GREAT DISCOVERY!

KUNKEL'S Bitter Wine of Iron.

For the cure of weak stomachs, general debility, indigestion, diseases of the nervous system, constipation, acidity of the stomach, and for all cases requiring a tonic.

This wine includes the most agreeable and efficient Salt of Iron we possess: Citrate of Magnesia Oxide combined with the most energetic of vegetable tonics.

COUNTERFEITS.

Beware of Counterfeits.—As KUNKEL'S BITTER WINE OF IRON is the only pure and effectual remedy in the known world for Dyspepsia and Debility, and as there are a number of imitations offered to the public, we would caution the community to purchase none but the genuine article, manufactured by S. A. KUNKEL, and has his stamp on the top of the cork of every bottle.

General Depot, 118 Market St., Harrisburg, Pa. For sale in Greencastle, by J. H. HOSPIETER, and all respectable dealers throughout the county.

TO THE LADIES.

NEW MILLINERY GOODS.

MRS. KATE WUNDERLICH informs the Ladies of Greencastle and vicinity, that she has just received from the city a full assortment of the latest style Bonnets, Hats and Bonnet Trimmings, and all other articles usually kept by Milliners.

DISSOLUTION.—The partnership heretofore existing between the undersigned, doing business under the name and title of Haus & Bradley, was dissolved by mutual consent on the 1st day of October, 1863.

The firm most respectfully return their thanks to the public for past patronage, and solicit for the present proprietor a continuance of the same.

\$100 REWARD for a medicine that will cure Coughs, Influenza, Tickling in the Throat, Whooping Cough, or relieve Consumptive Cough, as quick as COE'S COUGH BALSAM.

Over Five Thousand Bottles have been sold in its native town, and not a single instance of its failure is known.

It does not Dry up a Cough, but loosens it, so as to enable the patient to expectorate freely.

No family should be without it. It is within the reach of all, the price being only 25 Cents.

Do not waste away with Coughing, when so small an investment will cure you. It may be had of any respectable Druggist in town, who will furnish you with a circular of genuine certificates of cures it has made.

Johnston, Holloway & Cowden, 23 North Sixth Street, Philadelphia, Pa. For sale by Druggists in city, county, and every where.

GREENCASTLE SEMINARY.

MALE AND FEMALE. The subscriber will open a Male and Female Seminary at Greencastle, on the first Monday of October next.

J. W. BARR'S Mammoth Stove and Tinware Store Room, A few doors South of the Diamond, Greencastle, Pa.

COOK, PARLOR AND NINE-PLATE Stoves. Among them are the Continental, Noble Cook, Commonwealth and Charm, which he will sell cheap for cash.

Tin, Japanned and Sheet Iron Ware, in great variety.

SPROUTING of the best material, for houses, &c., manufactured and put up at the shortest notice.

PORTRAITS OF OUR HEROES.—The Franklin Repository of the 29th July contains an excellent Portrait of Maj. Gen. Geo. G. Meade, the Hero of Gettysburg, and the number for August contained an admirable Portrait of Maj. Gen. U. S. Grant, the Hero of Vicksburg.

THE FRANKLIN REPOSITORY is printed on a large Double Sheet of Forty-Eight Columns. Price \$2 per annum; \$1 for six months.

DISSOLVED.—The firm of Schaffhirt, Wunderlich & Co., of Greencastle, and Wunderlich, Nead & Co., of Chambersburg, were dissolved by mutual consent on Sept. 1st, 1863.

Hereafter the business will be conducted at Greencastle by A. F. Schaffhirt, and at Chambersburg by Wunderlich & Nead.

A continuance of the liberal patronage heretofore extended is respectfully solicited.

A. F. SCHAFFHIRT, WUNDERLICH & NEAD. Greencastle, Sept. 8, 1863.

AMERICAN TEA COMPANY,

51 Vesey Street, New York.

Since its organization, has created a new era in the history of

Wholesaling Teas in this Country. They have introduced their selections of Teas, and are selling them at not over Two Cents (.02 Cents) per pound above Cost, never deviating from the ONE PRICE asked.

Another peculiarity of the company is that their TEA TASTER not only devotes his time to the selection of their Teas as to quality, value, and particular styles for particular localities of country, but he helps the TEA BUYER to choose out of their enormous stock such TEAS as are best adapted to his peculiar wants, and not only this, but points out to him the best bargains.

This enables all Tea buyers—no matter if they are thousands of miles from this market—to purchase on as good terms here as the New York merchants.

Parties can order Teas and will be served by us as well as though they came themselves, being sure to get original packages, true weights and tares; and the Teas are warranted as represented.

We issue a Price List of the Company's Teas, which will be sent to all who order it: comprising Hyson, Young Hyson, Imperial, Gunpowder, Twankay and Skin.

Oolong, Souchong, Orange and Hyson Pekoe, Japan Tea of every description, colored and uncolored.

This list has each kind of Tea divided into Four Classes, namely: CARGO, high CARGO, FINE, FINEST, that every one may understand from description and the prices annexed that the Company are determined to undersell the whole Tea trade.

We guarantee to sell all our Teas at not over TWO CENTS (.02 Cents) per pound above cost, believing this to be attractive to the many who have heretofore been paying enormous profits.

Great American Tea Company, Importers and Jobbers, Sept. 15, 1863-3m.] No. 51 Vesey St., N. Y.

SECOND SUPPLY OF SPRING AND SUMMER GOODS!

S. H. PRATHER & CO.

Report of Solon Robinson, OF THE NEW YORK TRIBUNE, UPON THE VINELAND SETTLEMENT.

The following is an extract from the report of Solon Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons can read this report with interest.

Advantages of Farming near Home—Vineland—Remarks upon Marl—Soil, its great Fertility—The Cause of Fertility—Amount of Crops Produced—Practical Evidence.

It is certainly one of the most extensive fertile tracts, in an almost level position, and suitable condition for pleasurable farming that we know of this side of the western prairies.

The geologists would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the tertiary formation; and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate.

Marl, in all its forms, has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a marl bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field.

How much more valuable than it must be, when found already mixed through the soil, where no particles need be turned up and exposed, and transformed to the owner's use every time he stirs the earth.

I have never been excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or at least appearances, is entirely unproductive except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this land for cultivation, of which we have some strong proof.

Our first visit was to William D. Wilson, Franklin township, Gloucester county, who purchased some eight miles north of Millville, about three years ago, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long.

He also furnished sixteen miles of the road with ties, and has no doubt made the mill profitable, though his main object was to open a farm, having become convinced that the soil was valuable for cultivation.

In this he has not been disappointed, as some of his crops prove. For instance, last year, the second time of cropping, 306 bushels of potatoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was potatoes, planted among the roots, and yielded 75 bushels—The potatoes were dug, and wheat sown, and yielded 16 bushels; and the stubble turned under and sown to buckwheat, which yielded 23 bushels; and then the ground was sown to clover and timothy, which gave as a first crop 24 tons per acre.

The fertilizers applied to these crops were first, ashes from clearings; second, 225 pounds of superphosphate of lime; third, 200 pounds of guano; and then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in for wheat.

Mr. Wilson's growing crops, and the wheat stubble of the present season, all indicate his land as productive as any part of the State.

At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the land man how it was produced. We found that the land had been the year but one before in wheat, sown with clover, and this cut one season, and last spring plowed once, with one "poor old nag," and planted with corn.

"Yes, but you manured him, we suppose?" we said interrogatively, and got this reply:—"No, because we had cut but forty one-horse loads altogether, for 23 acres, and we wanted the most out for the truck.

The truck consisted of beets, carrots, cabbage, cucumbers, melons, &c., and a very productive patch of Lima beans, grown for marketing. So we were satisfied that the soil was not a fertile, even unaided by clover, which had fed the cows, because the "truck patch" had not been in cultivation long enough to obliterate all signs of the forest.

Our next visit was to the large farm of Andrew Sharp, five miles north of Millville, from half to a mile east of the railroad, and just about in the centre of Vineland. Mr. Sharp commenced work here in December, 1858, upon 270 acres. In less than three years, he has got 234 acres cleared and in crops this season, as well inclosed and divided into several fields, with cedar rail or pole fence; has built a two-story dwelling, about 36 by 40 feet, and a smaller house for farm laborers, and a stable and granary and some other out buildings.

Considerable part of the land was cleared for the plow at \$9 an acre, and on some of it the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in July 14 to 20th, and yields 20 to 30 bushels per acre, harvested in November; when the land being sowed with 150 lbs of Peruvian guano and seeded with rye, yielded 12 to 15 bushels per acre and \$10 worth of straw. The rye stubble turned, after knocking off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there promises more, of a very plump grain, and the straw is very heavy.

We went over the stubble, and found the clover and timothy, from seed sowed last spring, on the wheat without harrowing, looking as well as we ever saw it upon any old cultivated farm, and with a little work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantee two tons per acre, if he will give the surplus if it exceeds the estimate.

Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acre, and seeded with wheat and clover, yielded and average of over 15 bushels per acre, and the clover now looks beautiful.

Other portions have been planted with corn as a first crop, which yielded 30 bushels of yellow and red corn, and the second crop of guano, and the third crop, treated to 150 lbs. of guano, we are sure no one would estimate below 40 bushels per acre.

[The reader will recollect that the writer is now speaking of land perfectly new, and which can scarcely be considered in good arable condition—Ed.]

In other cases, the corn crop of last year was followed with oats this season, and the wheat, which will average probably 40 to 50 bushels. Sweet potatoes, beans, melons, and, in fact
