# STEEL TRADE DRIFTS INTO **NEW YEAR VERY OUIETLY**

Buying Liberal in Comparison With Previous Month-Mill Operations This Week Show Better Schedules Than Those of Holidays

New York, Jan. 8 .- 'The Iron Age says the steel trade has drifted quietly into the new year. December buying in bars, plates and shapes was liberal alm from your druggist now. Apply little of this fragrant, antiseptic; ealing cream in your nostrils. It pentates through every air passage of the ead, soothes the inflamed or swollen uncous membrane and relief comes in the swollen amount of covering at lower figures. amount of covering at lower figures.

Mill operations this week have naturally shown rather better schedules

urally shown rather better schedules than those of the holidays, but the increase is not pronounced.

Actual and prospective buying by the railroads has had a good deal of publicity, particularly as to rails. A 40,000-ton order has been placed by the Louisville & Nashville with the Tenerace Company. The Pere Mar.

40,000-ton order has been placed by the Louisville & Nashville with the Tennessee Company. The Pere Marquette has bought 10,000 tons and the Reading has placed some business, including 2,500 tons at Pittsburgh. The Pennsylvania order is expected to be placed soon and the New York Central is making up its requirements.

Much has been made in current news of the few rail contracts thus far placed, but 170,000 tons was bought by two lines at the opening of 1914.

The Pere Marquette order has been widely advertised as going to a Canadian mill. Its tariff phase is interesting, since \$25 at mill, or \$26.50 at 1 lower lake port, was charged for the rails to be delivered in the United States, while \$30 was the mill price on the Canadian part of the order. Canada's rail tariff is \$7. Another Central Western road, which earlier in the year had a low price from the Ontario mill, but did not buy there, is understood again to have Canadian mills.

The report of a purchase of 10,000 tons of Canadian mills by an eastern road lacks definite confirmation.

Probably 250,000 tons of rails are now under consideration, as against 300,000 tons referred to in the same way in the market reports of the first week of 1914.

Some good spike contracts have been closed at Pittsburgh, including 20,000

Some good spike contracts have been closed at Pittsburgh, including 20,000 kegs for the Pennsylvania Lines West and 10,000 kegs for the B. & O. Two 1,000-car inquiries have come up in the Middle West. These cars were conditionally placed some months ago, but could not be financed.

Middle West. These cars were conditionally placed some months ago, but could not be financed.

More activity in new structural work is reported in districts apart from the East and fabricators look for some improvement. The Pennsylvania railroad is taking hids on a part of its bridge steel requirements for 1915.

The Steel Corporation's new orders in December averaged close to 30,000 tons a day, figuring in tin plate and other long time contracts. Its shipments were well under that figure, so that a very considerable increase in unfilled orders will be reported.

Pig iron production in December was 1,515,752 tons, or 48,896 tons a day, as compared with 1,518,316 tons in November, or 50,611 tons a day. On January 1, with 147 furnaces in blast, the active capacity was 48,848 tons a day, against 48,464 tons a day for the same number of furnaces on December 1. Six furnaces blew in and six furnaces blew out in the month.

The production of coke and anthractic pig iron in the second half of 1914 was 10,647,737 gross tons. In the first half the production of all kinds, of pig iron was 12,536,094 tons. Estimating charcoal iron in the second half at 115,000 tons, the total for the year is about 23,300,000 tons, as against 30,966,000 tons in 1912.

Court Said They Shouldn't

An anusing instance of legal sharp practice is set forth in the annals of Westerly, R. I. It occurred a hundred years ago, when, it seems lawyers were quite as adroit at quibbling as certain of their successors are to-day.

A farmer of broken fortunes hired for cuttivation a piece of land, agreeing to pay for the use thereof with a certain preportion of the crop. He planted potatoes and had an unusual degree of success. Being without a storeroom, he obtained the consent of a neighboring landforder and deposited in the Peninsular war two brother officers came across his apparently lifeless body.

"Poor Hay! He's gone at last," said one named Winsor.

A faint voice came from the ground, "I'll lay you a hundred he's not." His death seemed only a question of minutes, but he continued, "Enter the bet, and you, Marston"—addressing the other officer—"be witness."

Excess of Hydrochloric

Undigested food delayed in the stomach decays, or rather, ferments the same as food left in the open air, says a noted authority. He also tells us that Indigestion is caused by Hyper-acidity, meaning, there is an excess of hydrochloric acid in the stomach which prevents complete digestion and starts food fermentation. Thus everything eaten sours in the stomach much like garbage sours in a can, forming acrid fluids and gases which inflate the stomach like a toy balloon. Then we feel a heavy, lumpy misery in the chest, we belch up gas, we cructate sour food or have heartburn, flatulence, water-brash or nausea. Undigested food delayed in
