### TO STUDY MOTOR LIFEBOATS

Steamship Inspectors Will Visit New York Boat Show

New York, Jan. 29.—The board of supervising steamboat inspectors are to meet in Washington next week and some time during the week are to come to New York to visit the annual motor boat show, which will open in the Madison Square Garden to-morrow afternoon. A law went into effect on January 1 which requires that a certain number of motor lifeboats should be carried on all steamships. These boats are to be used to tow other lifeboats and raft in case of an accident.

Several motors specially adapted for lifeboats will be on exhibition and here will also be some lifeboats fully equipped which will be examined very thoroughly by the inspectors.

Steamship men and the inspectors are planning new provisions to amend the law, it being their opinion that there is no definite requirement in the statute as it now stands.

The fish is a yard long and its mouth is 6 by 8 inches. It was frozen in a case of ice at the Maher ice plant and is exhibited in the window of the Hochmer market here.
