

MANY IN HARRISBURG USE FAMOUS COMPOUND

The famous mixture of buckhorn bark, glycerine, etc., known as Adlerika, is much used here in Harrisburg. This is the most complete, bowel cleanser ever sold, being even used successfully in appendicitis. Just ONE SPOONFUL relieves almost ANY CASE of constipation, sour or gassy stomach. ONE MINUTE after Adlerika is taken the gasses rumble and pass out—the INSTANT action is surprising. G. A. Gorgas, Druggist, 16 North Third street and Pennsylvania Railroad Station—Adv.

The Daily Fashion Hint.

Red and blue are the colors used in this afternoon suit. The skirt is navy blue taffeta, with cerise changeable moire coat bound and girdled with the blue.

LONG HAIR AND LONGEVITY

A Theory That There May Be Some Relation Between Them

Did it ever occur to you that there was any relation between a fine, bushy head of white hair and the long life of the owner?

I believe that I can claim without fear of successful refutation that a very large majority of men who have passed the age of 80 years have or had a goodly show of hair on the crown or top of their heads. I by no means claim that this is universal, for it is easier to recall men who lived to even greater age than 80 who were quite bald.

Without any attempt at a chronological list, I jot down a few names that come to mind as I write: John I. Blair, known at his time as New Jersey's richest man, 94; Daniel Drew, New York capitalist and college founder, 91; Hon. William E. Gladstone, English statesman, 89; Commodore Cornelius Vanderbilt, New York, founder of the New York Central railroad, 83; the Rev. Edward Beecher (brother of Henry Ward), 82; Hon. Peter Cooper, New York philanthropist, 83.

It would be easy to name quite a number of men who possessed fine heads of hair who reached only middle age, but my purpose is not to be statistical, but rather to possibly start interest in an unusual subject and see what can be deduced therefrom.—Pittsburgh Press.

P. R. R. EMPLOYEES TO GET ELECTRIC INSTRUCTIONS

Company Aims to Prevent Accidents to All Persons Working in Electrical Territory—To Distribute Information on Safety Methods

With a view of safeguarding its employees, the Pennsylvania Railroad Company will issue special instructions in a few days pertaining to the electric system now being installed between Philadelphia and Paoli. The instructions, it is stated, will be in pamphlet form and will be distributed to employees of the Philadelphia Terminal, Philadelphia, New York, Trenton, Maryland, Delaware, Scranton, West Jersey and Seashore, Camden Terminal and Media divisions.

According to a general order issued yesterday instructions in resuscitation from electric shocks will be given to all conductors and engineers who are qualified to run over any part of electrified tracks, to all brakemen and firemen in passenger shifting service of the Philadelphia Terminal division; all trackmen, signal repairmen, electric repairmen, telegraph repairmen, painters and other employees whose duties require them to work at any time within electrified territory, and all men who will be employed on electric trains.

In addition to this the medical examiner of the relief department will hold classes of instruction in resuscitation, methods at convenient times and places and the above employees will be required to attend classes and receive instructions. Notices to employees of the time and place of classes will be posted on the bulletin boards. The classes will be open to employees of all divisions.

AGREE ON COMPENSATION ACT

Governor and His Advisors Have Harmonious Gathering in Mansion

At the close of the conference between Governor Brumbaugh and the legislative committee created to carry out the Governor's personal platform, held at the Executive mansion on Tuesday Governor Brumbaugh issued the following statement:

"This evening the joint legislative committee, the Secretary of the Commonwealth, the Attorney General and the Governor, in a three-hour conference, went over substantially all the provisions of a workmen's compensation act. We agreed upon its cardinal features as expressed in the act prepared by the Attorney General. The bill, together with reasons for and against each section, will be issued next week in pamphlet form for distribution to all the members of the Assembly and the newspapers of the State. The unanimous judgment was that in this way the people would know in advance exactly what the act is, and what arguments may be made for and against each section. Wide publicity is believed to be the only corrective of heedless apprehension and the true way to secure speedily a fair and certain compensation law.

The general provisions of an effective child labor law were freely discussed and its provisions amplified. For want of time its detailed study was not completed. It was agreed, however, that a new and advanced law is absolutely necessary."

The committee were guests of the Governor at dinner, and the discussion was carried on throughout the meal.

A WAVE OF SUICIDES

Only Known Cause for Latest Schaefferstown Death

Schaefferstown, Pa., Feb. 18.—Developments in the suicide of Frank Krumbine, the Heidelberg township farmer and tobacco grower, show that he was impelled to commit the act as a victim of the suicidal wave which started thirteen days ago with that of Alvin Binzer, cashier of the First National bank, rather than because of any real financial troubles.

There is a mortgage on the Krumbine farm of 20 acres and there are notes outstanding. Krumbine's father-in-law, John Henry Royer, is a wealthy Mill Creek township farmer, and for months he had been urged to sell his farm and take over the management of the large Royer farm.

Every one of the notes Krumbine gave is amply secured and it is declared there was no disposition on the part of any of his creditors to push him for the money.

Officials of the First National bank here continue to maintain the strictest silence concerning its affairs, and it was impossible to learn whether it holds any of Krumbine's notes.

RAID COUNTERFEITING DEN

Secret Service Men Find Molds For Small Change, Get Man and Woman

Metuchen, N. J., Feb. 18.—Government secret service men and Woodbridge township police raided a counterfeiting plant at Ford's village, near here, Tuesday afternoon and captured Mrs. Mary Jokowitz and Michael Zurka. They were taken to Newark and arraigned before United States Commissioner Temple and held under \$5,000 bail each.

Molds for 5, 25 and 50 cent pieces were taken from the den. For a year past federal agents of New York and Brooklyn have been trying to clear up the mystery of considerable counterfeit money being circulated in New York and in northern New Jersey cities. The two captured are believed to be part of a gang.

Protest Against War Talk

Washington, Feb. 18.—A protest against members of Congress making "thoughtless utterances about the European war and a commendation of President Wilson's efforts for peace were delivered to President yesterday by a committee from the Society of Friends of Swarthmore, Pa.

OLD-TIME COLD

CURE—DRINK TEA!

Get a small package of Hamburg Breast Tea, or as the German folks call it, "Hamburger Brust Thee," at any pharmacy. Take a tablespoonful of the tea, put a cup of boiling water upon it, pour through a sieve and drink a teaspoon full at any time. It is the most effective way to break a cold and cure grip, as it opens the pores, relieving congestion. Also loosens the bowels, thus breaking a cold at once. It is inexpensive and entirely vegetable, therefore harmless.—Adv.

Ribbon Remnants at 10¢ yd.—values up to 25c. A good assortment.

Brassware Specials

Brass Jardinieres at 79¢—formerly \$1.25; 10-inch size; ball foot, highly finished.

APRIL 9 WILL BE BIRD DAY

Clubs Are Being Organized All Over the State for Observance of the Event

The setting apart of April 9 to be recognized as "Bird Day" this year is meeting with warm commendation among lovers of birds the State over, and the indications are that the date will be very generally observed.

Bird clubs are being organized all over the State, the object being to study and protect all song and insectivorous birds. In a circular just issued Dr. H. A. Surface, State Economic Zoologist, who is an authority on birds, says: "This bird club is not confined to any one section of the country in its membership, and in its organization has received the support of prominent persons all over the country. As it has for its design only the purpose of studying and protecting the birds, it is worthy of support.

The program for Bird Day can well include songs, recitations concerning birds, essays on the value of birds and the methods of inducing them to live around the premises; the methods of observing birds; where, when and how the different species nest; their food and economic value, and any other topics that will suggest themselves to thinking persons.

"There can be no doubt of the fact that the birds were placed under the dominion of mankind, the same as are all other creatures, but we have failed to provide for their preservation. In the so-called march of civilization their nesting conditions have been destroyed, the native shrubs and trees furnishing them food have been cleared away to make room for cultivated plants, the house cat has been introduced into this country and allowed to roam at will. While other creatures coming under the direct influence of man have been domesticated and increased in numbers, the birds have been

What 9 1/2c (Yard) Will Buy in Dress Fabrics

At 9 1/2c yard—silk finish Gingham, in pink and lavender, checks; originally 25c.

At 9 1/2c yard—plain tan, navy, white and rose poplin; formerly 15c.

Third Floor—BOWMAN'S.

His Comparison

"When you eat be careful to leave off hungry," is advice that is very often given to children at the dinner table, but seldom received in an obedient spirit.

The caution was repeated not long since to a youngster of vigorous appetite.

"Pshaw!" he said. "You might as well tell me to wash my face and be careful to leave off dirty."

YOU'RE going to want a new Spring hat one of these days—Well, this time, let it be a hat that will not need a word of explanation—in short a Stetson.

Third Floor—BOWMAN'S.

PRISONERS OF WAR

Code of Honor by Which Their Treatment Is Governed

In ancient times prisoners of war were killed unless, of course, the belligerents found it more profitable to exchange or liberate them for ransom. But to-day nations are bound to one another by a code of honor which forbids inhuman treatment of prisoners.

Prisoners are subjected to no punishment in any form. Neither must they be placed in a convict prison, although they may be detained in a fortress, camp or town. A reasonable supply of nourishment must be provided then by their captors, and they are regarded as being in the power of the government of the captor and not under the control of those who actually capture them.

All personal belongings remain in the custody of the prisoner, but arms, horses and military papers can be confiscated, these constituting booty.

Governments can put their prisoners of war to work, but only such work as accords with the prisoner's rank and capacity; also the work must not be excessive or relate to military matters, and in all cases must the labor be paid for.

A prisoner always lives in hope of being exchanged for a prisoner of his own government. The exchange is effected in accordance with agreements, in which time, place and method of exchange are fully detailed. This is generally that of strict equivalents, man for man, rank for rank, disability for disability.

An officer can obtain a greater freedom of movement or certain privileges while being a prisoner of war if he makes out a parole, a written or verbal promise. An officer giving his parole pledges his honor to refrain from a particular course of conduct, and if he makes a breach of this guarantee he is liable to the extreme penalty.—Pearson's Weekly.

Disappointed She—I'm disappointed in Jack; he's tried to put his arm around my waist. He—And he couldn't get it round!

RIGHT AND LEFT HANDED

A Series of School Tests and an Ambidextrous Failure

Ever since it was proved that in a right-handed people the speech center of the brain—the place from which talking is controlled—is on the left side, the brain and that in left-handed people it is on the right side there has existed a suspicion that if a person became ambidextrous, or able to use both hands equally well, the speech center might be doubled, and consequently talking ability might be improved. Very elaborate tests have shattered this hope.

A German specialist obtained the assistance of the school authorities and tried it out on nearly 3,000 school children. After a careful record was taken of each child's hand preference, speech ability and general capability all the children were told to try to use both hands. For many months effort was made to have all the children become ambidextrous.

At the end of the test all the teachers and other observers agreed that though some of the children had succeeded in becoming ambidextrous, the effort had worried them all and shown no advantages manually or in speech that in any way recompensed for the trouble taken. Consequently the scientist has decided that not doing pratty well with her own tem of left side speech and right preference.—Saturday Evening
