GENERAL NOTICES.—Third Page, 20 cents; a line extra, 10 cents; second page, 25 cents per line.

MARRIAGE NOTICES.—20 cents each.

FUNERAL NOTICES.—Announcing deaths. For two lines, 10 cents; each additional line, 5 cents.

MINERS' HOSPITAL.—We publish the Miners' Hospital Bill, introduced into the Senate by Mr. RANDALL, and which has passed that body. We have also published the House Bill, and also pass the House, as the members all seem to be in favor of it. We learn that a similar bill may also be passed for the other counties.

VENTILATION OF MINES, MIXING, &amp;c.

We received a communication from Mr. F. J. Griffiths on the subject of Mining Coal and Ventilation, which we should like to publish. But as it is accompanied with a draft illustrating the same, we will publish it in the next number without the cut.

The accompanying article is always furnished by the writers of the communiques.

If the writer will either furnish the cut, or write it out without reference to it, we will publish it.

THE LAW JUDGE BUSINESS.—If we have time we will next week ventilate the Additional Law Judge business—tell how it commenced—the objects to be accomplished—and how the Republican lawyers were inveigled into so as to prevent a fight among the Democracy, and throw the responsibility upon the Republican lawyers and the Republicans.

The Republicans were in the majority in the matter, and how a number of the Republican lawyers were corrupted into their present position.

TUBULAR STATEMENT.—NAME LIST OF COAL MINES.—We have published a short notice of a tubular statement of coal mining this week, in which we have attempted to identify the different veins in the region which go by different names. We do not know that we have succeeded in doing so in every instance, and therefore publish it this week in part, so as to enable our operators to make use of it in their operations. We desire them to do this immediately, so as we can put it in our ANNUAL Register accordingly. The Register will be ready next week. It has been delayed for this laborious statement, and also the new Ventilation Bill.

THE ANTHRACITE MONITOR says a portion of miners have leased the Mt. Eliza Colliery for the purpose of carrying it on upon the Co-operative system. We have often recommended this plan to our miners, believing it would be of great benefit to themselves as well as to the coal business. By this plan the miner will not only become more thorough in his work, and will then be compelled to adjust himself to the men, and to the miners, and having no personal interest in the management of the works, he will be more inclined to furnish his services to the best advantage to his employer.

The miners will be enabled to furnish their coal at Rockhill &amp; Wilson's, wherever it may be sent.

How ROCKHILL &amp; WILSON manage to sell their coal at such a low price is a mystery to us.

A large number of miners and laborers are employed by Rockhill &amp; Wilson, and the miners are well treated, and the miners themselves encourage the men to do their best.

All the best men here and elsewhere are employed by Rockhill &amp; Wilson, and the miners themselves encourage the men to do their best.

In Cincinnati it has just been decided that a man has a perfect right to wear men's clothes, as much as any woman has a right to wear women's clothes, and that anywhere about here, for Rockhill &amp; Wilson, is delighted to adjust himself to the men, and to the miners, and having no personal interest in the management of the works, he will be more inclined to furnish his services to the best advantage to his employer.

The Ventilation Bill has passed the House in the state, and we know all the best looking for it next week.

POTTSVILLE, MARCH 3, 1870.

TO THE EDITOR OF THE DAILY MINERS' JOURNAL.—NAME LIST OF COAL MINES.—We have information to the effect that the Daily Miners' Journal, for the information of operators and industrialists at coal mines, has been suspended.

That the suspension of all dead work will be allowed to proceed, and all pumice to continue to take place, also that the paper is a second out of course of operation, it is evident that it probably will not be allowed to proceed again.

By order of the Executive Committee, President, George Conner, Secretary.

COAL TRADE BY RAILROAD AND CANAL.

POTTSVILLE, MARCH 3, 1870.
