item "Horse Stolen." The evil is wide spread. !s it owing to any general laxity of morals or disregard of law, upon the part of our people? Or is the example of the Southern "chivalry" contagious? Shall we make a retrogade in public honesty to the time in English history when princes and noblemen did not think it beneath them to plunder Canterbury pilgrims, or take purses from sich traders on their way to London? We trust not. So far as we have learned, the thieves, when discovered, belong to that pack of vultures who follow in the wake of armies for the sole object of booty. Too lazy to follow any honest calling, they pursue this; and it having be come a constant employment with them, they doubtless try to quiet their consciences that this is their business to steal, and, therefore, it is right; and like FALSTAPP, in a similar condition, declares, "Tis no sin for a man to labor in his vocation."-The uniform of the soldier is often worn to conceal their true character.

It is now time to put an end to this unrestrained violation of law. Let farmers and other owners of horses, organize themselves into clubs or companies for the detection and arrest of horse thieves. If a few of these miscreants are summarily dealt with, the Border will soon be rid of all of their tribe.

#### den Lane, Albany, N. Y. Cet 7,'62-1y VINELAND. TO ALL WANTING FARMS. New Settlement of Vineland.

EMEDY FOR HARD TIMES. A Rare Opportunity in the Best Market, and Most Detightful and Healthful Climate in the Union. Only thirty miles South of Philadelphia. on a Railroad; being a Rich, Heavy Soil, and Highly Productive Wheat Land; Amongst the Best in the Garden State

of New Jersey. It consists of 20,000 acres of GOOD land, divided into Farms of different sizes to suit the purchaser-FROM 20 ACRES AND UPWARDS—and is sold at the rate of from \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the balance by quarteryearly installments, with legal interest, within the

The Soil is, in great part, a Rich Clay Loam, suitable for Wheat, Grass and Potatoes—also a dark and rich sandy loam, suitable for corn, sweet-potatoes, tobacco, all kinds of vegetables and root crops, and the finest varieties of fruit, such as Grapes, Pears. Peaches, Apricots, Necturines, Blackberries, Melous and other fruits, best adapted to the Philadelphia and New York Markets. In respect to the soil and crops there can be no mistake, as visitors can examine both and none are expected to buy before so doing, and finding these statements correct-under these circumstances, unless these statements were correct, there would be no use in their being made. It is considered the best Fruit soil in the Union.

New York Tribune, and the well-known agriculturist. William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

The Market.---By looking over a map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce n this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price: whilst groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, di-Fringes, vine service, and all the advantages of civilization,

and he is near a large city.

The Climate is delightful; the winters being salubrious and open, whilst the summers are no warmer than in the North. The location is upon the line of latitude with northern Virginia.

Persons Wanting a change of Climate for Health, would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspepsia or

general debility. Visitors will notice a difference in a few days. Chills and fevers are unknown. Conveniences at Hand.—Building material is plenty. Fish and oysters are plenty and cheap.
Visitors must expect, however, to see a new place.

Why the Property has not been Settled Before?-This question the reader naturally asks. It is hecause it has been held in large tracts by families not disposed to sell, and being without railroad facilities they had few inducements. The Railroad has just been opened through the property this season, for

Visitors are shown over the land in a carriage. free of expense, and afforded time and opportunity for thorough investigation. Those who come with a view to settle, should bring money to secure theif purchases, as locations are not held upon refusal.

The Safest thing in Hard Times, where people have been thrown out of employment or business, and possess some little means or small incomes, is to themselves a home. They can buy a piece of land at a small price, and earn more than wases in improving it, and when it is done it is a certain independence and no 1385. A few acres in fruit trees will insure a comfortable living. The land is put down to hard times, and all improvements can be made at a cheaper rate than most any other time.

The whole tract, with six miles front on the rail road, is being laid out with fine and spacious aven ues, with a town in the centre-five acre lots in the town sell A from \$150 to \$200; two and a-half acre lots, at from \$80 to \$120, and town lots 50 feet front by 150 feet deep, at \$100-payable one-half cash and use balance within a year. It is only upon farms of twenty acres, or more, that four years' time is given.

To Manufacturers, the town affords a fine opening for the Shoe manufacturing business, and other ar-ticles, being near Philadelphia, and the surrounding country has a large population, which affords

This settlement, in the course of several years, will be one of the most beautiful places in the country, and most agreeable for a residence.
It is intended to make it a Vine and Fruit grow

ing country, as this culture is the most profitable and the best adapted to the market. Every advan-tage and convenience for settlers will be introduced which will insure the prosperty of the place. The hard times throughout the country will be an advan tage to the settlement, as it compels people to resort to agriculture for a living.

Large numbers of people are purchasing, and the cople who desire the best location should visit the lace at once. Improved Land is also for sale.

TIMBER.-Land can be bought with or without limber. The Timber at market valuation. The title is indisputable. Warrantee Deeds given

Roarding conveniences at hand. Letters promptly answered, and Reports of Solon Robinson and Wm. Parry sent, together with the Vineland Rural."

clear of all incumbrance, when the money is paid.

Route to the Land :- Leave Walnut street wharf. Philadelphia, at 9 o'clock, A. M., and 4 P. M., (unless there should be a change of hour,) for Vineland, on the Glassboro' and Millville Railroad. When you leave the cars at Vineland Station, just opened,

CHAS: K. LANDIS, Postmaster, Founder of the Colony, Vineland P. O., Cumberland Co., N. J.

DEITZ & M'DOWELL. Greencastle, April 21, 1863.

Report of Solon Robinson.

THE NEW YORK TRIBUNE, UPON THE VINELAND SETTLEMENT. The following is an extract from the report of Solon Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons can

re d this report with interest. Advantages of Farming near Home—Vineland—Remarks upon Marl—Soil, its great Fertility—The Cause of Fertility—Amount of Crops Produced— Practical Evidence.

It is certainly one of the most extensive fertile tracts.

in an almost level position, and suitable condition for pleasant furming that we know of this side of the western prairies. We found some of the oldest farms apparently just as profitable productive as when first cleured of forest fifty or a hundred years ago. The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences

of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the tertiary formation; and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate. Marl, in all its forms, has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a marl bed is counted on as a valuable bed of manure, that

can be dug and carted and spread over the field.—
How much more valuable then it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the earth. Having then satisfied our minds of thecause, they will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situa-

tions, having the same general characteristics or at least appearances, is entirely unrenumerative except as its productiveness is promoted by artificial fertil-

A few words about the quality and value of this land for cultivation, of which we have some strong Our first visit was to William D. Wilson, Franklin township, Gloucester county, who purchased some eight miles north of Millville, about three years ago, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new

railrond, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also, furnished sixteen miles of the road with ties. and has no doubt made the mill profitable, though his main object was to open a farm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some of his crops prove. For instance, last year, the second time of cropping, 306 bushels of potatoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was potatoes, [See Reports of Solon Robinson, Esq., of the leave York Tribune, and the well-known agriculturist. The potatoes were dug, and wheat sown, and yielded 16 bushels; and the stubble turned under and sown to buckwheat, which yielded 33% hushels; and then the ground was sown to clover and timothy,

which gave as a first crop 21 tons per acre.

The fertilizers applied to these crops were first, ashes from clearings; second, 225 pounds of superphosphate of lime; third, 200 pounds Peruvian guano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in

for wheat. Mr. Wilson's growing crops, and the wheat stub-ble of the present season, all indicate his land as

productive as any part of the State.

At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hired man how it was produced. We found that the land had been the year but one before in wheat. sewn with clover, and this cut one season, and last spring plowed once, with one "poor old nag," and planted

"Yes, but you manured high, we suppose?" we

said interrogatively, and got this reply: -"Wanl, you see, we couldn't a donc tant; 'cause we hadn t but forty one-horse loads altogether, for 23 acres, and we wanted the most on't for the truck.

The truck consisted of beets, carrots, cabbage, cucumbers, melons, &c., and a very productive patch of Lims beans, grown for marketing. So we were satisfied that the soil was not afertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been in cultivation long enough to

obliterate all signs of the forest. Our next visit was to the large farm of Andrew Sharp, five miles north of Millville, from half to a mile cast of the railroad, and just about in the centre of Vineland. Mr. Sharp commenced work here in December, 1858, upon 270 acres. In less than three years, he has got 234 acres cleared and in crops this season, as well inclosed and divided into several fields, with cedar rail or pole fence; has built a two-story dwelling, about 36 by 40 feet, and a smaller house for farm laborers, and a stable and granary and some other out buildings.

Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in July 4th to 20th, and yields 20 to 30 bushels per acre. harvested in November; when the land being sowed with 1501bs of Peruvian guano and seeded with rye, yielded 12 to 15 bushels per acre and \$10 worth of straw. The rye stubble turned, after knocking off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there promises more, of a very plump grain, and the straw is

very beavy. We went over the stubble, and found the clover and timothy, from seed sowed last spring, on the wheat without harrowing, looking as well as we ever eaw it upon any old cultivated farm, and with a little work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will quarantee two tons per acre, if he will give the overplus if it over-

Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acre, and seeded with wheat and clover, vielded and average of over 15 bushels per acre, and the clover now looks beau-

Other portions have been planted with corn as a first crop, which yielded 30 bushels of yellow corn, and the second crop 40 bushels, and the third crop, treated to 150fbs. of guano, we are sure no one would estimate below 40 bushels per acre. [The reader will recollect that the writer is now

speaking of land perfectly new, and which can

scarcely be considered in good arable condition -

In other cases, the corn crop of last year was followed with oats this season, not yet threshed, but will average probably 40 to 50 bushels. Sweet potatoes, beans, melons, and, in fact, all garden vegetables, as well as young peach and other fruit trees planted this year show very plainly that this long neglected tract of land should remain so no longer, and there is now a strong probability that it will not; for under the auspices of Mr Landis, it will be divided into small lots, with roads located to accommodate all-the surveyor is now busy at this work-and all purchasers will be required to build nest comfortable houses, and either fence their lots in uniformity, or agree to live without fence, which would be preferable, by which means a good population will be secured, who will establish churches, schools, stores, mills, mechanic shops and homes—homes of American farmers, surround-

ed by gardens, orohards, fields and comforts of civ-If may one, from any derangement of business. is desirous of changing his pursuits of life, or who s from any cause desirous to find a new location and cheap home in the country, and who may read and believe what we have truly stated, he will do well to go and see for himself what may be seen within a two hours ride out of Philadelphia.

SOLON ROBINSON.
