MINE WORKERS MEET.

Will Demand Eight Hour Day and

SHAMOKIN, Pa., Dec. 15. - Five hundred delegates were present when John Mitchell, president of the United Mine Workers of America, called the convention of authracite coal miners

This convention is regarded as more important than any held since Mitchell came into the hard coal field in 1900, with the avowed purpose of duplicat ing the organization in western Pennsylvania and the western states which held contracts with the bituminous coal

convention to request a conference of operators. This will be made in the form of a resolution, and the following demands, it is said, will be made if the conference is granted:

A party agreement better known as recognition of the union, an eight hour workday; an increase in pay to all classes of employees of at least 10 per cent and possibly 20 per cent, based on the wages in effect April 1, 1902.

This would mean that the miners would receive about the same as under the present award. For some unskilled employees it would mean a slight increase.
