GOOD BYE.—Yesterday the many friends of Mr. John T. Smith, recently employed in Mr. Grady's tailor shop, bade him farewell. Mr. Smith has resided in this place for several years past, and his thorough good humor and kind-heartedness, his sociability and correct deportment, have won for him many friends. It is sad to part with those we love and especially an intimate companion whose honor we have never known to falter. The friends of Mr. Smith feel lonely at his departure, but since he removes to the great American metropolis, they feel confident he will prosper, and wish him success in his new departure.

The President's Condition.

OFFICIAL BULLETINS.

8:30 A. M.

The President has passed a very good night, awakening at longer intervals than during several nights past. He continues to take liquid food by the mouth with more relish and in such quantities that the enemata will be suspended for the present. No change in the parotid swelling. The other symptoms are quite as favorable as yesterday. Pulse, 100; temperature, 98.5; respiration, 19.

12:30 P. M.

The President continues to take liquid food by the mouth. His temperature has risen slightly since this morning's bulletin; in other respects his condition is about the same. Pulse, 104; temperature, 99.2; respiration, 17.

6:30, P. M.

Shortly after the noon bulletin was issued, an incision was made into the swelling on the right side of the President's face, for the purpose of relieving the tension of the swollen parotid gland, and of giving vent to the pus, a small quantity of which was evacuated. He has taken a larger quantity of liquid food by the mouth to-day than yesterday, and has been entirely free from nausea. His temperature this afternoon is however, higher than yesterday at the same hour, and his pulse is somewhat more frequent. Pulse, 108; temperature, 100.7; respiration, 19.

Blaine's dispatch to Lowell: The President has not gained to-day. He has had an evening fever which began earlier than is usual with his febrile rise. In the afternoon an incision was made in the swollen parotid gland, by Dr. Hamilton. The flow of pus therefrom was small. The one favorable symptom of his swallowing liquid food with apparent relish, and the digestion has continued, but the general feeling up to midnight is one of increased anxiety.

We are constantly receiving orders for "Lum Smith's Imitation Stained glass," and are ready to give our patrons the full benefit of an inexpensive

and handsome decoration by placing it on any glass whether door or window, large size or small glass, green or white, round or square, in fact any position, shape or kind of frame or glass that needs shading from the rays of the sun, or from the gaze of inquisitive eyes. Thankful for the very liberal patronage bestowed since we have received the agency of this imitation, we shall by a strict attention to business, hoping to merit a continuance of the same. To those who have heard of the "Imitation Glass," and have not seen it, we extend a cordial invitation to examine into its real merits, and ask the prices for which it can be obtained, we are prepared to contract with churches, halls, or other public buildings, and warrant all of our work to surpass in beauty the genuine stained glass and our prices are less than one-fourth the cost of the same. Those in need of anything of this kind or who are lovers of art, whether they wish to purchase or not, are respectfully invited to examine the same at CHAS. F. CROSS' Book Store.
