Our good friend JOHN BLACK, of Le Raysville, believes in observing the scriptural injunction, "be not unkindful to entertain strangers, for some have thereby entertained angels unawares." TO ALL WHOSE VISION is defective, NOW is the time to improve your sight and preserve your EYES.

Read carefully and do not discredit because you do not understand. Knowledge comes by research. The true Philosopher is he who follows the Scripture command: "Prove all things. Cleave to that which is good." Many are suffering with their EYES.—Why? Because they think there is no more Relief. But seeing is believing.

### THE ADVANTAGES OF MY SPECTACLES. OVER ALL OTHERS ARE THESE:

- 1st—They are the only perfect Lenses in existence having the cones of each surface exactly opposite to each other and being of uniform density, are rendered nearly free from chromatic substances and prismatic lights, points of the utmost importance in the construction of Spectacles and Lenses.
- 2d—They have a great superiority over glass, and are unequalled for clearness, and also for coolness to the eye.
- 3d—They can be worn with perfect ease for any length of time at one sitting; giving astonishing clearness of vision, particularly by candle or artificial light, and great comfort to the spectacle wearer.
- 4th—When the eyes pain or ache from the action of light, and in reading, writing, or sewing on vivid colored bodies, these Lenses, by softening the rays, affect the most agreeable sensation to the eye.
- 5th—In all nervous affection of the eye—causing dull or startling pains in the eyeballs or temples, appearance of luminous or dark spots in atmosphere, aching, or feeling like sand in the eyes—the disturbed nerves are quieted, soothed, combosed, and entirely restored.

The importance of the subject, as introduced by the subscriber, has been fully acknowledged by the highest authority, and these Spectacles are now used by the most eminent Faculty, and at all the institutions for diseases of the Eyes in this country and in Europe.
