THE TOMB.

DIED .- In Antrim township, June 5th, 1864, Mr. Christian Stoner, in the 50th year of his age.

Near Middleburg, Md., at the residence of Mr. Samuel D. Brumbaugh, Nicholas Napoleon, son of Mr. John Felmlee, aged 1 year, 9 mos. and 21 days. Congress and the

S. 10-40 BONDS .- These Bonds are issued under the Act of Congress of March 8 1864, which provides that all Bonds issued under this Act shall be EXEMPT FROM TAXATION by or under any state or municipal authority. Subscriptions to these Bonds are received in United States notes or notes of National Banks. They are TO BE REDEEMED IN COIN, at the pleasure of the Government, at any period not less than ten nor more than forty years from their date, and until their redemption FIVE PER CENT. INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually and on all other Bonds semiannually. The interest is payable on the first days of March and September in each year.

Subscribers will receive either Registered or Coupon Bonds, as they may prefer. Registered Bonds are recorded on the books of the U.S. Treasurer, and can be transferred only on the owner's order. Coupon Bonds are payable to bearer, and are more convenient for commercial uses.

Subscribers to this loan will have the option of having their Bonds draw interest from March 1st, by paying the accrued interest in coin-(or in United States notes, or the notes of National Banks, adding fifty per cent. for premium,) or receive them drawing interest from the date of subscription and leposit. As these Bonds are

Exempt from State or Municipal Taxation, their value is increased from one to three per cent. per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay OVER EIGHT PER CENT. INTEREST in currency, and are of equal convenience as a per-

manent or temporary investment. It is believed that no securities offer so great in-

ducements to lenders as the various descriptions of U. S. Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for in sums from \$50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

It may be useful to state in this connection that the total Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1364. was \$768,975,000. The interest on this debt for the coming fiscal year will be \$45,937,126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1864, has been so far at the vate of over \$100,000,000 per annum.

It will be seen that, even the present gold reventes of the Government are largely in excess of the wants of the Treasury for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to \$150,000.-000 per annum.

Instructions to the National Banks acting as loan igents were not issued from the United States Treasury until March 26, but in the first three weeks sf April the subscriptions averaged more than TEN MILLIONS A WEEK.

Subscriptions will be received by the First National Bank of Philadelphia, Pa.

Second National Bank of Philadelphia "Pa." Third National Bank of Philadelphia, Pa.

AND BY ALL OTHER NATIONAL BANKS hich are depositaries of Public money, and all

NEW HARDWARE. A. W. WELSH, Dealer in Hardware and Cutlery, GREENCASTLE, PA.

A general assortment of all kinds always on hand Call and see the beautiful stock just opened. Greencastle, November 17, 1863-1y.

THE Secretary of the Treasury has not yet given I notice of any intention to withdraw this popular Loan from Sale at Par, and until ten days notice is given, the undersigned, as "GENERAL SUBSCRIPTION ACENI," will continue to supply the public.

The whole amount of the Loan authorized is Five Hundred Millions of Dollars. NBARLY FOUR HUNDRED MILLIONS HAVE BEEN ALREADY SUBSCRIBED FOR AND PAID INTO THE TREA-SURY, mostly within the last seven months. The large domand from abroad, and the rapidly increasing home demand for use as the basis for circula tion by National Banking Associations now organizing in all parts of the country, will, in a very short period, absorb the balance. Sales have lately ranged from ten to tifteen millions weekly, frequently exceeding three millions daily, and it is well known that the Secretary of the Treasury has ample and unfailing resources in the Duties on Imports and Internal Revenues, and in the issus of the Interest bearing Legal Tender Treasury Notes. it is almost a certainty that he will not find it necessary, for a long time to come, to seek a market for any other long or permanent Loans, THE IN-TEREST AND PRINCIPAL OF WHICH ARE PAY-ABLE IN GOLD.

Prudence and self-interest must force the minds of those contemplating the formation of National Banking Associations, as well as the minds of all who have idle money on their hands, to the prompt conclusion that they should lose no time in subscribing to this most popular Loan. It will soon be beyond their reach, and advance to a handsome premium, as was the result with the "Seven Thirty Loan, when it was all sold and could no longer be

subscribed for at par. IT IS A SIX PER CENT LOAN, THE INTEREST AND PRINCIPAL PAYABLE IN COIN. THUS YIELDING OVER NINE PER CENT. PER ANNUM at the present rate of premium on coin.

The Government requires all duties on imports to be paid in Gold ; these duties for a long time past amounted to over a Quarter of a Million of Dollars daily, a sum nearly three times greater than that required in the payment of the interest on all the 5-20's and other permanent Loans. So that it is hoped that the surplus Com in the Treasury, at no distant day, will enable the United States to resume specie payments upon all liabilities.

The Loan is called 5-20 from the fact that Bonds may run for 20 years, yet the Government has a right to pay them off in Gold at par, at any time after 5 years.

THE INTEREST IS PAID HALE-YEARLY, viz. on the first days of November and May. Subscribers can have Coupon Bonds, which are

payable to bearer, and are \$50, \$100, \$500, and \$1000; or Registered Bonds of same denomina-tions, and in addition. \$5,000, and \$10,000. For Banking purposes and for investments of Trustmonies the Registered Bonds are preferable.

These 5-20's can be taxed by States, cities, towns, or counties, and the Government tax on them is onty one-and-a-half per cent.. on the amount of income, when the income of the holder exceeds Six Hundred dollars per annum; all other investments such as income from Mortgages, Railroad Stock , must pay from three to five pe sonus, et cent. tax on the income. Banks and Bankers throughout the Country will continue to dispose of the Bonds; and all orders

VINEEAND. TO ALL WANTING FARMS. New Settlement of Vineland.

EMEDY FOR HARD TIMES. A Rare Opportunity in the Best Market, and Most Delightful and Healthful Climate in the Union. Only thirty miles South of Philadelphia. on a Railroad; being a Rich, Heavy Soil, and Highly Productive Wheat Land; Amongst the Best in the Garden State of New Jersey. It consists of 20,000 acres of GOOD land, divided

into Farms of different sizes to suit the purchaser-FROM 20 ACRES AND UPWARDS-and is sold at the rate f from \$15 to \$20 per acre for the farm land, payable one-fourth cash, and the balance by quarteryearly installments, with legal interest, within the erm of four years.

The Soil is, in great part, a Rich Clay Loam, suit-able for Wheat, Grass und Potatoes-also a dark and rich sandy loam, suitable for corn. sweet-potatoes, obacco, all kinds of vegetables and root crops, and the finest varieties of fruit, such as Grapes, Pears, Peaches, Apricots, Nectarines, Blackberries, Melens and other fruits, best adapted to the Philadelphia and New York Markets. In respect to the soil and crops there can be no mistake, as visitors can examine both, and none are expected to buy before so doing, and finding these statements correct-under hese circumstances, unless these statements were correct, there would be no use in their being made. It is considered the best Fruit soil in the Union.

[Ses Reports of Solon Robinson, Esq., of the New York Tribune, and the well-known agriculturist, William Parry, of Cinnaminson, New Jersey, which will be furnished inquirers.]

The Market .--- By looking over a map the reader will perceive that it onjoys the best market in the Unand has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce 15 this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer sells he gets the highest price: whilst groceries and other articles he purchases he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has school for his children, di-vine service, and all the advantages of civilization, and he is near a large city. The Climate is delightful; the winters being sa-

lubrious and open, whilst the summers are no warmer thankin the North. The location is upon the line of latitude with northern Virginia. Persons Wanting'a change of Climate for Health,

would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmonary affections, dyspepsia or general debility. Visitors will notice a difference in a few days. Chills and fevers are unknown. Conveniences at Hand.—Building material is plen-

Fish and oysters are plenty and cheap.

Visitors must expect, however, to see a new place. Why the Property has not been Settled Before ?-This question the reader naturally asks. It is because it has been held in large tracts by families not disposed to sell, and being without railroad facilities they had few inducements. The Railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a carriage, free of expense, and afforded time and opportunity for thorough investigation. Those who come with a view to settle, should bring money to secure their purchases, as locations are not held upon refusal. The Safest thing in Hard Times, where people have been thrown out of employment or business, and possess some little means or small incomes, is to start themselves a home. They can buy a piece of laud at a small price, and earn more than wayes in improving it, and when it is done it is a certain independence and no ioss. A few acres in fruit trees will insure a comfortable living. The land is put down to hard-times, and all improvements can be made at a cheaper rate than most any other time. The whole tract, with six miles front on the rail-

road, is being laid out with fine and spacious avenues, with a town in the centre-five acre lots in the town sell at from \$150 to \$200; two and a half acre lets, at from \$80 to \$120, and town lots 50 feet front by 150 feet deep, at \$100-payable one-half cash and 1.19 balance within a year. It is only upon farms of twenty acres, or more, that four years time is given.

To Manufacturers, the town affords a fine opening or the Shoe manufactu

Report of Solon Robinson.

OF THE NEW YORK TRIBUNE, UPON THE VINELAND SETTLEMENT

BEF The following is an extract from the report of Solon Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons can read this report with interest.

Advantages of Farming near Home-Vineland-Re-marks upon Marl-Soil, its great Fertility-The Cause of Fertility-Amount of Crops Produced-Practical Evidence.

It is certainly one of the most extensive fertile tracts, an almost level position, and suitable condition for pleasant farming that we know of this side of the west-ern prairies. We found some of the oldest farms apparently just as profitable productive as when first cle of forest fifty or a hundred years ago.

The geologist would soon discover the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the tertiary formation ; and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plasants the farmer desires to cultivate.

Marl, in all its forms, has been used to fertilize crops in England, from the time it was occupied by the Romaus; and in France and Germany a mari bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field .---How much more valuable then it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the earth.

Having then satisfied our minds of the cause, they will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations, having the same general characteristics or as least appearances, is entirely unrenumerative except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this lanu for cultivation, of which we have some strong proof.

Our first visit was to William D. Wilson, Franklin township, Gloucester county, who purchased some eight miles north of Millville, about three years ago, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also furnished sixteen miles of the road with ties. and has no doubt made the mill profitable, though his main object was to open a farm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some of his crops prove. For instance, last year, the second time of cropping, 306 bushels of potatoes on one acre, worth 60 cents a bushel in the field. This year seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was potatoes, planted among the roots, and yielded 75 bushels .----The potatoes were dug, and wheat sown, and yield-ed 16 bushels; and the stubble turned under and sown to buckwheat, which yielded 33% bushels; and then the ground was sown to clover and timothy, which gave as a first crop 21 tons per acre.

The fertilizers applied to these crops were first, ashes from clearings: second, 225 pounds of super-phosphate of lime; third, 200 pounds Peruvian gaano; then 50 bushels of slaked lime has been spread upon the clover since it was mowed, and turned in

Mr. Wilson's growing crops, and the wheat stubble of the present season, all indicate his land as productive as any part of the State.

At Mary Barrow's, an old style Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to inquire of the hired man how it was produced. We found that the land had been the year but one before in wheat, sewa with clover, and this cut one season, and last spring plowed once, with one "poor old nag," and planted with corn.

"Yes, but you manured high, we suppose ?" we

we hadn't but forty one-horse loads altogether, fer 23 acres, and we wanted the most on't for the truck. The truck consisted of beets, carrots, cabbage, ucumbers, melons, &c., and a very productive patch of Lima beans, grown for marketi ng. So we satisfied that the soil was not infertile, even unaided by clover, which had fed the corn, because the "truck patch" had not been in cultivation long enough to

obliterate all signs of the forest. Our next visit was to the large farm of Andrew harp, five miles north of Millville, from half to a ticles, being near Philadelphia. and the surrounding mile east of the railroad, and just about in the cencountry has a large population, which affords a tre of Vineland. Mr. Sharp commenced work here good market. three years, he has got 234 acres cleared and in crops this season, as well inclosed and divided into several fields, with cedar rail or pole fence; has built a two-story dwelling, about 86 by 40 feet, and a smaller house for farm laborers, and a stable and granary and some other out buildings. Considerable part of the land was cleared for the nlow at \$9 an acre, and on some of it the first crop was buckwheat, limed with 50 bushels in powder per acre. This crop may be put in July 4th to 20th, and yields 20 to 30 bushels per acre, harvested in November; when the land being sowed with 150lbs of Peruvian guano and seeded with rye, yielded 12 to 15 bushels per acre and \$10 worth of straw. The ryestubble turned, after knocking off a large growth of oak sprouts, and dressed again with guano and seeded to wheat, gave 15 or 15 bushels. The crop which he was threshing while we were there promises more, of a very plump grain, and the straw is very heavy. We went over the stubble, and found the clover and timothy, from seed sowed last spring, on the wheat without harrowing, looking as well as we ever saw it upon any old cultivated farm, and with a lit-tle work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantee two tons per acre, if he will give the overplus if it averruns the estimate. Part of the land was planted with potatoes for a first crop, which yielded 120 bushels per acre. It was then limed with 50 bushels per acre, and seeded with wheat and clover, yielded and average of over 15 bushels per acre, and the clover now looks beantiful. Other portions have been planted with corn as a first crop, which yielded 30 bushels of yellow fint corn, and the second crop 40 bushels, and the third crop, treated to 150lbs. of guano, we are sure no one would estimate below 40 bushels per acre. [The reader will recollect that the writer is now ÉD.] . In other cases, the corn crop of last year was followed with oats this season, not yet threshed, but will average probably 40 to 50 bushels. Sweet po-fatoes, beans, melons, and, in fast, all garden vegctables, as well as young peach and other frait trees planted this year show very plainly that this long-neglected tract of land should remain so ne longer, and there is now a strong probability that it will not; for under the auspices of Mr. Landis, it will be divided into small lots, with roads located to accommodate all-the surveyor is now busy at this work-and all purchasers will be required to build neat comfortable houses, and either fence their lots in uniformity, or agree to live without fence, which would be preferable, by which means good population will be secured, who will establish churches, schools, stores, mills, mechanic shops and homes—homes of American farmers, surrounded by gardens, srchards, fields and comforts of oiv-ilized life: If may one, from any derangement of business, is desirous of changing his pursuits of life, or who is from any cause desirous to find a new location and cheap home in the country, and who may read und billieve what we have truly stated, he will do well to go and see for himself what may be seen SALE BILLS PRINTED HERE, NEATLY AND within a two hours ride out of Philadelphia. SOLON ROBINSON.

GREAT DISCOVERY! KUNKEL'S Bitter Wine of Iron

For the cure of weak stomachs, general debility, in digestion, diseases of the nervous system, constination. acidity of the stomach, and for all cases requiring a tonic.

This wine includes the most agreeable and efficient Salt of Iron we possess; Citrate of Magnetic Oxide combined, with the most energetic of vegetable ton-ics, Yellow Peruvian Bark. The effect in many cases of debility, loss of appetite, and general pros tration of an efficient Salt of Iron. combined with our valuable Nerve Tonic, is most happy. It augments the appetite, raises the pulse, takes off mns cular flabbiness, removes the paler of debility, and gives a florid vigor to the countenance.

Do you want something to strengthen you? Do you want a good appetite? Do you want to build up your constitution? Do you want to feel well? Do you want to get rid of nervousness? Do you want energy ? Do you want to sleep well? Do you want a brisk and vigorous feeling? If you do, try

Kunkel's Bitter Wine of Iron!

This truly valuable Tonic has been so thoroughly tested by all classes of the community that it is now deemed indispensable as a tonic medicine. It costs but little, purifies the blood, and gives tone to the stomach, renovates the system, and prolongs life I now only ask a trial of this valuable tonic.

COUNTERFEITS.

BEWARE OF COUNTERFRITS .- AS KUNKEL'S BITTER WINE OF IRON is the only sure and effectual remedy in the known world for Dyspepsia and Debility, and as there are a number of imitations offered to the public, we would caution the community to purchase none but the genuine article, manufactured by S. A. KUNKEL, and has his stamp on the top of the cork of every bottle. The very fact that others Bre attempting to imitate this valuable remedy proves its worth and speaks volumes in its favor. The BITTER WINE of IRON is put up in 75 cent and \$1 bottles, and sold by all respectable druggists hroughout the country. Be particular that every nottle bears the fac simile of the proprietor's signa-
