## SAGE TEA DANDY TO DARKEN HAIR

Look Years Younger! Use the Old-time Sage Tea and Sulphur and Nobody Will Know

You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a 50-cent bottle of "Wyeth's Sage and Sulphur Compound" at any drug store. Millions of bottles of this old, famous Sage Tea Recipe are sold annually, says a well-known druggist here, because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray, becoming faded, dry, scraggly and thin have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful—all dandruff goes, scalp itching and falling hair stops.

This is the age of youth. Gray-haired, unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur to-night and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days.—Adv.

## ENGINEER TO LECTURE HERE

Hugh L. Cooper Will Tell of World's Largest Water Power Plant at Iowa

Hugh L. Cooper, the famous hydro electric engineer, of New York City, will lecture before the Engineers' Society to-morrow evening on the world's largest water power plant at Keokuk, Iowa, of which he was engineer.

The event will be of particular local interest owing to the fact that Mr. Cooper was the engineer in charge of the McCall Ferry project after its first failure and brought that work to a successful conclusion.

His lecture here will cover the history of "white coal" from its early inception in Japan and India to its later developments at Sao Paulo, Brazil, Kingston, Jamaica and in this country at Niagara Falls, McCall Ferry and finally to the greatest hydro-electric plant in the world at Keokuk, Iowa.

The plant at Keokuk was built at a cost of twenty million dollars, after three years' work. It supplies 250,000 horsepower in the form of high voltage electric current to the territory covered in a radius of one hundred and seventy-five miles from Keokuk. Its most important consumer is the city of St. Louis, one hundred and sixty miles away.

The United States Government required the owners, the Mississippi River Power Company, to construct great locks to take care of the river traffic. These locks themselves are a notable engineering feat being the largest on this continent, greater even than the Gatun Locks at Panama. The locks will make a single lift of forty-two feet.

Engineers and others interested are invited to attend the lecture which will be held at the Club House, 31 South Front street. A large and interested audience is expected due perhaps to the fact that there has been so much said as to the possibilities of the "white coal" right at our doors and the larger industrial opportunities for Harrisburg that could be created and the Engineers' Society is to be congratulated in bringing a man who is acknowledged to be the greatest hydro-electric engineer in this country to this city.
