

\$2,500,000 AVAILABLE FOR FOOT AND MOUTH DISEASE

The United States Government Now in a Position to Reimburse Stock Owners Promptly for All Slaughtered Herds

Washington, D. C., Feb. 1.—Under the recent urgent deficiency act which was signed by the President on January 25, \$2,500,000 is now available for the eradication of the foot and mouth disease.

The money now at the disposal of the Department of Agriculture, will, it is believed, aid the campaign against the pestilence by enabling the government to make prompt payment to all owners of infected herds, and thus minimize the reluctance of farmers to have their stock slaughtered.

In those States in which the local quarantines have been rigidly enforced, and in which the farmers themselves have aided the authorities to stamp out the disease, satisfactory progress has been made at a smaller expense than was at one time feared.

While Illinois and Pennsylvania are probably, to-day, the most seriously affected of all the States, there is, it is said, every reason to believe that energetic measures will stamp out the pestilence there as well as elsewhere.
