

Why Kelly-Springfield Tires cost more to buy but less to own

The stamp of quality is as obvious on Kelly-Springfield Tires as it is on any other hand-made article of genuine worth. It is as inimitable, as unmistakable as the impress of good breeding on a man or woman. But

Kelly-Springfield

Tires are not made so carefully merely to give them an air of distinction; it is mileage that is built into them so slowly and painstakingly by hand. And judged by the acid test of road mileage, Kelly-Springfield Tires are as good as they look. They are built up to a standard—not down to a price-list.

Hereafter the basis of adjustment will be:

In Ford sizes, plain tread, 6,000 miles; Kant Slip 7,500 miles. All other sizes, plain tread, 5,000 miles; Kant Slip tread 6,000 miles. The word "adjust" is merely figurative, because in 1914 the total adjustment in Kelly-Springfield Tires for the whole United States was less than 1%. You get this unequalled service in uninterrupted mileage—not adjustment.

Before buying some other tire at a lower price analyze the basis of adjustment offered by the other maker—see what you really do get for less money.

PIONEER AERONAUTIC CONSTRUCTOR TO BUILD A NEW FLYING YACHT WITH A NEW BALANCING SYSTEM

THE WITTEMAN AQUAIR PLANE

After years of experimental work with gliders and small power aeroplanes, Charles R. Wittemann, of New Brighton, S. I., one of the pioneer aeronautic constructors of America, has designed a new type of heavier-than-air flying machine of larger size than any now in use. It is modelled on a new system of balancing with following surfaces or wings behind another, resembling those of Samuel Pierpont Langley. The balancing devices were

CHARLES R. WITTEMAN

designed by Mr. Wittemann to give inherent or natural stability to the craft

and to increase its steadiness and efficiency in the air. The inherent stability of the craft is such, Mr. Wittemann declares, that there will be no need of hand control for balancing as practised in the older types of aeroplanes. The only movable surfaces on the large craft will be a vertical rudder for steering to right and left and a horizontal rudder to control ascent and descent. It will be known as the Aquair-Plane and is a flying yacht, 100 feet long with 60 foot wings

SINGAPORE MUTINEERS SHOT

Five Executed, Eight Imprisoned, and Only 11 Now at Large

London, March 24.—The British Colonial Office last evening gave out a statement dealing with the situation at Singapore, where recently there was a mutiny among the Indian troops. The statement reads:

"All messages from Singapore since the last notification show a restoration of normal conditions. Of those who took part in the recent riot all except 11 have now surrendered, have been captured or have lost their lives.

"Five rioters have been shot, after trial by a summary general court-martial. One has been sentenced to 15 years imprisonment and seven to one year imprisonment each.

"During the rioting 17 German prisoners escaped. Of these six have been recaptured. The conduct of the remainder of the German prisoners was exemplary."

DROWNED 3 BRIDES IN BATH

Englishman Accused of Obtaining \$14,000 From Estate of Two Wives

London, March 24.—Charged with killing three women, George Joseph Smith, in the Bow street court yesterday heard Public Prosecutor Bodkin declare he had made away with three of his wives shortly after he had married them. Each of these women was found dead in her bath; consequently the case became known as the "brides in baths" case.

Verdicts of accidental death by drowning were returned by Coroner's jury, but the bodies have been exhumed, with the result that charges of murder have been preferred. The prosecutor gave the names of the three women and the dates of the alleged murders as Beatrice Mundy, July, 1912; Alice Burnham, December, 1913, and Margaret Loft, December, 1914.

Smith, according to the police, was born in London, the son of an insurance agent, and is 45 years old. Prosecutor Bodkin said the accused had been married five times. "The case is remarkable," the prosecutor said, "for the greed for wealth which was the motive in the taking of these three lives. We shall show that at the death of two of them 2,800 pounds (\$14,000) was obtained, and that the prisoner, when arrested, was in a fair way to obtain 700 pounds (\$3,500) more."

PARDONS DYING CONVICT

President Even Telegraphs Orders for His Release

Washington, D. C., March 24.—Touched by word that George Savage, a prisoner in the Minnesota penitentiary, was dying, President Wilson last night signed a pardon, and orders were immediately telegraphed to the warden to release the man.

Savage was serving a sentence of five years, imposed by the Federal Court at St. Paul, for violation of the Mann "White Slave" law. His sentence began in April, 1914. Attorney General Gregory recommended that the pardon be granted recently, on receipt of reports from the prison physician that the prisoner's condition was serious. The District Attorney and his assistants had endorsed the petition.

Last night Gregory telephoned Secretary Tumulty that Savage was dying, and Tumulty took the case up with the President.

The church people of a dozen towns crowded the court room yesterday and school children joined in a temperance parade outside. H. A.
