IN MEMORIAM.

A precious one from us has gone, A voice we loved is stilled; A place is vacant in our home Which never can be filled.

God in His wisdom has recalled
The boon His love hath given.
And though the body slumbers here,
Her soul is safe in Heaven.
By Her Children.

Force of Drops of Water

It seems almost incredible that so small a thing as a drop of rain should injure the propeller of an aeroplane, but such is the case. At so, great a speed does the propeller revolve—1,200 revolutions a minute as a matter of fact—that a rain drop hits it with such enormous force as to chip a piece of the wood away. Some idea of the hardships entailed by flying through the rain at sixty miles an hour may be gathered from the fact that an aviator who recently went through such an experience, alighted with the edge of his propeller fretted as though it had ben gnawed by rats. The rain drops had chipped pieces out of the blades and also bruised the aviator's face, owing to the force with which they hit against his flesh—London Spectator.
