Cigarettes.

The New York *Tribune* of a recent date notes as an ill omen that the internal revenue receipts for the year ending June 30th, will exceed those of previous years by the sum of \$10,000,000, owing chiefly to the collection on cigarettes—this increase being chiefly due to the spread of cigarette smoking among the boys. It is said the women and girls also make every year a large contribution to the revenue derived from cigarettes. The facts about boys and girls smoking ought to be the signal for war all along the line, among those who have to do with the young, against this growing evil. We are glad to note in this connection a fact, not new, but unknown to many, that in the Government Naval School at Annapolis tobacco is prohibited, and the Board of Visitors at West Point some time since recommended a similar rule for that institution. If we are to have military men of strong bodies and steady nerves, tobacco must be kept from them, at least during the period of growth. Tobacco is also prohibited to the students of Girard College, Philadelphia. Gen. Grant, when visiting there, being informed of this fact said, "That's right. They are not so apt to take it after they get out them." Most men who are themselves tobacco users, would, if possible, prevent their sons and all other boys from getting into the same habit. While the use of tobacco undoubtedly injures men, it is much more injurious to those who have not yet attained their growth. It cuts off from the height of stature, and also from the length of life. The *British Medical Journal* says that a certain doctor, noticing that a very large number of boys under fifteen years of age were tobacco users, was led to inquire into the effects the habit had upon their general health. He took for his purpose thirty-eight boys aged from nine to fifteen, and carefully examined them. In twenty-seven of them he observed injurious traces of the habit. In twenty-two there were various disorders of circulation, indigestion, palpitation of the heart, and a more or less marked taste for strong drink. In twelve there was frequent bleeding at the nose; ten had disturbed sleep; twelve had slight ulceration of the mucous membrane of the mouth, which disappeared on ceasing from the use of tobacco for some days. The doctor treated them all, for weakness, but with little effect until the smoking was discontinued, when health and strength were soon restored.

Scientific investigation shows also that the use of tobacco by boys is decidedly injurious to the brain and mind. In 1862 the Emperor Napoleon, learning that paralysis had increased with the increase of the tobacco revenue, ordered an examination of the school and colleges, and finding that the average standing in both scholarship and character was lower among those who used the weed than among the abstainers, issued an edict forbidding its use in all the national institutions.

The grand jury of Allegheny found true bills against three hundred saloon keepers for selling liquor without license. Prosecutions grow out of the difference between the liquor men and the State on the question of licenses. Most dealers offered to pay fifty dollars which hitherto had been taken, but the offer was refused on account of a law passed in '72, making the licenses of Allegheny county \$300. The matter will be tested in the Courts. Nine hundred dealers are now selling without a license.
