Storage Foods

Just now the value of our vegetables is not decided so much by their nutrition as by their keeping qualities.

The ordinary family is but little disturbed by the keeping qualities of vegetables and fruits.

But now and then a box or a barrel of apples is sent in from the farm or a bargain is found in a large quantity of vegetables.

In keeping winter fruits and vegetables the greatest care is necessary. Only the outer covering or the skin protects the food from the air.

PLAN TO FEED STATE GAME

Commission Explains Method by Which Money Will Be Spent When Properly Appropriated

The State Game Commission, considering that the money that may be appropriated to its use for feeding game in winter will come from the hunters' license fund, announces that every dollar appropriated for the purpose will be spent for the benefit of those who contribute to the fund, and to this end will supply feed for game as follows:

First—To game birds and animals on State game preserves, whereon no one can hunt at any time for any purpose. These preserves are surrounded by a single wire, a fire line and a line of notices. Game comes and goes at pleasure, and may be taken by sportsmen outside of this sanctuary during the open season for such game.

Second—To game on State lands, whereon it may be taken during the open season.

Third—To game on private property, either wholly protected or entirely open to all legitimate hunters.

Fourth—If private lands are posted and no one permitted to hunt thereon at any time, we believe the game thereon should be given every help possible so that it may increase to the utmost and overflow into the surrounding country to the benefit of sportsmen, just as it is done on the preserves on State lands.

"If the land is open to all hunters, we will feed the game, but we feel that not one cent of this money should be applied to the feeding of game on lands posted against the ordinary hunter but open to the owner of such lands or his friends. Experience teaches us that many people will try to secure a part of this fund for personal private profit, and we will surely be imposed upon unless you who are interested help us to protect your interest.

SICK SAILOR RELATES HIS NORTH SEA EXPERIENCES

Correspondence of the Associated Press. Liverpool, Nov. 24.—The hospital ship China chartered by the British admiralty, put into Liverpool yesterday with about two hundred sick sailors collected from various warships in the North Sea.

Some were in rather bad condition and had to be carried on stretchers to the waiting ambulances, but the majority were able to walk. From one of the convalescents a small idea of their life in the North Sea was gathered. He said:

"We are getting all night in the North Sea. It is beastly cold out there but we don't mind. At times life is a bit monotonous, but we bear it all nicely.

"Some of our vessels had a look more than once at the German ships and if they would only come out we could settle the whole lot quicker with our big guns. The Germans do not touch our big ships, but only the smaller ones. We give chase to their submarines when seen and make them clear off, though mishaps will occur. There are not so many German submarines about as people think. We have plenty of sleep, good food and hard watching and cruising."

"Some of us have had a glimpse of Heligoland, but the atmosphere was misty and the place lies low. Some of our destroyers looked in to see what was going on but owing to the torpedo nets they could not go far enough to do damage."

SAMUEL A. DALEY DIES Was Superintendent of Altoona Municipal Water Works

Altoona, Dec. 7.—Samuel A. Daley, water superintendent, died yesterday, aged 53. Six months ago he was stricken with apoplexy and had been in the hospital ever since.

He had been the head of the municipal water department for twenty-eight years, and it was largely due to his efforts that a water system valued at more than \$2,500,000 was evolved out of nothing. A wife and son survive.
