

BE MARRIED.

"I was always the greatest tea-cup, bashful fellow you ever did see; it was kinder in my line to be taken with the shakes every time I saw a pretty gal approach me, and I'd cross the street any time rather than face one. 'Twas n't because I didn't like the critter, for if I was behind a fence looking through a knot hole, I couldn't look at one long enough.

Well, my sister Lib gave a party one night, and I stayed away from home because I was too bashful to face the music. I hung around the house, whistling 'Old Dan Tucker,' dancing to keep my feet warm, and watching the heads bob up and down behind the window curtains and wishing the party to break up so I could get to my room. I smoked up a bunch of cigars, and it was getting late and mighty uncomfortable. I concluded to slip up the door-post. No sooner said than done, and I quickly found myself in bed.

'Now,' says I, 'let her rip! dance till your wind gives out!' and ending under the quilts, Morpheus grabbed me. I was dreamin' of soft shell crabs and stewed tripe, and having a good time, when somebody knocked at the door and waked me up. 'Rapped' again and I laid low. 'Rap, rap, rap!'

Then I heard a whispering, and I knew there was a whole rat of girls outside.

'Rap, rap!'

Then Lib sings out—

'Jack are you in there?'

'Yes,' says I.

Then came a roar of laughter.

'Let us in,' says she.

'I won't,' says I; 'can't you let a fellow alone?'

'Are you abed?' says she.

'I am,' says I.

'Get up,' says she.

'I won't,' says I.

'Then come another laugh by thunder! I began to get riled.

'Get out you petticoated scarecrows!'

I cried, 'Can't you get a bean without hauling a fellow out of bed? I won't; go with you—I won't; so you may clear out!'

Then throwing a boot at the door I felt better. But presently, oh! moral buttons, I heard a still but small voice, very much like sister Lib's and it said:

'Jack, you'll have to get up, for all the girls' things are in there!'

Oh, Lord, what a pickle! I think of me in a bed, all covered with shawls, mufflers, bonnets and cloaks, and twenty girls outside waiting to get in! If stopped I think would, have fainted on the spot.

As it was, I rolled out among the bonnet wire and ribbons in a hurry.

'Smash!' went the military in every direction. I had to dress in the dark—for there was a creak in the door and the girls will peck—and the way I tumbled about was death to straw hats, the critical moment came. I opened the door, and found myself right among the woman.

'Oh, my leg-horn,' cries one, my dear darling velvet,' cries another; and they pitched in—they pulled me this way and that, boxed my ears, and one bright-eyed little piece—Sal—her name was put her arms right around my neck, and kissed me right on my lips. Human nature couldn't stand that, and I gave her as good as she sent. It was the first time I ever got a taste, and it was powerful good, I believe I could have kissed that gal from Julius Caesar till the Fourth of July.

'Jack,' says she, 'we are sorry to disturb you, but won't you see me home?'

'Yes,' said I, 'I will.' I did do it, and had another smack at the gate too.

After that we took a turtle dove after each other, and both of us sighing like a barrel of good cider when we were away from each other.

'Twas at the glorious summer day—the sun was setting behind a distant hog pen—the chickens were going to roost—the buffaloes commencing their evening songs—pollywogs in the native mud-puddles were preparing them for the shades of night—and Sal and myself sat upon an antiquated black log, listening to the music of nature, such as tree toads, roosters, grunting pigs, and now and then the mellow music of a distant jacksaw was wafted to our ears by the gentle zephyrs that sighed among the mullen stalks, and came heavily laden with delicious odors of honeysuckles and pigwits. The last lingering rays of the setting sun, glistening like the rays from the bright buttons of a solitary horse-man, shone from a knot-hole in the hog-pen full in Sal's face, dyeing her hair with an orange-peel hue, and showing off my thread bare coat to a bad advantage. One of my arms was around Sal's waist, my hand resting on the small of

her back—she was toying with my auburn locks of jet-black hue; she was almost gone, and I was ditto. She looked like a grasshopper dying with the hiccups, and I felt like a mud turtle choked with a codfish ball.

'Sal,' says I, in a voice as musical as the notes of a dying swan 'will you have me?'

She turned her eyes heavenward, clasped me by the hand, had an attack of the heaves and blind staggers, and with a sigh that drew her shoestring to her palate—'Yes!'

She gave clear out then, and squatted in my lap. She jerked away, and I crumpled, and rolled in it. I hugged her till I broke my suspenders, and her breath smelt of onions which she had eaten the week before.

Well, to make a long story short, she set the day, and we practiced every night for four weeks, how we would walk into the room to be married, till we got so we could walk as graceful as a couple of Muscovite ducks.

The night the company, and the minister came, the signal was given, and arm in arm we marched through the crowded hall. We were just entering the parlor door, when down I went kerslap on the oilcloth, pulling Sal after me. Some cursed fellow had dropped a banana skin on the floor, and it floored me. It split an awful hole in the casimers, right under my dress coat tail.

It was too late to back out; so slipping my hand over it, we marched in and were splashed, and taking a seat, I watched the kissing of the bride operation—My groomsman was a little tight and he kissed her until I jumped up to take a slice, when oh horror! a little six year old imp had crawled behind me, pulling my shirt through the hole in my pants, had pinned it to the chair, and in jumping up, I displayed to the admiring gaze of the astonished multitude a trade more white man than was pleasant. The women giggled, the men roared, and I got mad, but was finally put to bed, and all my troubles ended.

THE GATHERING STORM HAS BURST!

A. HEDGE & SON

Have just received a New Stock of

BOOTS AND SHOES,

HATS AND CAPS,

COLLARS, NECK TIES, GLOVES, HOSIERY, TRIMMINGS OF ALL DESCRIPTIONS.

POLITICAL PROSPECTS.

Many credulous persons in this State are sanguine enough to believe that the Johnson Democracy re-organized, tinkered and soured up at Philadelphia, will give the rebels all the power they fought for from 1861 to 1864. Can they give any reason for this faith? Not the remotest or the slightest. Help must be brought by the voters, and the North has the voters. Can Tennessee vote down Ohio? or Virginia vote down Pennsylvania? or Louisiana vote down Illinois? or Louisiana vote down Indiana? Granted that the Johnson Democracy get the undivided vote of the rebel States, how much nearer will the South be to the power than she is to-day? Johnson aims to consolidate the South. Perhaps he can, just as Jefferson Davis consolidated it in 1861, but we predict that the former consolidation will prove as baleful to our people as the latter.

Why run after the Philadelphia Convention, when it is powerless in the Federal Government? Consolidation in the South for the President consolidates the North for Congress. Every State in the North except New Jersey is under Republican control by a large majority, and New Jersey will not be an exception at the next election. The cause of Freedom and Equal Rights is going forth conquering and to conquer. The slave power is hopelessly crippled. Its head still wriggles and snaps its teeth, but its legs and arms are gone. It can neither strike nor advance. Every hour spent in a Democratic Convention time too fully wasted. The people might as well pass resolutions protesting against the course of the seas, or the flow of the Cumberland river, as to protest against the progress of Republicanism.

We are said to be practical people; let us have practical politics as well. Why follow hairbrained leaders whose nefarious appeals may stir up a mob but cannot argue down the hosts of destiny? The Republican party is our friend, and it is as powerful as it is friendly. It will be worth a hundred millions of capital to Tennessee if she will enroll herself in its all-conquering ranks. We have no slave property to protect, and why do we hesitate as to the path of duty and interest? Look at Ohio, Illinois and Indiana as examples of powerful and prosperous States guided by the precepts of Republicanism. Aye, look at Missouri; only a few months ago born dhand and foot by slavery, but now thriving bravely under the influence of a Republican State Government, and so-called Radical measures. It is time we were learning wisdom, and discarding the foolish leaders of Johnson Democracy. — *Nashville Press and Times.*

THE UNION BUT OF

Isaac Hooper's GROCERY & CONFECTIONERY!

MR. HOOPER would still have his friends and patrons bear in mind, that he continues in the Grocery and Confectionery trade at his usual place of doing business, and that he has just received

discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having investigated for years the cause and character of intermittents (fever and ague) in all parts of the United States, and the undersigned has discovered a new and safe method of curing the same, which is a protection to the lungs against all changes of weather in all climates having
