Fruit Used to Prevent Drought.

The fruit of the Barbary nopal, a widely distributed fig tree, is used by Prof. Cusmano, an Italian, for the novel purpose of watering trees for protecting them from drought.

A pit a foot deep and two yards across is dug around the tree to be protected, and this is filled with the figs and their stems, the whole being beaten down and covered with a layer of earth.

The pulp thus laid down in spring absorbs much moisture, which is given off very slowly. After a drought of four months Prof. Cusmano has found the pulp still fresh and capable of supporting vegetation, while the foliage of the tree was green and in perfect condition.

A Big Fish Story

Athens—The fish story of the season comes from Dr. Julius Escobar, one of the surgeons in the U. S. army in the Philippines. Dr. Escobar is the son of Robert Escobar of this place.

A company of native troops, Philippine scouts, were bathing in the Oras river when a crocodile carried one of the men off. A few days afterward Dr. Escobar shot a crocodile which measured 18 feet in length and 8 feet in circumference at its greatest girth. Just before expiring the reptile vomited a dog and a large monkey entire.

Upon opening the crocodile its stomach was found to contain two pieces of tin, the remains of two monkeys and bones of what were without doubt the upper and lower extremities of a human being, possibly the scout above mentioned.

Was an Eton Boy.

Mr. Austen Leigh an authority on all matters pertaining to Eton, has discovered that Thomas Lynch, one of the signers of the Declaration of Independence, was an Etonian.

Opaque.

A New Zealand publication, the Contract Journal, makes this bull: "The clash of party cries is obstructing a clear view of the present position of this country."

No Wonder.

Swords for plowshares make poor harvests. It is not surprising to learn that Russia's wheat crop is short 180,000,000 bushels.—Youth's Companion.

Railroad for Africa.

The Portuguese government will build a railroad from Delagoa bay to Swaziland. That adds one more to the many "openings up" in Africa.

Big Profit.

A quack "cancer" cure sold in England at five dollars a bottle proved to contain material worth, at most, four cents.

No Artificial Emeralds.

The artificial production of emeralds is declared to be impossible by Prof. Verneuil, the first creator of rubies.

Speed of Light.

A ray of light could move eight times round the globe between the ticks of a watch.
