Philadelphia, Jan. 28 .- The Pennsyl vania Railroad yesterday declared its regular quarterly dividend of 1 1-2 per cent. on the stock, and almost sim-

regular quarterly dividend of 1 1-2 per cent. on the stock, and almost simultaneously it was announced that the company had sold to Kuhn, Loeb & Co. of New York, \$49,00,000 consolidated mortgage 4 1-2 per cent. bonds, due August 1, 1960. The dividend action and the comparatively favorable terms on which the railroad was able to float the bond issue created a favorable impression in financial circles.

Although not officially stated, it is understood the bonds were sold at a net price of par, thus making the money cost the railroad 4 1-2 per cent. per annum. Seven years ago the company sold approximately \$40,040,000 4 per cent. bonds, running for 40 years, under this same mortgage, at 92, making a net interest cost of about 4.42 per cent. It had been expected that a larger advance in interest would be necessary at this time. The new bonds were quoted at 105 5-8 bid on the New York curb late in the afternoon.

late in the afternoon.

It was stated at the general offices of the Pennsylvania Railroad that the bonds which have been sold constituted part of the new financing on which shareholders are asked to vote at the annual meeting in March. The proceeds will be used in part to retire the \$87,000,000 convertible 3 1-2 per cent. bonds which fall due next October.

With the sale of these bonds the consolidated first mortgage on the main line of the Pennsylvania Railroad is closed for the time being, the limit being \$100,000,000.000. The mortgage is dated July 1, 1873, and prior to this loan there had been issued under it \$55,500,000 bonds, but through sinking funds this amount had been reduced to \$51,000,000, making \$49,000,000 available to be issued. The mortgage is a perpetual one, so that when bonds mature new ones may be issued under it up to the limit of \$100,000,000. There are now outstanding under it approximately \$5,000,000 5s due in 1919, \$2,584,000 4s due 1943, \$4,491,000 3 1-2s due 1946, \$39,400,000 4s due 1948 and the new \$49,000,000 4s due 1948 and the new \$49,000,000 4s due 1948 and the New York State Railways. These bonds are \$7,400,000 ferie and Jersey first mortgage 4s and \$6,000,000 Genesee Railroad first mortgage. Both issues are owned by the Erie Railroad, and by their sale it is planned to pay off \$6,000,000 notes maturing March 1, \$2,500,000 due April 1 and \$4,550,000 additional notes due April 1, which it is expected will be extended two years. If the plans are carried out, they will clean up the floating debt and funded loans coming due for two years.

The New York State Railways Company, it was announced, sold to J. P. Morgan & Co., \$2,923,000 first consolidated 4 1-2 per cent. bonds, being part of an authorized \$50,000,000 issue, of which \$15,671,000 will now be outstanding.

POLITICS IN BANK COLLAPSE

Greene County Institution Said to Have Figured in Postoffice Fight Waynesboro, Jan. 28 .- The Farmers

and Merchants' National bank of Mount Morris has closed its doors indefinitely by order of the board of directors. The bank's capital is \$25,000

and its deposits total \$350,000.

The failure is said to be due to a political fight and not to the collapse of the Uniontown institution controlled J. V. Thompson. The fight grew out examinations for the postmaster-

Miss Mary Arrison, a school teacher, took the examination and obtained the highest percentage. She resigned her position as school teacher and made arhighest percentage. She resigned her position as school teacher and made arrangements to take charge of the post-office, when it was ascertained that her papers had been declared void and she was told to take a re-examination. She did so, but was beaten for the place.

The residents of the village took sides and factions formed. The bank officials, it is said, were favorable to Mrs. Morris Hatfield, the successful candidate, while many of the residents took the side of Misss Arrison. About four months ago many of the depositions began drawing their money out of the heart.

ADULTERATION OF OATS

Grain Shippers and Dealers Warned By Government That Two Common Practices Must Cease

Washington, D. C., Jan. 28 .- Seventy-five car loads of oats intended for export have recently been seized by the federal authorities because they were federal arthorities because they were found to be adulterated within the meanings of the food and drugs act. The adulteration charged is the addition of feed barley or water or both. Under certain circumstances adulteration in these ways may be so profitable that it is believed to be at times a common practice among grain shippers. The government, however, is determined that the practice shall cease at once, and field representatives of the Department of Agriculture have all been instructed to exercise the utmost vigilence in detecting future shipments adulterated in this way.

Low grade barley which is known to the trade as "feed barley" is sometimes mixed with oats when there is sufficient difference between the prices of the two grains to make this profit-

sufficient difference between the prices of the two grains to make this profitable. This "feed barley" is the product which remains after the best grade of the grain has been separated and removed for malting purposes. It contains material percentages of weed seeds, foreign grains and dust, and the addition of oats of such a product is held to be a violation of the food and drugs act. The addition of water to oats arises from the fact that the grain is sold by weight. Investigations of the Department of Agriculture have revealed the fact that water is sometimes added in the amount of from 2 to 4 per cent.

Public Hearing on Question of Pro hibiting Importations of European Pines

Washington, D. C., Jan. 28 .- Beause of the danger to American nur ery stock a public hearing will be held February 2, 1915, at the Department of Agriculture to discuss a proposed quarantine on the importation of all pines from Europe. During the past year imported pines have been found to be infested with the European pine

to be infested with the European pine shoot moth. In Europe this is one of the principal insect enemies of pines and is especially destructive in nurseries, young forests, and ornamental plantations. It kills or injures the young twig growth and deforms the tree to a serious extent.

In this country the insect seems to be still confined to the European pines in Connecticut, Illinois, Messachusetts, New Jersey, New York, Ohio, Pennsylvania, Rhode Island and West Virginia. Strenuous efforts are already being made to stamp it out amblit is believed that these will be successful if no further importations of infested stock are permitted.

The white pine blister rust has already resulted in the exclusion of all five-leafed pines from Europe and Asia. The proposed quarantine will extend this prohibition to all classes of pines from Europe. No restriction is proposed on the importation of pine seed. The hearing will be held at 10 a. m.
