will eventually untie you for work and life's battles. It positively grows dangerous—think of the hundreds of people that yearly sacrifice their lives to strangulation.

The past has proven that the old-fashioned antiquated truss and appliance won't help you—it can't; its construction is all wrong. A new star of hope has arisen for the ruptured—a natural outcome from the deficiencies of the past. There is hope, joy and comfort awaiting you.

The "Schulling Rupture Lock" is a wonderful invention for ruptured—the outcome of years of study, hard work and diligent research. It is away from the old lines of truss construction, and holds the rupture exactly the way Nature intends, so that she may heal the opening without interference.

Guaranteed to Hold Sent on 30 Days Trial

In wearing my Rupture Lock you have absolute protection at all times. You may do any kind of work and get in any position under any condition. We will prove this by a 30 DAY TRIAL. That's the length of time you should have. A few days trial can never bring out the merits of any article. Thirty days is the only fair way. That's why we insist, to give it the full, real test so you may appreciate what a perfect

WORLD COTTON CONSUMPTION

Estimates Being Prepared by Treasury and Commerce Departments

By Associated Press.

Washington, Dec. 5.—Representatives of the Treasury and Commerce Departments continued today the work of preparing estimates of the world's cotton consumption next year.

The committee had before it for consideration cable reports furnished by American consuls and commercial attaches giving estimates on the cotton consumption from various European and South American countries.

The committee also is working out plans for the shipment of American cotton to Germany and Austria where there is a tremendous demand at prices ranging from 14 to 18 cents. The principal difficulty at present is facilitating the movement of cotton to these and other European countries however, according to the committee apparently is the question of the high rate of marine insurance thereon. When Congress convenes attempts will be made to amend the war risk law to provide government insurance on shipments to belligerent countries when these shipments include articles such as cotton which have been declared non-contraband.

The Harrisburg Polyclinic Dispensary will be open daily except Sunday at 2 p. m., at its new location, Front and Harris streets, for the free treatment of the worthy poor.
