It may not be generally known that a test oil well is about to be put down within one mile of the southern line of our county, just in the edge of Wyoming and Sullivan counties, in the vicinity of Sciota Valle. The Company, made up principally of Wyoming county capitalists, are men of both wealth and enterprise, and propose to make a thorough investigation—going down at least 2000 feet, unless oil in paying quantities is found nearer the surface. Practical petroleum men have for some time been convinced that oil exists in that section, as the best surface indications are afforded. In case the experiment does not prove successful in developing oil, it may decide the question as to whether coal and iron exist there or not. We await the result with much interest, as, if petroleum or minerals are found there, the same may exist nearer this locality.

Three hundred and fifty persons visited Ensenmore Glen on Lake Owaseo Saturday with Perkins Post Band of Athens. All enjoyed the day which was pleasant.

Rev. M. McMaster has resigned his pastorate in Athens. The Presbyterian society has flourished under his charge and will listen with regret to his farewell sermon next Sunday.

A man named Shaw severed a large artery near his ankle while using a new pick in a quarry near Athens. A fellow workman had presence of mind enough to use his pocket knife for a compressor to stop the flow of blood until he could get to a surgeon's office.

Lightning struck the chimney of Mr. Jackson Greene's house in Athens twp. on Saturday, following it to the cellar partially demolishing the chimney and shivering some of the foundation timbers. A little girl was severely shocked by a current that came up through the floor where she stood. A cat that lay under the sewing machine did not revive until next day. The other occupants of the house, which is a new and large one, escaped with severe fright.

The President's Condition.

As intimated yesterday, another crisis in the President's case has been reached, and the knife was again successfully used yesterday to secure the discharge of pus. The operation was not attended by any unfavorable symptoms other than the unavoidable drain upon his strength. It is evident he is far from being well and his condition will continue to excite great solicitude.

OFFICIAL BULLETIN.

AUGUST 8, 7 P. M.

After the last bulletin was issued, the President suffered some for a time from nausea, due to ether, but that has now subsided. He has had several refreshing naps, and his general condition is even better than might have been expected after the etherization and the operation. At noon his pulse was 104, temperature 100.2, respiration 20. At present his pulse is 108, temperature 101, respiration 19. Under the circumstances, the fever must be regarded as moderate.

To those who have heard of the "Imitation Glass," and have not seen it, we extend a cordial invitation to examine into its real merits, and ask the prices for which it can be obtained, we are prepared to contract with churches, halls, or other public buildings, and warrant all of our work to surpass in beauty the genuine stained glass and our prices are less than one-fourth the cost of the same.
