ARMY RATION'S HIGH COST

Will Require \$130,000 More to Feed U. S. Soldiers Next Year

By Associated Press.

Washington, Dec. 14.—The cost of the American army ration has increased to such an extent on account of the European war that it will cost \$130,000 more to feed the soldiers during the coming year than during the present year. Even the price of horse food has so increased that \$100,000 more must be paid next year for army forage than this year.

These are some of the results of the war affecting the army which to-day made their appearance. The navy also is affected. The war freight rates have made it impossible for the navy to meet out of its appropriations the cost of sending coal to its various stations. Congress will be asked to authorize the use of the money ordinarily spent in paying freight rates on coal for the maintenance of naval colliers to be used instead of commercial vessels for the purpose.

SHAM BATTLE WITH BULLETS

Held in Texas Last Month With Satisfactory Results

By Associated Press.

Washington, Dec. 14.—A sham battle with real ball cartridges in place of the usual blanks was staged by Brigadier General Pershing down in Texas last month with remarkably instructive and satisfactory results. The battle was on a large scale, participated in by the Sixth, Sixteenth and Twentieth infantry, one squadron of the Fifteenth cavalry, one battalion of the Sixth field artillery and Company I, signal corps.

Out on the prairie near El Paso these forces attacked the enemy, supposed to consist of two regiments of infantry and two battalions of field artillery. But the position of this force was outflanked by a great number of targets, more than 800 silhouette figures, representing soldiers, and electrically controlled, which received the impact of about 100,000 ball cartridges. Certain important defects in organization and equipment were developed and although the exercise is said to be of incalculable value in an educational way.

Considering the other matters it has to worry about a transatlantic liner is liable to run right through an iceberg without stopping.
