Coron and Provost Murshal ETSTER, and get certifcates, allowing them to keep such property, and when taken they should go to Hagerstown before the military authorities, where their claims will be heard, and if properly substantiated the property will be returned. Persons ought not to purchase horses that are known to have been with any of the armies. The business of gathering them up by officials might be done with a good deal more system and more prudence; and if the agents genersily, had more sense the matter would be conducted more satisfactorily to all parties.

Cupid's Doings .- It is high time for our merry bachelor friends to feel serious. Like the ranks of a war worn regiment, the circle of our unmarriried male acquaintances presents a diminished front. One by one their lists are forsaken. The last twelve-month they have lost heavily in numbers. It is as much our pleasure as our duty, to chronicle the last instance of such desertion. At an early hour, on a beautiful Spring morning, he stood before a loving Father to be joined in wedlock to his affianced bride. Does the reader ask whom we mean ? Under THE ALTAR head you will find the name-Ray. C. B. WOLFF, whilom of this place. There, too, the lady's name you'll find-one of refinement, intelligence and modesty, pure "as is the lily," well worthy of his love-a lovely flower to be transplanted to his mountaim home. Then, "Oh, Hymen smile upon thy rite !" and may this union prove to be

· Where two congenial souls unito. Thy golden chains inlaid with down."

In eastern cities their honey moon is being spent. Love, music, art and science, now engage their attention, but when this is over and they are nestled . down in their quiet rural home in the "mountain's sheltering bosom," may their days; be many and pass pleasantly as the balmy days of Spring. In the distribution of the wedding cake, the Printer was not forgotten, as the fragments of a basket of nice cake attest. All hands unite in expressing thanks.

## THE ALTAR.

THE Secretary of the Treasury has not yet given L notice of any intention to withdraw this pop-ular Loan from Sale at Par, and until ten days notice is given, the undersigned, sale GENERAL SUBSCRIPTION AGENT," will continue to supply the public.

The whole amount of the Loan anthrized is Five Hundred Millions of Dollars. NEARLY FOUR HUNDRED MILLIONS HAVE BEET ALREADY SUBSCRIBED FOR AND PAID INTOTHE TREA-SURY, mostly within the last seven months. The large demand from abroad, and the raddly increasing home demand for use as the basil for circula. tion by National Banking Association now organizing in all parts of the country. wil, in a very short period, absorb the balance. Sass have lately ranged from ten to tifteen millionsweekly, frequently exceeding three millions day, and it is well known that the Secretary of the reasury has ample and unfailing resources in the Duties on Imports and Internal Revenues, and if the issue of the Interest bearing Legal Tender Tresury Notes, it is almost a certainty that he will not find it necessary, for a long time to come, to sek a market for any other long or permatent Loas, THE IN-TEREST AND PRINCIPAL OF WHICLARE PAY-ABLE IN GOLD.

Prudence and self-interest must fore the minds of those contemplating the formation of National Banking Associations, as well as the hinds of all who have idle money on their hands, t the prompt conclusion that they should lose no me in subscribing to this most popular Loan. It will soon be beyond their reach, and advance to handsome premium, as was the result with the "Seen Thirty" Loan, when it was all sold and could in longer be

subscribed for at par. IT IS A SIX PERCENT LOAN, THE NTEREST AND PRINCIPAL PAYABLE IN CIN, THUS YIELDING OVER NINE PER CENT. PR ANNUM at the present rate of premium on coin

The Government requires all duties of imports to be paid in Gold : these duties for a low time past amounted to over a Quarter of a Millio of Dollars daily, a sum nearly three times great than that required in the payment of the interes on all the 5-20's and other permanent Loans. S that it is hoped that the sarplus Coin in the Treaury, at no distant day, will enable the United State to resume specie payments upon all liabilities.

The Loan is called 5-20 from the fact hat Bonds may run for 20 years, yet the Governient has a after 5 years. THE INTEREST IS PAID HALF-VERLY, viz:

on the first days of November and May Subscribers can have Coupon Bonds which are payable to bearer, and are \$50, \$100\$500, and \$1000; or Registered Bonds of same enomina-tions, and in addition, \$5,000, and \$1000. For Banking purposes and for investment of Trustmonies the Registered Bonds are preferple.

These 5-20's can be taxed by States, cies, towns, or counties, and the Government tax a them is only one-and-a-half per cent.. on the amount of income, when the income of the holder epacds Six farms of twenty acres, or more, that four years' Hundred dollars per annum; all other inestments time is given. such as income from Mortgages, Railrud Stock

### VINEEAND. TO ALL WANTING FARMS. New Settlement of Vineland.

EMEDY FOR HARD TIMES. А A Rare Opportunity in the Best Market, and Most Delightful and Healthful Climate in the Union. Only thirty miles South of Philadelphia, on a Railrond; being a Rich, Heavy Soil, and Highly Productive Wheat Land; Amongst the Best in the Garden State of New Jersey. It consists of 20,000 acres of GOOD land, divided

into Farms of different sizes to suit the purchaser-FROM 20 ACRES AND UPWARDS—and is sold at the rate of from \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the balance by quarter yearly installments, with legal interest, within the

term of four years. The Soil is, in great part, a Rich Clay Loam, suit-able for Wheat, Grass and Potatoes—also a dark and rich sandy loam, suitable for corn, sweet-potatoes, tobacco, all kinds of vegetables and root crops, and he finest varieties of frnit, such as Grapes, Pears, Peaches, Apricots, Nectarines, Blackberries, Melons and other fruits, best adapted to the Philadelphia and New York Markets. In respect to the soil and crops there can he no mistake, as visitors can exam-ine both, and none are expected to buy before so doing, and finding these statements correct-under these circumstances, unless these statements were correct, there would be no use in their being made. It is considered the best Fruit soil in the Union. [See Reports of Solon Robinson, Esq., of the New York Tribune, and the well-known agriculturist, William Parry, of Cinnaminson, New Jersey, which

will be furnished inquirers.] The Market.---By looking over a map the reader will perceive that it enjoys the best market in the Un-ion, and has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce 12 this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price: whilst groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, divine service, and all the advantages of civilization, and he is near a large city: The Climate is delightful; the winters being sa-

lubrious and open, whilst the summers are no warm-er than in the North. The location is upon the line of latitude with northern Virginia.

Persons Wanting a change of Climate for Health, would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspepsia or general debility. Visitors will notice a difference in a few days. Chills and fevers are unknown. Conveniences at Hand.—Building material is plen-

ty. Fish and oysters are pienty and chemp. Visitors must expect, however, to see a new place. Why the Property has not been Settled Before ?---This question the reader naturally asks. It is because it has been held in large tracts by families not disposed to sell, and being without railroad facilities they had few inducements. The Railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thorough investigation. Those who come with a view to settle, should bring money to sceure their. purchases, as locations are not held upon refusal. The Safest thing in Hard Times, where people have been thrown out of employment or business. and possess some little means or small incomes, is to may run fer 20 years, yet the Governent has a start themselves a home. They can buy a piece of land at a small price, and earn more than wayes in after 5 years. dependence and no io: A few acres in fruit trees will insure a comfortable living. The land is put down to hard times, and all improvements can be made at a cheaper rate than most any other time. The whole tract, with six miles front on the railroad, is being laid out with fine and spacious' avenues, with a town in the centre-five acre lots in the town sell at from \$150 to \$200; two and a-half acre lots, at from \$80 to \$120, and town lots 50 feet front by 150 feet deep, at \$100-payable one-half cash and the balance within a year. It is only upon

To Manufacturers, the town affords a fine opening

Report of Solon Robinson,

OF THE NEW YORK TRIBUNE, UPON THE

VINELAND SETTLEMENT Ber The following is an extract from the report

of Solon Robinson, Esq., published in the New York Tribune, in reference to Vincland. All persons can read this report with interest. Advantages of Farming near Home-Vineland-Re-

marks upon Marl-Soil, its great Fertility-The Cause of Fertility-Amount of Crops Produced-Practical Evidence.

It is certainly one of the most extensive fertile tracks, in an almost level position, and suitable condition for pleasant farming that we know of this side of the western proiries. We found some of the oldest furms apparonly just as profitable productive as when first cleared of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the tertiary formation : and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plasants the farmer desires to cultivate.

Marl, in all its forms, has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a mar, bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field .---How much more valuable then it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's se every time he stirs the earth.

Having then satisfied our minds of thecause, they will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or at east appearances, is entirely unrenumerative except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this lanu for cultivation, of which we have some strop proof.

Our first visit was to William D. Wilson, Frankliv township, Gloucester county, who purchased son-eight miles north of Millville, about three years age for the purpose of establishing a steam mill, to worl up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also furnished sixteen miles of the road with the and has no doubt made the mill profitable, thoug his main object was to open a farm, having becom convinced that the soil was valuable for cultivation In this he has not been disappointed, as some of his crops prove. For instance, last year, the secon . time of cropping, 306 bushels of potatoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was potatoes, planted among the roots, and yielded 75 bushels .--The potatoes were dug, and wheat sown, and yielded 16 bushels; and the stubble turned under and sown to buckwheat, which yielded 33% bushels; and then the ground was sown to clover and timothy,

which gave as a first crop 24 tons per acre. The fertilizers applied to these crops were first, ashes from clearings: second, 225 pounds of super-phosphate of lime; third, 200 pounds Peruvian guano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in

Mr. Wilson's growing crops, and the wheat stubble of the present season, all indicate his land as productive as any part of the State.

At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hired man how it was produced. We found that the land had been the year but one before in wheat, sown with clover, and this cut one season, and last spring plowed once, with one "poor old nag," and planted with corn:

"Yes, but you manured high, we suppose ?" we 

we hadn't but forty one-horse loads altogether, fer 23 acres, and we wanted the most on't for the truck. .

The truck consisted of beets, carrots, cabbsge, cucumbers, melons, &c., and a very productive patch of Lima beans, grown for marketing. So we ware satisfied that the soil was not infertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been in cultivation long enough to obliterate all signs of the forest.

Our next visit was to the large farm of Andrew

for the Shoe manufacturing business, and other ar-ticles, being near Philadelphia, and the surrounding mile east of the railroad, and just about in the cenand Bonds, etc., must pay from three | five per she has just returned from the city with a complete cent. tax on the income.
