

Where to Buy Your Piano or Player-Piano

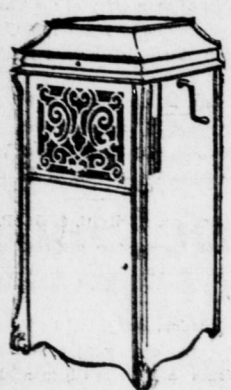

One thing is absolutely certain---you can buy with greater knowledge after a visit to this store. For here you can see, hear, test and examine all the leading makes in the different grades, side-by-side.

In saying our prices are the lowest named anywhere, quality considered, we are simply making a statement which can be easily proven by a few minutes spent in our warerooms.

Besides being responsible for every instrument we sell, we make the purchase easy by allowing you to arrange your own terms, within reason, of course. Visit our Piano and Player-Piano Department to-morrow. We are showing some very attractive values in little "used Up-rights."

See and Hear the New Style Victrolas and Edison Diamond Discs

No matter how remote your interest in music, we want you to stop in to-morrow and hear these two instruments demonstrated side-by-side.

Some day you will want a Victrola or Edison Disc, and when that day comes, remember this is the only store in the city privileged to display all models of both instruments.

Prices \$15 to \$450

Attend To-morrow's Demonstrations
No Obligation Whatever

BELGIAN IS ARRESTED FOR WEARING FRENCH UNIFORM

Paris, April 16, 5.20 A. M.—An invalid Belgian grenadier giving the name of Pierre Baeyens, has been arrested by the police of Paris on the charge of wearing the uniform of the French army and a French military medal without authority. The man is believed to be a dangerous spy. After his arrest inquiries were made with the result that the examining magistrate altered the charge against him to one of espionage.

The identity of Baeyens is something of a mystery. He was found to have traveled recently in the regions around Nancy and Ponta Mousson. He also visited the principal naval stations,

where he tried to establish relations with soldiers and sailors. Louis Petital, a sailor on a French submarine at Cherbourg, has declared that he recognized in Baeyens a Belgian grenadier who offered to guide a party of French blue jackets during the fighting at Nismes and then led them into an ambush. The police are of the opinion that Baeyens is a German who enlisted in the Belgian army for purposes of espionage.

FIGHT BIRDS WITH ROCKETS

Residents of Glen Ridge, N. J., Plap to Feast on Starlings
Glen Ridge, N. J., April 16.—Starlings have arrived in this borough by the thousands, particularly in the Midland avenue section, where the residents for the last few nights have been exploding skyrockets and firecrackers in an effort to drive the birds away, but without success.

Bird shot will now be brought into play and starling pie may be the borough dish for some time.

CAN'T FIX SELLING PRICE

Motion of Kellogg Company Denied in U. S. Circuit Court
By Associated Press.

Detroit, April 16.—In denying a motion filed by the Kellogg Toasted Corn Flakes Company against the government's petition for an injunction to restrain the company from fixing the resale price of its product, the United States Circuit Court of Appeals in a decision just filed in the district court here rules that the owner of a patented article cannot dictate the selling price of the goods which the patent contains.

The government's petition, filed in December, 1912, attacked the selling plan of the defendant company, stating that it specified the price which the jobber, the wholesaler and the retailer should charge for its product. Arguments in the case were heard last July. In its motion to dismiss the government's petition the Kellogg company contended that its ownership of a patent on the cereal in which its product was marketed gave it the right to fix the price of the product.

NEW LINING FOR POTS

Life of Utensil Prolonged Fifty Per cent. by Recent Discovery
Pittsburgh, April 16.—Discovery of a new process for lining pots used in glass making, which, it is claimed, will prolong their life fifty per cent. and result in an annual saving of thousands of dollars to the American glass industry, was announced to-day by the Mellon Institute of Research of the University of Pittsburgh. At present the cost of pots is very high, because of the intense heat to which they are subjected in the making of glass.

It is estimated that a glass factory operating two furnaces of fourteen pots each will save \$7,000 a year through the use of the new pots and experiments have shown that the quality of glass produced will be much better. The lining can be made from American clay.

Eager for Revenge

Stage Manager—"You are to hit the hero with this club in the last act." Villain—"I don't think I can wait that long. He called me a ham."—Rocky Mountain News.

TENTATIVE PLANS MADE FOR \$6,400,000 MORE REVENUE

Governor and Men at Head of Finance Committees of Legislature Evolve Methods of Obtaining Funds to Offset Decrease in State's Receipts

"I have had a conference with the joint legislative committee, the chairman of the Appropriations Committee and the men at the head of the finance committees," said Governor Brumbaugh last night, "the object being to raise more revenue. Several propositions have been tentatively approved that will bring in about \$6,400,000 more annually, and we hope so to arrange things that we can save a goodly sum by economy in State matters."

The Governor's idea is that as the income of the State faces a decrease the Legislature should enact laws to correct conditions. Further the Governor desires that there shall be funds available for the \$8,500,000 which the new Sprout bill would appropriate for the current two years' work on highway maintenance.

As tabulated by Attorney General Brown, the approximate receipts yearly from the new revenue raisers would be:

New anthracite tax, \$4,500,000.
Fifty per cent. increase in automobile license fees, \$600,000.
Tax on stock transfers, \$500,000.
Relief from primary election expenses, \$800,000. Total, \$6,400,000.

As to the bill providing for a tax on anthracite there is a difference of opinion as to the percentage which should be returned to the coal counties. For that reason a conference will be held next Tuesday at which representatives of the coal counties will discuss the matter with administration officials. The present bill provides that the State shall retain 66 2/3 per cent. The counties want at least a 50-50 division. It is suggested as a compromise that the State retain 60 per cent. and the counties receive 40 per cent., with the State paying the 1 per cent. for cost of collection.

The stock transfer tax contemplates a tax of two cents on each \$100 share transferred. New York receives \$5,000,000 annually from this source. Then it is proposed that an escheat bill be passed under the terms of which all unclaimed moneys in banks would become the property of the State after ten years. This, of course, is an unknown quantity, but it is believed that there are millions of such funds throughout the State. The bill requires the officers of the banks to inform the State of all unclaimed funds. And when the Attorney General's office is reorganized into a Department of Justice with all attorneys employed by the Commonwealth working under the direction of the Attorney General, it is believed that escheats may be more readily and quickly realized.

The plan to have the State carry its own insurance in all State property will save \$100,000 annually in premiums. The bill to obligate relatives of so-called indigent insane to bear the expenses of maintaining the patients will, when enacted, open up a fruitful field for saving expenses. As it is now the State pays \$2.50 a week for the keeping of each indigent insane person. Often these patients have relatives who could well afford to pay the charges. Ohio realizes \$500,000 annually from this source.

Last week a bill was offered doubling the fees of automobile licensees. Such a protest was made that it is proposed to compromise on a fifty per cent. increase. While no serious consideration is being given the subject at this time, it has been proposed that the State realize revenues from a State tax on real estate. The value of real estate in Pennsylvania is estimated to be \$5,332,133,902. A one per cent. tax on that would supply \$5,000,000 a year.

65 SAVED AS BOAT SINKS

California Excursionists Fight for Life Preservers in Darkness

San Francisco, April 16.—Sinking rapidly while men, women and children passengers fought for life preservers, the excursion steamer Monarch raced toward shore early Wednesday in San Pablo bay. The sixty-five passengers and crew had barely been landed safely in the darkness over improvised gangways after the ship went ashore off the Selby landing than she slipped back into deep water and sank.

The crew had to fight several passengers to keep them from jumping overboard. The Monarch was discovered to be leaking badly while steaming through the dangerous Carquinez Straits. The passengers were from Sacramento bound for San Francisco.

Gave Him a Hint

A Smooth, Hairless Skin for Every Woman

(The Modern Beauty)
With the aid of a plain delatone paste it is an easy matter to rid the skin of unsightly hairy growths. The paste is made by mixing some water with powdered delatone. This is applied to the hairs not wanted and after 2 or 3 minutes rubbed off and the skin washed, when every trace of hair will have vanished. When you go to your druggist for delatone, be sure you get the genuine article.—Adv.

NEW YORK OPENING OF AN INTERNATIONAL DESIGNER

New Gowns Rich in Originality and Daring Color Effects—Trimings of Braid and Buttons—The Lingerie Waists Coming to Front

New York, April 12.—Two noteworthy events took place in the New York world of fashion this last week. One was the Flower Show, the other was Lady Duff-Gordon's opening. In her wonderful studio, with carefully arranged lights, her latest creations were exhibited to a few especially invited guests. Her dresses are most original in line and daring in color scheme, but she never errs in effect.

A dress which showed strongly its Victorian influence was made of lavender silk, with closely-buttoned pointed bodice. A large fichu of softest mulline was draped around the shoulders, with ends hanging to the hem of the skirt, which stood well away from the figure in truly crinolene effect.

The bodice with pointed front appeared many times, and in the evening gowns was accentuated by a deep V in the back, which sometimes extended to the waistline.

A New Taffeta Smartly Trimmed in Black and White

This Parisian and London designer came here shortly after the war commenced. In the Fall she introduced a number of novel styles. One, the Tommy Atkins suit, has had unexpected popularity, being copied and shown with or without variations all over the country.

The charming dress which she designed for Mrs. Vernon Castle, the dancer, has been a distinct innovation, which showed the artistic skill of its creator, in applying a style to the individuality of its wearer. Another novelty is the dress which is held slightly away from the figure by a reel, and lately she has introduced a Russian head dress. These last have not been accepted and whether they will or not time only can tell.

Her collection showed a large variety in the treatment of the skirt. For instance, a Persian dancing frock was wired about the hips. A number showed pannier effects. A Louis Philippe model was trimmed with two rows of ribbon loops, and a Victorian model had a skirt laced part way down the front. Tailored skirts have large patch pockets on either hip. One skirt has a round apron with a pocket on either side. In the back it was strapped below the waistline with a belt. Altogether it was not unlike the leather aprons worn by iron-workers.

At the Flower Show, the street and conservative afternoon costumes were in evidence and also many handsome motor wraps. There were numerous navy blue suits seen and many in the light colors, such as sand and beige.

MUSTEROLE--QUICK RELIEF! NO BLISTER!

It Soothes and Relieves Like a Mustard Plaster Without the Burn or Sting

MUSTEROLE is a clean, white ointment, made with the oil of mustard. It does all the work of the old-fashioned mustard plaster—does it better and does not blister. You do not have to bother with a cloth. You simply rub it on—and usually the pain is gone!

Doctors and nurses use MUSTEROLE and recommend it to their patients. They will gladly tell you what relief it gives from Sore Throat, Bronchitis, Croup, Stiff Neck, Asthma, Neuralgia, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or Joints, Sprains, Sore Muscles, Bruises, Chills, Frost Bites, Colds of the Chest (it often prevents Pneumonia).

At your druggist's, in 25c and 50c jars, and a special large hospital size for \$2.50. Be sure you get the genuine MUSTEROLE. Refuse imitations—get what you ask for. The Musterole Company, Cleveland, Ohio.

THE WONDER

211 Market St.

A dress of sand-colored covert was trimmed with black satin collar and covers. Black silk braid is used on the sleeves, on the back of the jacket, and on the hips of the skirt. Silver braid-trimmed were used in conjunction with the braid.

Taffeta is used over and over again for evening and afternoon dresses—sometimes, elaborately trimmed with puffs and shirtings, flounces shirred on cords, or a series of straight or bias ruffles from the high or normal waistline to the bottom of the skirt.

Afternoon dresses of voile are to be seen with accordion-pleated skirts. One charming white dress was made with a series of box-pleats, the material accordion-pleated between each pleat. Others are shirred or smocked at intervals of two inches from the waist to below the hips.

A simple and serviceable model de-

is cut into ruffles and applied one to the other. A jaunty little turban with a smart bow is the hat accompanying this dress.

Morning dresses are very simple, and made of medium-weight linen, pique and poplin and trimmed with colored hand-embroidery, the most fashionable color being khaki.

A very fashionable material for the separate waist is white handkerchief linen with a broad colored stripe. This may be had in brown and white, blue and white, red and white, and almost all the colors, and is distinctly smart, as well as attractive.

The lingerie waists are slowly coming to the front as Summer approaches. These are simple in comparison to the lingerie waists we have had, but show the tendency toward a little more trimming in the way of hand-embroidery and lace. Some of the prettiest of these waists are trimmed with butter-colored lace, often fllet or square-meshed Valenciennes.

News from Paris says that quantities of narrow Valenciennes lace will be used on the summer dresses. There is certainly no daintier and sweeter way of trimming the simple frock of lawn or batiste, Swiss or organza, than with lace-edged ruffles of the same material, together with tucks and insertion. Other simple Summer models of the above-mentioned materials are trimmed with ruffles that are either hemmed with a very narrow hem, or not, pointed-edge, but with nothing else on the edge. This, of course, applies to very sheer materials.

Among children's dresses dotted Swiss is taking a decided stand and is charmingly childish. An Empire frock untrimmed except for a narrow lace edge at the neck and the bottom of the short puffed sleeve with a two-inch heading at the waistline, through which a ribbon may be drawn, is charming for the small girl's Sunday-best or party frock.

The Spring wrap for the little girl may be an Empire coat, of cashmere, gabardine voile, poplin, grosgrain silk or taffeta, according to what will fit into her wardrobe to the best advantage. Also capes are being shown made of the gayest colors, silk lined and with a pointed hood at the back.

The little girl's hat should be rather small this year either round in shape or in a poke-bonnet shape. These last are very pretty, especially if made partly of straw and partly of cretonne. I saw a very pretty one the other day made of a sand-colored straw and lined with a finely-figured cretonne, which was veiled with red chiffon. The top of the crown was of the cretonne also and veiled. Red velvet ribbon was placed around the crown and ended in

A Dry Land Boat Race

A dry land boat race took place at some sports in the north of England last year and caused much merriment. The "crews" sat astride a pole and ran backward round a course, steered by a "cox," who faces in the right direction. Tumbles, needless to say, are very frequent, and when the leader happens to lose his footing he generally "shipwrecks" the whole crew, to the vast enjoyment of their rivals and the spectators.—Wide World Magazine.

How Rusty Kettles Were Cleaned

An old fashioned recipe for cleaning the inside of a rusty kettle consisted in filling it to the brim with hay. As much water as it will hold should then be poured over the top, the kettle placed on the fire and boiled for several hours, more water being added when required.

It's Planting Time For Beans and Peas

Increase your profits on Beans and Peas by using Schell's Quality Seeds. They will bring better prices and quicker sales.

THEY GROW BETTER
THEY YIELD BETTER

Here are some of the varieties which it will pay you to plant:

Beans

Schell's New Wonder Pole Lima—wonderfully prolific big, broad, thick, meaty beans, crowded tightly in the pods, which are literally crammed onto every inch of the branches.
New Yellow Pod Bonafide—the most-talked-of bean in the city markets; as prolific as the green and entirely stringless.
Bonafide Green Podded—long, flat, fleshy, stringless pods; an enormous yielder.
Improved Bush Lima—bear in close clusters as many as eleven pods; each pod contains three, four and five beans; greatest yielder ever introduced.

Peas

Thos. Laxton—great money maker; large pods, heavy yielder.
Not's Excelsior—for market and home gardeners; delicious quality; extraordinary productiveness; covered with well filled pods.
Telephone—old favorite with a delicious flavor; immensely productive.
Mammoth Lucious Sugar Peas—largest, sweetest and most desirable of all Sugar Peas.
