Errors of living, among which coffee-drinking is one of the most common, has stirred the New York Health Department to prepare a booklet of suggestions for indoor workers, and among other wise bits of advice this booklet says:

"Bracers are harmful. This applies to the use of tea, coffee and alcoholic beverages."

Sound advice!
All over America, for years, coffee drinkers, indoor and out, prompted by their own feelings and enlightened by science, have gotten rid of coffee troubles by changing to
