# BANK REOPENING POSTPONED

Surety Company Did Not Pay in \$15,000, as Expected, and Schaefferstown Institution Stays Closed

Schaefferstown, Pa., Feb. 23.—President Horst last night made the statement that the Schaefferstown bank would not be reopened for business today, as scheduled. The refusal of the National Surety Company of New York to pay over the \$15,000 represented by the bond of the late cashier, Alvin Binner, was ascribed as the principal cause. Mr. Horst frankly admitted he could not now name the day on which the institution would be reopened.

Arthur J. Hovetter, the young Lebanon life insurance agent who is in the Lebanon county jail on a charge of wilfully aiding and abetting the late suicide cashier of the bank to loot it, has waived the hearing which was scheduled for to-day before United States Commissioner Harry J. Schools at Lebanon. A statement to this effect was made yesterday by Hovetter, who intimated strongly that he would be a witness for the government in the prosecution of the others. Official confirmation of the waiving of the hearing is lacking, the United States officials here and at Lebanon refusing to comment on this new development, and the identity of Hovetter's attorney continues a deep mystery.

Under the circumstances, the hearing before Commissioner Schools at Lebanon to-day promises to be one of formality only.

# IDLE MEN DODGE WORK

Six Hundred a Day in Chicago Refuse to Go on Waiting Farms

Chicago, Feb. 23.—Jobs for 100 men on farms near here are going begging, according to Mrs. Leonora Z. Meder, superintendent of public welfare. "The farmers are offering transportation and in some cases board and washing," said Mrs. Meder, "but the men refuse to go to the farms. Last week an average of 600 men a day visited the office and demanded work of any kind."

"The farmers are willing to pay good wages in addition to lodging," Mrs. Meder said, "and the men would be better off than in working in the city, but we have not been able to supply the need."

# TRADE PROSPECTS ARE ENCOURAGING

Improvement in business since depression reached low tide several months ago has been gradual. Confidence has been restored and unless all signs fail, the country is scheduled for a boom almost unparalleled.

In order to overcome the depression that attacks a person in poor health it is necessary that particular attention be paid to the Stomach, Liver and Bowels. These organs are the controlling power in all matters pertaining to health and there is nothing will make you feel "so blue" and discouraged as to be without appetite—to be subject to spells of headache, indigestion, dyspepsia and biliousness—or to have constipated bowels.

Nature never intended anyone to be in such a condition and the only way to improve matters is to give necessary aid promptly. This suggests a trial of Hostetter's Stomach Bitters, because it has an established reputation as a tonic and appetizer, and will be found very helpful in any Stomach, Liver or Bowel ailment.

It is well known as a real "first aid," and for over 60 years has held a permanent place in thousands of homes. You will make no mistake in purchasing a bottle to-day, but be careful to see that the Private Stamp over the neck is unbroken. This is your protection against imitations.—Adv.

Col. Demming Presents President Kennedy With Gavel From Cherry Tree at Mt. Vernon—To Be Studied With a Diamond Next Year

This, said Commissioner Taylor, has been decided on and when George W. Kennedy, president of the company, said that he had seen Commissioner Taylor in conference with Commissioners Bowman and Lynch but a few minutes before the former had made the announcement, this was taken at its face value. The Commissioners made short addresses and several other guests and members of the company spoke. The meeting was opened by President George W. Kennedy and Charles E. Ripper acted as toastmaster.

# Winter Doubles Work

In summer the work of eliminating poisons and acids from the blood is helped by perspiration. In cold weather, with little out door work or exercise to cause sweating, the kidneys have to do double work. Foley-Kinley Pills help overworked, weak and diseased kidneys to filter and cast out of the blood the waste matter that causes pains in sides or back, rheumatism, lumbago, stiffness of joints, sore muscles and other ills resulting from improper elimination.

# What Could Be Done with the \$2,000,000 Which the Full Crew Laws Arbitrarily Take From the Railroads

Increased Railroad facilities, better service, greater safety and convenience, business expansion and the employment of a great number of men now idle would follow the repeal of the waste-ful Pennsylvania and New Jersey Full Crew Laws.

# Facts—Not Theories

- \$2,000,000 would buy 2000 steel coaches. It would pay for 80 locomotives. It would purchase 67,000 tons of rails. It would return 5 per cent. on \$40,000,000. It would block-signal 1000 miles of track. It would eliminate 65 grade crossings. It would pay for 2000 freight cars. It would build 200 new stations at \$10,000. It would provide additional freight terminal facilities. It would buy 2,500,000 railroad ties. It would pay for 2,000,000 tons of coal. The iron and steel industry would be stimulated, furnish- ing steel for new cars, rails, bridges, buildings, etc. Miners and coke oven operatives would get increased work as industry expanded. New construction would mean busy times for the Lehigh region cement plants and their workmen. Thousands of architects, contractors, building trades workers, electrical concerns and electricians, skilled mechanics, carpenters, miners, and day laborers would so get work.

With these incontestable facts thus clearly set forth, the twenty-one railroads of Pennsylvania and New Jersey feel it their duty to place the fate of the Full Crew Laws in the hands of the people. They are convinced the people prefer that employment be given to thousands for whom there actually is work to know that \$2,000,000 a year is being paid in mandatory wages for extra men for whom there exists no essential service to perform and whose presence, it has been conclusively shown, increases—rather than decreases—the hazards of railroad operation.
