The subject of his sermon was "How to Catch Paul's Passion for Souls." At the afternoon meeting on Wednesday at the tabernacle Mrs. Hillis preached on "The Great Division," while Mr. Hillis addressed the Men's Association on "Stepping Stones to Success." The evangelist stated that, "Some who seek money would walk over hell on a plank a foot wide for a dollar." He flayed Christian science, calling it a hellish concoction. How To Gain Weight A Pound a Day

Thin men and women who would like to increase their weight with 10 or 15 pounds of healthy "stay there" fat should try eating a little Sargol with their meals for a while and note results. Here is a good way worth trying. First weigh yourself and measure yourself. Then take Sargol—one tablet with every meal—for two weeks. Then weigh and measure again. It isn't a question of how you look or feel or what your friends say and think. The scales and the tape measure will tell their own story, and most any thin man or woman can easily add from five to eight pounds in the first fourteen days by following this simple direction. And best of all, the new flesh stays put. Sargol does not of itself make fat, but mixing with your food, it turns the fats, sugars and starches of what you have eaten, into rich, ripe fat producing nourishment for the tissues and blood—preparing it in an easily assimilated form which the blood can readily accept. All this nourishment now passes from your body as waste. But Sargol stops the waste and does it quickly and makes the fat producing contents of the very same meals you are eating now develop pounds and pounds of healthy flesh between your skin and bones. Sargol is safe, pleasant, efficient and inexpensive. G. A. Gargas and other leading druggists in Harrisburg and vicinity sell it in large boxes—forty tablets to a package—on a guarantee of weight increase or money back.—Adv.
