TALKS ON CHRISTIAN SCIENCE

Virgil O. Strickler Explains Tenets of That Church to 1,000 in the Majestic Theatre. One thousand persons in the Majestic theatre last night heard Virgil O. Strickler, of New York City, give a lecture explaining the teachings of the Christian Science Church. Mr. Strickler was introduced by Roy E. Bignall, of Harrisburg. The talk was under the auspices of the Christian Scientists of Harrisburg. Mr. Strickler said, in part: "Christian Science makes available as a present right and possibility man's inheritance as the son and heir of God by showing that the real man created by God is spiritual and not material; that his life, continuity, intelligence and harmony are in spirit and not in matter; that all of his qualities and attributes are derived from Spirit, and that every function of the real man is governed by the divine Mind. "Man, therefore, expresses the divine nature, and hence he is the image of God, and as such is perfect and immortal. The material man is not the likeness of God, for matter cannot be the image of Spirit. He is the false concept of man, and the sin, disease and death involved in this false concept will disappear as false mortal beliefs are dissolved by truth. The material belief must give place to the spiritual fact in every case. "Out of the amplitude of her own spiritual understanding Mrs. Eddy has translated into human language the truth about God and man, and their relationship; has revealed a perfect divine Principle that governs mankind, and has proved that the truth taught by Jesus is scientific and may be demonstrated to-day as of old to deliver the sinner, sorrowing and suffering from their oppressors, to set all mankind free from bondage of evil, and to establish the kingdom of God on earth."
