D

we would never see the end. How long those weeks seemed. We had lived a lifetime in a few days, so great and marvelous had been the changes and events which had taken place around and smong us. The coming of DAHLGREN was the first gleam of the sunshine of hope from under the dark jowering cloud of despotism. How bright and beautiful seemed the blue uniforms; how gentlemanly the men were; how, more than ever, were detested the filthy garments and the wretched rebels themgeives, Capts. DAHLOREN and CLINE and Lieut Whitsrond, and their gallant men, were our deliverers. The next morning (Sunday) they made a dash on the rebel wagon train then on the reireat. Monday evening, the 6th, DALHGREN led a force in-10 Hagerstown, and made a brilliant charge through the streets of that town, right into the centre of the rebel army. It was there he was wounded in the ankic, and was afterwards compelled to suffer amputation For this instance of his bravery he was appointed by the President, Col. of the Third U.S. Cavalry.

Although very young, being only 22 years of age, he was distinguished in the army of the Potomac as su officer of lofty courage, brilliant and dashing. but without recklessness; the very soul of honor; quiet but firm; not only admired but loved.

"A form more active. light and strong, Ne'er shot the ranks of war along."

As greateful citizens we can never forget him. Years may pass, but his memory will ever be green in every honest heart.

lt is true he has fallen, but

"They never fail who die In a great cause." "And they who for their country die, Shall fill an honored grave : For glory lights the soldier's tomb, And beauty weeps the brave.'

CHEAP PASSAGE TO AND FROM GREAT BRITAIN AND IRELAND, TAPSCOTT BROTHERS & CO'S Emigration & Foreign Exchange Office,

5-20'S.

THE Secretary of the Treasury has not yet given L notice of any intention to withdraw this popular Loan from Sale at Par, and until ten days no tice is given, the undersigned, a. "GENERAL SUBSCRIPTION AGENI," will continue to supply the public.

U.

. .

The whole amount of the Loan authorized is Five Hundred Millions of Dollars. NEARLY FOUR HUNDRED MILLIONS HAVE BEEN ALREADY SUBSCRIBED FOR AND PAID INTO THE TREA-SURY, mostly within the last seven months. The large demand from abroad, and the rapidly increasing home demand for use as the basis for circula tion by National Banking Associations now organizing in all parts of the country. will, in a very short period, absorb the balance. Sales have lately ranged from ten to tifteen millions weekly, frequently exceeding three millions daily, and it is well known that the Secretary of the Treasury has ample and unfailing resources in the Duties on Imports and Internal Revenues, and in the issue of the Interest bearing Legal Tender Treasury Notes, it is almost a certainty that he will not find it necessary, for a long time to come, to seek a market for any other long or permanent Lonns, THE IN-TEREST AND PRINCIPAL OF WHICH ARE PAY-ABLE IN GOLD.

Prudence and self-interest must force the minds of those contemplating the formation of National Banking Associations, as well as the minds of all who have idle money on their hands, to the prompt conclusion that they should lose no time in subscribing to this most popular Loan. It will soon be beyond their reach, and advance to a handsome premium, as was the result with the "Seven Thirty" Loan, when it was all sold and could no longer be

subscribed for at par. IT IS A SIX PER CENT LOAN, THE INTEREST AND PRINCIPAL PAYABLE IN COIN, THUS VIELDING OVER NINE PER CENT, PER ANNUM at the present rate of premium on soin.

The Government requires all duties on importato he paid in Gold : these duties for a long time past amounted to over a Quarter of a Million of Dollars daily, a sum nearly three times greater than that required in the payment of the interest on all the 5-20's and other permanent Loans. So that it is hoped that the surplus Com in the Treasury, at no distant day, will enable the United States to resume specie payments upon all liabilities.

The Loan is called 5-20 from the fact that Bonds may run for 20 years, yet the Government has a right to pay them off in Gold at par, at any time after 5 years. THE INTEREST IS PAID HALF-YEARLY, viz:

on the first days of November and May. Subscribers can have Coupon Bonds, which are payable to bearer, and are \$5<sup>\*</sup>, \$100, \$500, and \$1000); or Registered Bonds of same denominations, and in addition, \$5,000, and \$10,000. For Banking purposes and for investments of Trust-monies the Registered Bonds are preferable.

These 5-20's can be taxed by States, cities, towns, or counties, and the Government tax on them is anty one-and-a-half per cent.. on the amount of income, when the income of the holder exceeds Six Hundred dollars per annum : all other investments such as income from Mortgages, Railroad Stock and Bouls etc., must pay from three to five per Hyson, Young Hyson, Imperial, Gun- To Manufacturers, the town affords a fine opening

VINEEAND.TO ALL WANTING FARMS. New Settlement of Vineland.

EMEDY FOR HARD TIMES. A Rare Opportunity in the Best Market, and Most Delightful and Healthful Climate in the Union. Only thirty miles South of Philadelphia. on a Railroad; being a Rich, Heavy Soil, and Highly Productive Wheat Land ; Amongst the Best in the Garden State of New Jersey. It consists of 20,000 acres of GOOD land, divided

into Farms of different sizes to suit the purchaser-FROM 20 ACRES AND UPWARDS-and is sold at the rate of from \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the balance by quarter yearly installments, with legal interest, within the term of four years.

The Soil is, in great part, a Rich Clay Loam, suit-able for Wheat, Grass and Potatoes-also a dark and rich sandy leam, suitable for corn, sweet-potatoes, tobacco, all kinds of vegetables and root crops, and the finest varieties of fruit, such as Grapes, Pears, Peaches, Apricots, Necturines, Blackberries, Melens and other fruits, best adapted to the Philadelphia soil, in a very comminuted form, and in the exact and New York Markets. In respect to the soil and condition most easily assimilated by such plasauts crops there can be no mistake, as visitors can examine both, and none are expected to buy before so doing, and finding these statements correct-under these circumstances, unless these statements were correct, there would be no use in their being made. It is considered the best Fruit soil in the Union.

[See Reports of Solon Robinson, Esq., of the New York Pribune, and the well-known agriculturist. William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

The Market.---By looking over a map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce r this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price: whilst groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, divine service, and all the advantages of civilization, and he is near a large city.

The Climate is delightful; the winters being salubrious and open, whilst the summers are no warm-er than in the North. The location is upon the line of latitude with northern Virginia.

Persons Wanting a change of Climate for Health, would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspepsia or general debility. Visitors will notice a difference in

a few days. Chills and fevers are unknown. Conveniences at Hand.—Building material is plen-ty. Fish and oysters are plenty and cheap.

Visitors must expect, however, to see a new place. Why the Property has not been Settled Before ?-This question the reader naturally asks. It is because it has been held in large tracts by families not disposed to sell, and being without railroad facilities they had few inducements. The Railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thorough investigation. Those who come with a view to settle, should bring money to secure their purchases, as locations are not held upon refusal. The Safest thing in Hard Times, where people have been thrown out of employment or business, and possess some little means or small incomes, is to start themselves a home. They can buy a piece of land at a small price, and earn more than wayes in with clover, and this out one season, and last spring improving it, and when it is done it is a certain in-plowed once, with one "poor old nag," and planted dependence and no 1529. A few acres in fruit trees will insure a comfortable living. The land is put down to hard-times, and all improvements can be

nade at a cheaper rate than most any other time. The whole tract, with six miles front on the railroad, is being laid out with fine and spacious aven-

nes, with a town in the centre-five acre lots in the Parties can order Teas and will be served by us town sel, at from \$150 to \$200; two and a-half acre lots, at from \$80 to \$120. and town lots 50 feet front by 150 feet deep, at \$100-payable one-half cash and the balance within a year. It is only upon farms of twenty acres, or more, that four years

he Shoe manufacturing business, and other ar s, being near Philadelphia, and the surrounding mile east of the railroad, and just about in the centry has a large population, which affords a l niarket. his settlement, in the course of several years. be one of the most beautiful places in the coun-

Report of Selon Robinson. OF THE NEW YORK TRIBUNE, UFON THE

VINELAND SETTLEMENT

for The following is an extract from the report of Solon Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons con read this report with interest.

Advantages of Farming near Home-Vineland-Re-marks upon Marl-Soil, its great Fortility-The Cause of Fertility-Amount of Crops Produced-Practical Evidence.

It is certainly one of the most extensive fertile tracts, in an almost level position, and suitable condition for pleasant farming that ws know of this side of the west-ern prairies. We found some of the oldest farms apparently just as profilable productive as when first cleared of forest fifty or a hundred years ago. The geologist would soon discover the cause of this

continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous mar!, showing many distinct forms of ancient shells, of the tertiary formation : and this marly substance is scattered all through the the farmer desires to cultivate.

Marl, in all its forms; has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a mart bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field .---How much more valuable then it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the earth.

Having then satisfied our minds of the cause, they will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or at least appearances, is entirely unrenumerative except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this lang for cultivation, of which we have some strong proof.

Our first visit was to William D. Wilson, Franklin township, Gloucester county, who purchased some eight-miles north of Millville, about three years ago, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also furnished sixteen miles of the road with ties, and has no doubt made the mill profitable, though his main object was to open a farm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some of his crops prove. For instance, last year, the second time of cropping, 306 bushels of potatoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was pointoes, planted among the roots, and yielded 75 bushels.-The potatoes were dug, and wheat sown, and yielded 16 bushels; and the stubble turned under and sown to buckwheat, which yielded 333 hushels; and then the ground was sown to clover and timothy, which gave as a first crop 21-tons per acre.

The fertilizers applied to these crops were first, ashes from clearings: second, 225 pounds of super-phosphate of lime; third, 200 pounds Peruvian guano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in for wheat

Mr. Wilson's growing crops, and the wheat stub-ble of the present season, all indicate his land as productive as any part of the State.

At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hires, man how it was produced. We found that the land had been the year but onc before in wheat, sown with corn.

"Yes, but you manured high, we suppose ?" we 

we hadn't hut forty one-horse loads altogether, for 23 acres, and we wanted the most on't for the truck. The truck consisted of beets, carrots, cabbage, cucumbers, melons, &c., and a very productive patch of Lima beans, grown for marketing. So we were satisfied that the soil was not infertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been in cultivation long enough to obliverate all signs of the forest.

Our next visit was to the large farm of Andrew Sharp, five miles north of Millville, from half to a

## The Great

AMERICAN TEA COMPANY, 51 Vesey Street, New York;

Since its organization, has created a new era in the history of

Wholesaling Teas in this Country. They have introduced their selections of Teas, and are selling them at not over Two Cents (.02 Cents) per pound above Cost, never deviating from the ONE PRICE asked.

Another peculiarity of the company is that their TEA TASTER not only devotes his time to the selection of their Teas as to quality, value, and particular styles for particular localities of country, but he helps the TEA buyer to choose out of their enormous stock such TEAS as are best adapted to his peculiar wants, and not only this, but points out to him the best bargains. It is easy to see the incalculable advantage a TEA BUYER has in this establishment over all others. If he is no judge of TEA, or the MARKET. if his time is valuable, he has all the benefits of a well organized system of doing business, of an immense capital, of the judyment of a professional Tea Taster, and the knowledge of superior salesmen.

This enables all Tea buyers-no matter if they are thousands of miles from this market-to purchase on as good terms here as the New York merchants

as well as though they came themselves, being sure to get original packages, true weights and tares; and the Teas are warranted as represented.

We issue a Price List of the Company's Teas. which will be sent to all who order it; comprising time is given.

IRWIN. of Greencastle, Frankcounty, Pa., under the firm and style of A. L. wix & Son, has been this day dissolved by mutual sent. The Books and Accounts of the late firm in the hands of A. L. Inwin for collection. All sons indebted to the late firm, are requested to ke immediate payment.

A. L. IRWIN. JAMES M. IRWIN. Greencastle, May 7, 1863.

The undersigned have this day (May 7. 1863. rmed a copartnership, under the name and style Inwin & RHOADS, and having purchased the hole stock of goods, lately belonging to A. L. Inx & Sox, respectfully inform the people of Greenstle and surrounding country, that they will conue the business on the South-east corner of the tblic Square, where they invite all persons need g Hardware, Oils and Paints to give them a call d examine their stock. Most of the goods have en purchased before the advance in prices in the ties, and will be sold greatly below their present and homes—homes of American farmers, surround-lue. Persons in need of Building Hardware, can ed by gardens, crchards, fields and comforts of civ-stain it at this house, cheaper than any where else ilized life. the county. Come where you can always get the orth of your money.

JAMES M. IRWIN. CHARLES W. RHODES. Greencastle, May 12, 1863.-tf.

SALE BILLS PRINTED HERE, NEATLY AND | within a two hours" cide out of Philadelphia. HEAP

tre of Vineland. Mr. Sharp commenced work here in December, 1858, upon 270 acres. In less than three years, he has got 234 acres cleared and in crops this season, as well inclosed and divided inta several fields, with cedar rail or pole fence; has built a two-story dwelling, about 36 by 40 feet, and a smaller house for farm laborers, and a stable and

plow at \$9 an acre. and on some of it the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in July 4th to 20th, and yields 20 to 30 bushels per acre, harvested in November; when the land being sowed with 150lbs of Peruvian guano and seeded with rye, yielded 12 o 15 bushels per sore and \$10 worth of straw. The velstubble turned, after knocking off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there promises more, of a very plump grain, and the straw is

very heavy. We went over the stubble, and found the clover and timothy, from seed sowed last spring, on the wheat without harrowing, looking as well as we ever saw it upon any old cultivated farm, and with a little work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantee two tons per acre, if he will give the overplus if it neer-runs the estimate.

Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acro. and seeded with wheat and clover, yielded and avorage of over 15 bushels per acro, and the clover now looks bean-

Other portions have been planted with corn as a first crop, which yielded 30 hushels of yellow fint corn, and the second crop 40 bushels, and the third crop, treated to 150lbs. of guano, we are sure no one would estimate below 40 bushels per acre.

[The reader will recollect that the writer is now speaking of land perfectly new, and which can carcely be considered in good arable condition -ED.]

In other cases, the corn crop of last year was followed with oats this season, not yet threshed, but will average probably 40 to 50 bushels. Sweet potaloes, beans, melons, and, in fast, all garden yeg-etables, as well as young peach and other fruit trees planted this year show very plainly that this long-neglected iract of land should remain so no longer, and there is now a strong probability that it will not; for under the auspices of Mr. Landis, it will be divided into small lots, with roads located to accommodate all-the surveyor is now busy at this work-and all purchasers will be required to, build neat comfortable houses, and either fence their lots in uniformity, or agree to live without fence, which would be preferable, by which means a good population will be secured, who will establish churches, schools, stores, mills, mechanic shops

If may one, from any derangement of business, is desirous of changing his paraults of life, or who is from any cause desirous to find a new location and cheap home in the constry, and who may read und believe what we have truly stated, he will do well to go and see for himself what may be seen

SOLON ROBINSON,
