USING SOAP SPOILS THE HAIR

Soap should be used very sparingly, if at all, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is just ordinary mulford coconut oil (which is pure and greaseless), is cheaper and better than soap or anything else you can use.

VALUABLE ADVICE TO SUFFERERS

There are many different forms of stomach trouble," said a well-known specialist recently, "but practically all are traceable to excessive acidity and food fermentation. That is why the results obtained from the use of drugs are usually so disappointing. Admitting fermentation and consequent acidity of the food contents to be the underlying cause of most forms of indigestion, it naturally follows that the use of a reliable antacid, such as the pure bismuthated magnesia which is so frequently prescribed by physicians, will produce better results than any known drug or combination of drugs. Accordingly I almost invariably advise those who complain of digestive trouble to get some bismuthated magnesia (note the name carefully, as other forms are unsuitable for this purpose), from their druggists. It is from one to two teaspoonfuls of the powder, or two 5 grain compressed tablets, with a little water after meals. It immediately neutralizes the acid and stopping the fermentation, removes the cause of all the trouble and insures normal and healthy digestion."—Adv.

A Personal Statement

There are so-called "honey and tar" preparations that cost the dealer half as much but sell at the same price as the original and genuine Foley's Honey and Tar Compound. We never offer these imitations and substitutes. We know you will buy Foley's whenever you need a cough syrup if you once use it. People come long distances for the true FOLEY'S—over thirty years the leading remedy for coughs, colds, croup, whooping cough, bronchial and laryngeal coughs.—George A.
