The New Spring Suits Are Different---And Handsomer Than Ever

First in, are distinctly French in design, although modified to suit American taste.

Le trait principal du developpement des modes—but we'll translate this Parisian information—the principal development of the new fashions, is the tendency toward wider skirts, and a revival of the simpler tailored models. It will also be noticed that waist lines are slightly raised and this feature will be carried out generally this spring in suits, dresses and skirts.

New arrivals have swelled the assortment and to-morrow you will find it interesting to view the different models.

Get a Full Season's Wear by Purchasing Spring Coats Now

You will want to see the new models to-morrow including coverts and white chinchillas; checks and mixtures—and Balmacaans. All smart styles and well made.
