## PASSING EVENTS.

LOON .- Dr. JACOB ZUR BUCHAN, the well known expert marksman, on last Wednesday morning. (shot a loon on the first dam. This species of foul an not often seen in these parts.

Rain .-- The Conococheague was very much wollen by the heavy rains of last week. The farmsers on account of the rain wers very much hindered in planting corn. We are told that the "Marsh" was visited by a hail storm last Wednesday.

Borough Election .- The following ticket was elected at the Borough election, held on Tuesay, May 5th, 1863:

For Burgess-GEORGE H. DAVIDSON. For Town uncil-CHARLES HARTMAN, W. W. FLEMING, JER. STRICH. JOHN WILHELM, Jr., and A. K. WEIR .or High Constable-GEORGE GAFF.

Money from the 158th P. V.-This regibent was paid off about the last of April. Each private received fifty-eight dollars. The aggregate mount of money sent to this place for their friends nd families, was four thousand and seventy-six (\$4,076) dollars. The money is paid out at the express office, by the gentlemanly agent, Mr. EBY. It gives us pleasure to state that these men have at last been remembered by the Paymaster, and that they have sent home so large an amount of mon-

About Paving and Curbing.-We call the

ttention of the Town Council to an ordinance pased by the Council of 1862.

"Sec 1 Provides that the side-walks on Baltinore and Carlisle streets, shall be paved with brick, nd curbed with brick or stone. The side walks hall be ten feet wide.

"Sec. 2. Provides that all other streets, besides ose named, the side-walks shall be paved "with rick, flat stone, or black gravel," and be curbed ith stone or brick

"Sec. 3. Where the owners neglect or refuse to arb and pave, the street commissioner, under direcion of the corporate authorities, is empowered to the work, and keep accurate account of expen-

"Sec. 4. The expenses with tweaty percentum adance thereon, will be charged to the owner of the is, and collested according to law.

Sec. 5. Before the work is sommenced by any owner, he shall require the corporate authorities egulate the same."

Casualties in the 126th P. V .- The genal gloom which pervaded, the community was epened still more by news from the Army of the tomac. Great anxiety was manifested to know v our soldiers came out of the battle. And here must say, we are all very much indebted to the dness and promptness of our gentlemanly opera-, in furnishing us with all the intelligence from army which he was allowed to communicate. m dispatches, private letters, and published lists the N. Y. Herald, we make out the following list casualties.

Killed in company, K .-- 2nd Sergt. SIMON W. CPLEY and GRONGE MISSAVY. It seems from what can learn, they were not instantly killed, but d in a few hours from their wounds: their bodies obably buried on the other side of the river .-rgt. Rupley, was one of our most useful citizens. S. H. PRATHER & CO the time of his enlistment, he was extremely enged in various kinds of business. Not only his HAVE just received a large assortment of NEW iends, but the town, will also feel his loss. Corp. issavy was a hard working, industrious young n. In battle he was steady and unyielding, never avering, never unduly excited. Truly, the brave allen! Their virtues are too w uire the services of our humble pen. Wounded in Company B-M. W. Kissecker, slight-In hand; James Cleary, hip not serious; John hs, of Fulton county, leg; - Glenn of Fulton, Noy, do. Wounded in company K-Corp. Scott K. Snively, htly in foot; John Robinson, slightly in knee; ob Unger, slightly laft breast; Samuel Palmer, posed to be wounded ; Lieut. J. Gilmore Rowe, forchead with spent ball, not dangerous. Lieut.-Col D. Watson Rowe, had a hole through hat-ball grazed his cheek, but kept command the regiment all the time. It is thought that ut. Clay McCauley of company D, was killed. Missing-Jonathan Bowman of company B; and H. SNODIE (a later dispatch says, W. H. SNIVELY) company K. It is not yet ascertained whether se two are killed or were taken prisoners. We be the latter.

the 8th inst Immediate action was necessary .--Suggestions from the citizens were heard by the Committee of Arrangements. The greatest unanimity prevailed. Meeting adjourned to meet at the call of the Committee of Arrangements. HENRY P. PRATHER, Prest.

W. A. REID, Sec. At a subsequent meeting of the Committee of Arrangements, Dr. Charles Michael was chosen Chair-

man and W. A. Reid Secretaries. Committee on Correspondence .-- Messrs. Schaf hirt, Reid and Fetterhoff.

Committee to Wait on Clergy .- Messrs. Shirey, M'Crory and M'Lanahan.

Other committees to be appointed at next meeting.

It was agreed upon that on the day upon which it will be ascertained that the soldiers will arrive. timely notice shall be given to the people of the town and neighborhood, by the rirging of the Church Bells.\* After transaction of other business, committee adjourned to meet on Monday evening, 11th inst., ut 7 o'clock. W. A. REID, Sec. The veterans of 1812 and 1814, and survivors of

the Mexican War are expected to participate in the reception. \*Our citizens and country friends will please ob-

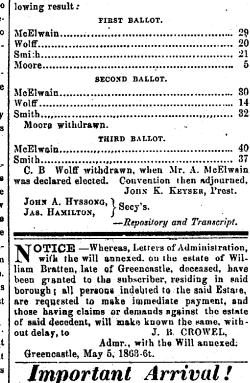

serve the above, and not become alarmed at the din created by the ringing of bells, and imagine it is a fire, -- [ED. PILOT.]

Directors' Convention .- A Convention of School Directors of Franklin County was held on May 4, 1863.

The members of the Press were invited to take seats in the Convention,

The salary of the County Superintendent was fixed at Six Hundred (\$600) Dollars.

The following named gentleman were then placed in nomination for County Superintendent : Andrew McElwain, Chambersburg; C. B. Wolff, Greensastle ; J. S. Smith, Antrim ; P. A. Mcore, Hamilton. The Convention proceeded to ballot with the fol-

WE are receiving goods every day from the eastern cities, and have ready for sale, the following list of articles, which we can solt che than sold elsewhere: White Flannels,

## VINELAND. TO ALL WANTING FARMS. New Settlement of Vineland. REMEDY FOR HARD TIMES.

A Rare Opportunity in the Best Market, and Most De lightful and Healthful Climate in the Union. Only thirty miles South of Philadelphia, on a Railroad; being a Rich, Heavy Soil, and Highly Productive Wheat Land; Amongst the Best in the Garden State of New Jersey. It consists of 20,000 acres of GOOD land, divided

into Farms of different sizes to suit the purchaser-FROM 20 ACRES AND UPWARDS—and is sold at the rate of from \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the balance by quarteryearly installments, with legal interest, within the term of four years.

The Soil is, in great part, a Rich Clay Loam, suitable for Wheat, Grass and Potatoes-also a dark and rich sandy leam, suitable for corn, sweet-potatoes, obacco, all kinds of vegetables and root crops, and the finest varieties of fruit, such as Grapes, Pears. Peaches, Apricots, Nectarines, Blackberries, Melens and other fruits, best adapted to the Philadelphia and New York Markets. In respect to the soil and crops there can he no mistake, as visitors can examne both, and none are expected to buy before so doing, and finding these statements correct—under these circumstances, unless these statements were sorrect, there would be no use in their being made. It is considered the best Fruit soil in the Union.

[See Reports of Solon Robinson, Esq., of the New York Tribune, and the well-known agriculturist. William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

The Market --- By looking over a map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphia twice a day, heing only thifty-two miles from the latter. Produce: this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price: whilst groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays wo prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, divine service, and all the advantages of elvilization, and he is near a large city. The Climate is delightful; the winters being sa-

lubrious and open, whilst the summers are no warmer than in the North. The loostion is upon the line of latitude with northern Virginia.

Persons Wanting a change of Climate for Health, would be much benefitted in Vineland. The mild-ness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspensia or general debility. Visitors will notice a difference in a few days. Chills and fevers are unknown. Conveniences at Hand .- Building material is plen-

ty. Fish and oysters are plenty and cheap. Visitors must expect, however, to see a new place.

Why the Property has not been Scilled Before ?---This question the reader naturally asks. It is be-cause it has been held in large tracts by families not Report of Solon Robinson,

OF THE NEW YORK TRIBUNE, UPON THE VINELAND SETTLEMENT.

The following is an extract from the report of Solon Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons can read this report with interest. Advantages of Farming near Home-Vineland-Re-

marks upon Marl-Soil, its great Fertility-The Cause of Fertility-Amount of Crops Produced-Practical Evidence. It is certainly one of the most extensive fertile tracts.

in an almost level position, and suitable condition for pleasant farming that we know of this side of the western prairies. We found some of the oldest farms apparently just as profitable productive as when first cleared of forest fifty or a hundred years ago. The geologist would soon discover the cause of this

continued fertility. The whole couptry is a marine deposit, and all through the soil we found evidences calcareous substances. generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the textiary formation ; and this marky substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate. Marl, in all its forms, has been used to fertilize

crops in England, from the time it was occupied by the Romans; and in France and Germany a mark bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field .---How much more valuable then it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the earth.

Having then satisfied our minds of the cause, they will not be excited with wonder at sceing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or at least appearances, is entirely unrenumerative except as its productiveness is promoted by artificial fertilization

A few words about the quality and value of this land for cultivation, of which we have some strong proof.

Our first visit was to William D. Wilson, Franklin township, Gloucester county, who purchased some eight miles north of Millville, about three years age, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also furnished sixteen miles of the road with ties, and has no doubt made the mill profitable, though his main object was to open a farm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some of his crops prove. For instance, last year, the second time of cropping, 306 bushels of pointoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was pointoes, planted among the roots, and yielded 75 bushels.-The potatoes were dug, and wheat sown, and yielded 16 bushels; and the stubble turned under and sown to buckwheat, which vielded 33% bushels and then the ground was sown to clover and timothy,

which gave as a first crop 24 tons per acre. The fertilizers applied to these crops were first, shes from clearings; second, 225 pounds of superphosphate of lime; third, 200 pounds Peruvian gu-ano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in for wheat.

Mr. Wilson's growing crops, and the wheat stubble of the present season, all indicate his land as productive as any part of the State. At Mary Barrow's, an old style Jersey woman

farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hives man how it was produced. We found that the land had been the year but one before in wheat. sown with clover, and this out one season, and last spring plowed once, with one "poor old nag," and planted with corn.

"Yes, but you manured high, we suppose ?" we said interrogatively, and got this reply

"Waal, you see, we couldn't a done that; 'cause we hadn't hut forty one-horse loads altogether, for 28 agres, and we wanted the most on't for the tryck.

The truck consisted of beets, carrots, cabbage, cucumbers, melons, &c., and a very productive patch of Lima beans, grown for marketing. So we were satisfied that the soil was not infertile, oven unaided by clover, which had fed the coin, because the "truck patch" had not been in cultivation long enough to obliterate all signs of the forest.

Our next visit was to the large farm of Andrew Sharp, five miles north of Millville, from half to a the railroad, and just about in th tre of Vineland, Mr. Sharp commenced work here in December. 1858, upon 270 acres. In less than three years, he has got 284 acres cleared and in crops this season, as well inclosed and divided into several fields, with cedar rail or pole fence; has built a two-story dwelling, about 36 by 40 feet, and a smaller house for farm laborers, and a stable and granary and some other out buildings. Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in July 4th to 20th, and yields 20 to 30 bushels per acre, harvested in November; when the land being sowed with 1501be of Peruvian guano and seeded with rye, yielded 12 to 15 bushels per acre and \$10 worth of straw. The rye stubble turned. after knocking off a large growth of oak sprouts, and dressed again with guano and sound it wheat, gave 15 or 16 bushels. The crop eeded to wheat, gave 15 or 16 bushels. which he was threshing while we were there promises more, of a very plump grain, and the straw is very heavy. We wont over the stubble, and found the clover and timothy, from seed sowed last spring, on the wheat without harrowing, looking as well as we ever saw it upon any old cultivated farm, and with a litle work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark per-manent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantes two tons per acre, if he will give the overplus if it over. runs the estimate. Part of the land was planted with potatees for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acre, and seeded with wheat and clover, yielded and average of over 15 bushels per acre, and the clover now looks beautiful. Other portions have been planted with corn as a first crop. which yielded 30 bushels of yellow fint corn, and the second crop 40 bushels, and the third crop, treated to 150lbs. of guano, we are sure no one would estimate below 40 bushels per acre. [The reader will recollect that the writer is now speaking of land perfectly new, and which can scarcely be considered in good arable condition -Ep.] In other cases, the corn crop of last year was followed with oats the season, not yet threshed, but will average probably 40 to 50 bushels. Sweet jutatoes, beans, melons, and, in fact, all garden vegetables, as well as young peach and other fruit trees planted this year show very plainly that this ong noglected tract of land should remain so no longer, and there is now a strong probability that it will not; for under the suspices of Mr. Laudis. will be divided into small lots, with roads located to accommodate all-the surveyor is now busy at his work-and all purchasers will be required to build neat comfortable houses, and either fence their lats in uniformity, or agree to live without fence. which would be preferable, by which means good population will be secured, who will establish churches, schools, stores, mills, mechanic ahops and homes-homes of American farmers, surrounded by gardens, orchards, fields and comforts of civilized life. If may one, from any derangement of business, s des.rous of changing his pursuits of life, or who is from any cause desirous to find a new location and cheap home in the country, and who may read and helieve what we have truly stated, he will da well to go and see for himself what may be seen within a two hours' ride e it of Philadelphia. SOLON ROBINSON.

## Physiological View of Marriage.

250 PAGES and 130 ENGRAVINGS -Price only twenty-five cents Sent free of postage to all par of the Union On the infirmities of youth and maturity, disclosing the secret follies of both sexes of all ages, causing debility, nervousness depression of spirits, palpitation of the heart, suicidal imaginings.involuntary emitsions, blushings defective memory, indigestion and lassitude, with confessions of thrilling interest of a Boarding School Miss, a College Student, and a Young Married Lady. fo, fc. It is a ruthful adviser to the married and hose contemplating marriage, who entertain secret doubts of their physical condition, and who are conscious of having hazarded the health, happiness and privilges to which every human being is entitled. YOUNG MEN who are troubled with weakness generally caused by a bad habit in youth the effects of which are dizz ess, pains, forgetfulness, some times a ringing in the ears. weak eves, weakness of the back and lower extremities, confusion of ideas. less of memory, with malancholy, may be cured by the author's NEW PARIS AND LONDON TREA I-MENT

We have, recently devoted much of our time in VISITING THE EUROPEAN HOSPITALS, avail ing ourselves of the knowledge and researches cf the most skilled physician and surgeous in Europe and the continent. Those who place themselves un-der our care will have the full benefit of the many NEW AND EFFICACIOUS REMEDIES which we are enabled to introduce into our practice, and the public may rest assured of the same zeal, assiduity Secrecy and attention being paid to their cases, which has so successfully distinguished us hereto fore, as a Puysician in our Peculiar department of protessional Practice. fer the past twenty-fiv years French Female Pills .- Ladies who wish for Medi cines, the efficacy of which has been tested in thou sands of cases, and never failed to effect speedy cures without any bad results, will use none but Dr. eLaney's Female Periodical Pills. The only precaution necessary to be observed is, ladies should nat take them if they have reason to believe they are in certain situations (the particulars of which will be found in the wrapper accompanying each box,) though always safe and heat hy, so gentle, yet so active and they,

disposed to sell, and being without railroad facilities they had few inducements. The Railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thorough investigation. Those who come with a view to settle, should bring money to secure their purchases, as locations are not held upon refusal. The Safest thing in Hard Times, where people have been thrown out of employment or business. and possess some little means or small incomes, is to start themselves a home. They can buy a piece of land at a small price, and earn more than wayes in improving it, and when it is done it is a certain independence and no 1388. A few acres in fruit trees will insure a comfortable living. The land is put down to hard-times, and all improvements can be made at a cheaper rate than most any other time. The whole tract, with six miles front on the rail-road, is being laid out with fine and spacious avenues, with 1 town in the centre-five acre lots in the town seli as from \$150 to \$200; two and a-half acre lots, at from \$80 to \$120, and town lots 50 feet front by 150 feet deep, at \$100-payable one-half cash

and use balance within a year. It is only upon farms of twenty acres, or more, that four years' time is given. To Manufacturers, the town affords a fine opening

for the Shoe manufacturing business, and other ar-ticles, being near Philadelphia, and the surrounding country has a large population, which affords a good market.

This settlement, in the course of several years. will be one of the most beautiful places in the country, and most agreeable for a residence.

It is intended to make it a Vine and Fruit growng country, as this culture is the most profitable

and the best adapted to the market. Every advantage and convenience for settlers will be introduced which will insure the prosperty of the place. The hard times throughout the country will be an advantage to the settlement, as it compels people to resort to agriculture for a living. Large numbers of people are purchasing, and the

people who desire the best location should visit the lace at once.

Improved Land is also for sale.

TIMBER .- Land can be bought with or without Timber. The Timber at market valuation. The title is indisputable. Warrantee Deeds given lear of all incumbrance, when the money is paid. Boarding conveniences at hand.
