The daily march to school is sure to be pretty hard on the shoes the girls and boys wear---so, too, the play-time before and after.

The shoes we have ready for trying on are durable. They'll wear just as you think shoes should wear---or better. Besides they won't pinch and hurt. They're right all the way through---leather, style and shape. With all that, the prices are right, too.

Boys, \$1.15 to \$2.25. Girls \$1.15 to \$1.75.

DEAD MAN STEERED SHIP.

Corpse of Sailor Found at Wheel of Schooner In Port After Storm.

HONOLULU, Sept. 14.—A dead man held the wheel of the schooner Charles Ley Woodbury for several hours during the night of Aug. 8 while the vessel was on her way here from Laysan island. He was a Japanese sailor, and he was found erect at his post. The vessel, though greatly damaged by a hurricane, which is supposed to have caused the man's death from overexertion, reached port in safety.

The Woodbury is the schooner for which the United States tug Iroquois recently left here to search, the vessel being long overdue from Laysan. It was finally learned that she had put back after a terrible experience.

Captain Harris, who was in command, says his craft was swept along at the rate of nine knots an hour with a sea of canvas on her. He gave up hope of saving her and said goodbye to Captain Schlemmer of Laysan, who was a passenger.

Bulwarks were then knocked away to keep the decks clear of water, and oil was poured on the ocean. The schooner ran for five days and nights at the mercy of the gale without the captain being able to take an observation by either sun, moon or stars.

The Japanese who died at his post complained of feeling ill when he took his place as steersman and asked a companion to stand by him for a time. No one saw him die. When found he had fallen forward, but his hands held on, and the vessel was holding her course fairly well.

Violet Tint in Glass.
Glass containing manganese is slowly turned violet by sunlight, and Sir William Crookes has found that radium produces in a few days a coloration as intense as that caused by the sun in years. F. Fischer has now been studying the effects of ultra violet rays and reports that the light of a mercury arc lamp in a quartz tube gave a slight color in 15 minutes to four out of eight glasses, and an intense violet hue in 12 hours. The color proved to be due to manganese silicate.

EARLY EGYPTIANS IN FRANCE.
There has just been laid before the French Academy of Sciences a well authenticated case of prehistoric Egyptian remains found among the prehistoric remains of ancient Gaul. The connection between Gaul and Egypt was established in this way. A card of cut flints of the Neolithic period was obtained from Egypt and a card of exactly similar flints found in the island, nine miles from Marseilles, was shown with them. At the spot on the island where these flints were excavated there were found lying nearest the surface some Roman pottery; below that Greek pottery, with Liguian and Egyptian still lower, and below these again masses of marine shells, pottery and flints different from any yet found. The remains found go back for at least 5,000 years.
